FIRST CYCLE NAAC ACCREDITATION 2022

CRITERION 1

CURRICULAR ASPECTS

1.2 Academic Flexibility

1.2.1 Details of interdisciplinary courses in curriculum

Submitted to

THE NATIONAL ASSESSMENT AND ACCREDITATION COUNCIL

Please see the reference page for details of courses with interdisciplinary training

INDEX

SL.NO	Year of offering	Name of course with interdisciplinary training	Refer page No.
1	1 st year BSC Nursing	Anatomy	8
2		Physiology	14
3		Microbiology	28
4		Nutrition	35
5		Biochemistry	41
6		Psychology	47
7		English	85
8		Introduction To Computers	87
9	II nd year BSC Nursing	Sociology	90
10		Medical Nursing-1	97
11		Pathology	115
12		Surgical Nursing	120
13		Pharmacology	133
14		Community Health Nursing-I	143
15	III rd year BSC Nursing	Medical Surgical Nursing-Ii	152
16		Child Health Nursing	167
17		Mental Health Nursing	182
18		Research & Statistics	198
19	IV th year BSC Nursing	Obstetric & Gynecological Nursing	204
20		Community Health Nursing-II	231
21	MSC Nursing I st year	Nursing Education	284
22		Advanced Nursing Practice	293
23		Nursing Research And Statistics	300
24		Medical Surgical Nursing-1	309
25		Mental Health Nursing	483
26		OBG Nursing	784
27	MSC Nursing II nd year	Nursing Management	316
28		Medical Surgical Nursing -II	325
29		Mental Health Nursing	502
30		OBG Nursing	802

Syllabus

for Courses affiliated to the
Kerala University of Health Sciences

Thrissur 680596

BACHELOR OF SCIENCE IN NURSING

(B.Sc Nursing)

Course Code :006

(2016-17 admission onwards)

2016

2. COURSE CONTENT

2.1 Title of course:

BACHELOR OF SCIENCE IN NURSING – Abbreviated as B.Sc. Nursing

2.2 Objectives of course

Aims

The aim of the undergraduate nursing program is to:

1. Prepare graduates to assume responsibilities as professional, competent nurses and midwives in providing promotive, preventive, curative and rehabilitative services.
2. Prepare nurses who can make independent decisions in nursing situations, protect the rights and facilitate individuals and groups in pursuit of health, function in the hospital, community nursing services, and conduct research studies in the areas of nursing practice. They are also expected to assume the role of teacher, supervisor, and manager in a clinical/ public health setting/ school of nursing.

Objectives

On completion of the four years B.Sc Nursing programme the graduate:

- apply knowledge from physical, biological and behavioral science, medical including alternative systems and nursing in providing nursing care to individuals, families and communities.
- demonstrate understanding of life style and other factors, which affect health of individuals and groups.
- provide nursing care based on steps of nursing process in collaboration with individuals and groups.
- demonstrate critical thinking skill in making decisions in all situations in order to provide quality care.
- utilize the latest trends and technology in providing health care.
- provide promotive, preventive, and restorative health services in line with the National Health Policies and programmes.
- practice within the framework of code of ethics and professional conduct, and acceptable standards of practice within the legal boundaries.

- communicate effectively with individuals and groups, and members of the health team in order to promote effective interpersonal relationships and team work.
- demonstrate skill in teaching to individuals and groups in clinical/community health settings/ School of Nursing
- participate effectively as member of the health team in health care delivery system.
- demonstrate leadership and managerial skills in clinical/community health settings.
- conduct need based research studies in various settings and utilize the research findings to improve the quality of care.
- demonstrate awareness, interest and contribute towards advancement of self and of the profession.

2.3 Medium of instruction:

Medium of instruction shall be in English

2.4 Course outline

Courses of Study

The following are courses with inter-disciplinary / inter-departmental classes

First Year B. Sc Nursing

Subject		Theory (hrs) (Class and Lab)	Practical / clinical(hrs)	(hrs)
Part I	Biological sciences			
Paper I	Anatomy	100 (80+20)		
Paper II.	Physiology	90 (80+10)		
Paper III	Microbiology	90 (80+10)		
Paper IV.	Nutrition & Biochemistry A. Nutrition B. Biochemistry	60(40+20) 40		
Part II	Behavioural sciences			
Paper I	Psychology	60		
Part III	Nursing –I			
Paper I	Nursing Foundations	465 (265+200)	450	
Part IV				
Paper I	English	30		
Paper II	Introduction to Computers	45(15+30)		
	Library work / Self study			150
	Co- curricular Activities			100

Total	980	450	250
Total Hours			- 1680

Second Year B. Sc Nursing

Subject		Theory(hrs) (Class and Lab)	Practical/ Clinical (hrs)	(hrs)
Part -I	Social Sciences			
Paper I	Sociology	60		
Part- II	Nursing II			
Paper I	Medical Surgical Nursing (Adult including Geriatrics)-I a. Medical Nursing b. Pathology	110 30(20+10)	440	
Paper II	Medical Surgical Nursing (Adult including Geriatrics)-I Surgical Nursing	110	520	
Paper III	Pharmacology	60		
Paper IV	Community Health Nursing-I	100	160	
	Library work / Self study			60
	Co- curricular Activities			30
	Total	470	1120	90
Total Hours			- 1680	

Third Year B. Sc Nursing

Subject		Theory(hrs) (Class and Lab)	Practical/ Clinical (hrs)	(hrs)
Part I	Nursing –III			
Paper I	Medical Surgical Nursing(Adult including Geriatrics)- II	110	400	
Paper II	Child Health Nursing	140	400	
Paper III	Mental Health Nursing	110	360	
Part II	Research & Statistics			
Paper I	Nursing Research & statistics	50 (35+15)	80	
	Library work / Self study			20
	Co- curricular Activities			10
	Total	410	1240	30
Total Hours				- 1680

Fourth Year B. Sc Nursing

Subject		Theory(hrs) (Class and Lab)	Practical/ Clinical (hrs)	(hrs)
Part I	Nursing IV			
Paper I	Obstetric & Gynecological Nursing	100+30=130	480+160	
Paper II	Community health Nursing-II	100	320	
Part II	Education and Management			
Paper I	Nursing Education	80	120	
Paper II	Management of Nursing services & Education	70	120	
	Library work / Self study			70
	Co-curricular activities			30
	Total	380	1200	100
Total Hours				- 1680

2.5 Duration

Duration of course shall be 4 years. The maximum period to complete the course successfully shall not exceed 8 years (double the duration of course)

2.6 Syllabus

FIRST YEAR B Sc NURSING

ANATOMY ————— Course No. 1

Placement – I Year

Theory (In hours) -100

(Class hours-80+ Lab hours -20)

Course Description:

The Course is designed to enable students to acquire knowledge of the normal structure of various human body systems and understand the alterations in anatomical structures in disease and apply this in the practice of nursing.

Unit	Time (Hrs.)	Learning Objectives	Content	Teaching Learning Activities	Assessment Methods
I	5	Describe the anatomical terms, organization of human body and structure of cell, tissues, membranes and glands.	<p>Introduction to Anatomical terms.</p> <ul style="list-style-type: none"> • Organization of the human body. • Human Cell:- Structure. • Tissues- Definition, types, characteristics, classification, location, functions and formation. • Membranes and glands:- Classification and structure. • Organelle :- structure • Alteration in disease • Applications and implications in nursing. 	Lecture, Discussion Explain using charts, microscop slides, -skeleton & torso	Short answer Very short answers
II	10	Describe the structure of bones and joints	<p>Skeletal System</p> <ul style="list-style-type: none"> • Bones:- types, classification, structure, description. 	-Lecture discussion -Explain using	Essay Short

			<ul style="list-style-type: none"> • Bones of limbs, Vertebra, Ribs, Sternum, Bony pelvis, skull. • Joints:- classification, structure. • Major joints- Hip, Shoulder, Knee, elbow, Wrist, carpo-metacarpal, Tibio-fibular, radio-ulnar • Alteration in disease • Applications and implications in nursing. 	charts, skeleton, loose bones, and joints.	Answers Very short answers
III	7	Describe the structure of muscles	Muscular System <ul style="list-style-type: none"> • Types and structure of muscles • Gluteal, thigh & deltoid (Structure of muscle in detail). • Actions of various individual and groups of muscles • Alteration in disease • Applications and implications in nursing. 	Lecture, discussion Explain using chart, models and films Demonstrate muscular movements	Essay Short Answers Very short answers
IV	10	Describe the structure of nervous system	Nervous System <ul style="list-style-type: none"> • Structure of neurons, neuroglia. CNS&PNS:- <ul style="list-style-type: none"> • Parts, Structure and Blood supply :-brain & spinal cord. 	Lecture, discussion Explain using models, charts,	Essay Short answers

			<ul style="list-style-type: none"> • Cranial nerves, Spinal nerves, Peripheral nerves (axillary, sciatic, femoral, radial), important cutaneous nerves. • Autonomic Nervous System- • Sympathetic and parasympathetic • Alteration in disease • Applications and implications in nursing. 	slides, specimens	Very short answers
V	6	Explain the structure of sensory organs	<p>Sensory Organs</p> <ul style="list-style-type: none"> • Structure of :- <ul style="list-style-type: none"> • Skin • Eye -Layers, Muscles of eye ball (name & action) • Ear • Nose • Tongue • Alteration in disease • Applications and implications in nursing. 	Lecture, Discussion Explain using models, charts, slides, specimens	Essay Short answers Very short answers
VI	10	Describe the structure of circulatory and lymphatic system	<p>Circulatory and lymphatic system</p> <ul style="list-style-type: none"> • Circulatory system • Microscopic structure of blood • Structure of Heart: - layers, Chambers, blood supply. 	Lecture, discussion Explain using models, charts, slides,	Essay Short answers Very short answers

			<ul style="list-style-type: none"> • Structure of blood vessels:- <ul style="list-style-type: none"> • Arterial & Venous System. • Circulation: - systemic, pulmonary, coronary. • Major arteries of limbs, head and neck, thorax, abdomen, pelvis • Veins used for IV injections • Lymphatic system:-: <ul style="list-style-type: none"> • Lymphatic vessels and Lymph • Microscopic structure of lymphoid organs • Lymphatic tissues • Thymus gland, Lymph nodes, Spleen, Tonsil • Alteration in disease • Applications and implications in nursing. 	specimens	
VII	6	Describe the structure of respiratory system	Respiratory System <ul style="list-style-type: none"> • Parts of the respiratory system <ul style="list-style-type: none"> • Pharynx, Larynx, Trachea, Bronchi, Lung, Broncho pulmonary Segments, Pleura. • Muscles of respiration: - <ul style="list-style-type: none"> • Intercostals , • Diaphragm. 	Lecture Discussion Explain using models, torso, charts, slides, specimens	Essay Short answers Very short answers

			<ul style="list-style-type: none"> • Paranasal sinuses • Alteration in disease • Applications and implications in nursing. 		
VIII	8	Describe the structure of digestive system	Digestive System <ul style="list-style-type: none"> • Parts of Alimentary tract :- Mouth, Salivary glands, Oesophagus, Stomach, small intestine, appendix, large intestine, rectum & anal Canal. • Accessory organs of digestion:- Pancreas, Liver & Gall bladder • Alteration in disease • Applications and implications in nursing. 	Lecture, Discussion Explain using models, torso, charts, slides, Specimen.	Essay Short answers Objective type
IX	6	Describe the Structure of excretory system	Excretory System <ul style="list-style-type: none"> • Structure of organs of urinary System:- Kidney, Ureter, Urinary bladder, Urethra (male, female) • Structure of nephron • Alteration in disease • Applications and implications in nursing. 	Lecture Discussion Explain using models, torso, charts, slides, Specimen.	Essay Short answers Objective type
X	6	Describe the structure of	Endocrine System <ul style="list-style-type: none"> • Structure of glands: 	Lecture Discussion	Essay

		endocrine system	<p>Pituitary, Pancreas, Thyroid, Parathyroid, Adrenal.</p> <ul style="list-style-type: none"> • Alteration in disease • Applications and implications in nursing. 	<p>Explain using models, torso, charts, slides, specimen</p>	<p>Short answers</p> <p>Objective type</p>
XI	6	Describe the structure of reproductive system including breast	<p>Reproductive system including Breast:</p> <ul style="list-style-type: none"> • Structure of female reproductive organs:- Uterus, Fallopian tubes, Ovary, Vagina. • Structure of breast. • Structure of male reproductive organs:- Testes, Epididymis, Vas Deferens, Prostate • Alteration in disease • Applications and implications in nursing. 	<p>Lecture Discussion Explain using models, torso, charts, slides, specimen.</p>	<p>Essay</p> <p>Short answers</p> <p>Objective type</p>

PHYSIOLOGY

Course No. 2

Placement: I Year

Theory (In hours) -90

(Class hours-80+ Lab hours -10)

Course Description:

The Course is designed to enable the students to acquire knowledge of the normal physiology of various human body systems and understand the alterations in physiology in diseases and apply this in practice of nursing.

Unit	Time (Hrs.)	Learning Objectives	Content	Teaching Learning activities	Assessment Methods
I	4	Describe the physiology of cell, tissues, membranes and gland	Cell Physiology <ul style="list-style-type: none"> • Homeostasis-definition • Cell membrane-structure • Tissue formation, repair • Concept of ECF & ICF. • Transport across cell membrane-active transport (Na- K pump), diffusion, and osmosis. • Intravenous fluid therapy-basic principles • Alteration in disease • Applications and implications in nursing. 	Lecture, discussion	Short answers Very short answers

II	3	Describe the bone formation , growth and movements of skeletal system	<p>Skeletal system</p> <ul style="list-style-type: none"> • Bone formation and growth • Functions and movements of bones of axial and appendicular skeleton • Bone healing • Movements of joints • Alteration in disease • Applications and implications in nursing. 	Lecture, Discussion, Charts, Models, Demonstration	Short answers Very short answers
III	5	Describe the muscle movements and tone and demonstrate muscle contraction and tone	<p>Muscular system</p> <ul style="list-style-type: none"> • Stimulus and nerve – impulse – definition and mechanism • Membrane potentials • Neuromuscular transmission • Types of muscles • Skeletal muscle:- structure of sarcomere, muscle proteins(briefly), excitation-contraction coupling, physiology of skeletal muscle contraction(briefly), • Starlings law of skeletal muscle contraction • Smooth muscle:-physiology of smooth muscle contraction (briefly) • Cardiac muscle:- 	-Lecture, Discussion. -Explain using charts, models slides, specimen and films. - Demonstration of muscle movements, tone and contraction	Essay Short answers Very short answers

			<p>properties-excitability, rhythmicity, contractility, conductivity, refractory period</p> <ul style="list-style-type: none"> • Alteration in disease • Applications and implications in nursing. 		
IV	10	<p>Describe the physiology of nerve stimulus, reflexes, brain, cranial and spinal nerves.</p> <p>Demonstrate reflex action and stimulus</p>	<p>Nervous System</p> <ul style="list-style-type: none"> • Functions of Neuroglia, neurons, brain, spinal cord, cranial and spinal nerves • Cerebrospinal fluid-formation, composition, circulation, functions • Synapse-types, properties-one way conduction, synaptic delay, synaptic inhibition, convergence, divergence, fatigue • Neurotransmitters (mention the names) -acetylcholine, GABA, glycine, serotonin • Reflex arc, Reflex action and Reflexes-monosynaptic (stretch reflex) and polysynaptic reflex (withdrawal reflex) • Sensory system:-receptors-classification, receptor potential (briefly), sensory 	<p>Lecture, Discussion.</p> <p>Explain using charts, models slides, and Films.</p> <p>Demonstrate nerve stimulus, reflex action, reflexes</p>	<p>Essay</p> <p>Short answers</p> <p>Very short answers</p>

			<p>modalities (briefly), name all sensory pathways and sensations carried, sensory cortex.</p> <ul style="list-style-type: none"> - Spinothalamic pathway (in detail) • -Pain:- somatic, visceral and referred pain • Functions of thalamus and hypothalamus • Motor system-motor cortex-mention, descending tracts, pyramidal tracts in detail (diagram) • -Extrapyramidal tracts (briefly). • Functions of Cerebellum and basal ganglia • Muscle tone • Stages of sleep • EEG-waves and clinical significance. • Autonomic nervous system-organization and functions (briefly) • Alteration in disease • Applications and implications in nursing. 	
--	--	--	--	--

V	8	<p>Describe the Physiology and functions of blood.</p> <p>Demonstrate blood cell count, coagulation, grouping,</p>	<p>Physiology of Blood:-</p> <ul style="list-style-type: none"> • Functions, composition:- • Plasma, RBC, WBC, Platelets. • Plasmaprotein and functions • RBC- Structure,normal Count , functions • -ESR, PCV, osmotic fragility. • -Erythropoesis and factors affecting • -Haemoglobin-Structure, Normal value, functions, types • WBC-classification, morphology, functions of each cell, normal count. • -Immunity- definition, types- innate,acquired, mechanism, • -Immunoglobulins- types(briefly), functions • Platelets-Structure, normal count, functions. • -Haemostasis • vasoconstriction, platelet plug formation ,extrinsic and intrinsic mechanism, Clot retraction • -Tests- bleeding time, clotting time • Blood groups- ABO and Rh systems, landsteiners law-1&2, blood grouping, crossmatching,concept of universal donor and recipient, • Rh & ABO incompatibility • Lymph formation and functions • Alteration in disease • Applications and implications in nursing. 	<p>Lecture discussion</p> <p>Explain using Charts, films.</p> <p>Demonstration of Blood cell count, coagulation, grouping, Haemoglobin estimation,</p>	<p>Essay</p> <p>Short answers</p> <p>Very short answers</p>
---	---	--	--	--	---

VI	10	Describe the physiology of cardiovascular system. Demonstrate: BP and Pulse monitoring	<p>Cardiovascular system</p> <ul style="list-style-type: none"> • Conduction system of the heart-origin and spread of cardiac impulse. • ECG- normal ECG- P, Q, R, S, T waves, 12 leads, uses of ECG. • Cardiac cycle-definition, duration, phases, pressure changes in ventricles and aorta& normal values, volume changes. • JVP-normal waves • Heart sounds- 1st, 2nd, 3rd, 4th murmur- definition, Causes • Arterial pulse- definition, characters of normal pulse. • Cardiac output- definition; normal value; regulation- stroke volume & heart rate, factors influencing. • Haemodynamics- turbulent and laminar flow • Arterial blood pressure- definition, normal values, systolic BP, diastolic BP, mean arterial BP; pulse pressure; determinants/factors 	Lecture discussion Explain using charts. demonstrate : conduction System. Measurement of pulse, BP	Essay Short answers Very short answers
----	----	--	--	--	--

			<p>affecting BP-cardiac output, peripheral resistance, elasticity.</p> <ul style="list-style-type: none"> • variations – hypertension, hypotension. • Coronary circulation-functions and special features • Cerebral circulation (brief) • Alteration in disease • Applications and implications in nursing. 		
VII	8	<p>Describe the physiology and mechanisms of respiration. Demonstrate spirometry</p>	<p>The Respiratory System</p> <ul style="list-style-type: none"> • Functions- respiratory, non respiratory • Mechanics of ventilation – inspiration, expiration; muscles of respiration; intrapleural and intrapulmonary pressure changes. • surfactant- functions; Lung volumes and capacities- definition, normal values, spirogram • dead space- mention; • Alveolar ventilation and pulmonary ventilation. • Pulmonary diffusion • Transport of respiratory 	<p>Lecture, Discussion. Explain using Charts, films. Demonstration of spirometry</p>	<p>Essay</p> <p>Short answers</p> <p>Very short answers</p>

			<p>gases –</p> <ul style="list-style-type: none"> • O₂ transport; O₂ carrying capacity of haemoglobin, oxygen- haemoglobin dissociation curve- factors causing shift of ODC • CO₂ transport • -Exchange of respiratory gases at tissue level. • Regulation of respiration - Neural & chemical • Oxygen therapy • Oxygen toxicity • cyanosis- definition, types • Alteration in disease • Applications and implications in nursing. 		
VIII	7	Describes the physiology of digestive system.	<p>The Digestive System</p> <ul style="list-style-type: none"> • Salivary gland- types, composition and functions of saliva • Stomach- gastric juice- composition and functions, HCl secretion- mechanism, regulation of secretion, factors affecting secretion. • Pancreas- pancreatic juice- composition, functions and hormones regulating. • Liver and gall bladder- functions of liver and gall 	Lecture, Discussion. Explain using charts, Films	Essay Short answers Very short answers

			<p>bladder, composition and functions of bile enterohepatic circulation</p> <ul style="list-style-type: none"> • Small intestine- functions, composition and functions of intestinal juice, brush border enzymes. • Large intestine- functions, intestinal flora- functions, dietary fiber. • Movements of GIT- mastication (mention), deglutition- stages, gastric motility, peristalsis, movements of large intestine, movements of small intestine, defecation reflex (brief) • GI hormones- gastrin, secretin, CCK-PZ • Metabolism of CHO, Protein & fat. • Alteration in disease • Applications and implications in nursing. 		
IX	7	Describe the Physiology of excretory system	<p>Renal System</p> <ul style="list-style-type: none"> • Functions of kidneys, ureters, urinary bladder and urethra • Nephron- 	Lecture, discussion Explain using	Essay Short answers

			<p>structure, types, juxta glomerular apparatus</p> <ul style="list-style-type: none"> • Renal blood flow (brief) • Mechanism of urine formation • -Glomerular filtration - GFR definition, normal value, factors influencing • -Tubular reabsorption- Sodium, water, glucose, urea. • -Tubular secretion- H⁺, K⁺ - mention. • -acidification of urine • Renal clearance- definition • Renal threshold and transport maximum of glucose. • Urine concentrating mechanism of kidney- counter current mechanism- multiplier and exchangers (briefly). • Micturition- innervations of bladder, micturition reflex • Urine- normal output, constituents- normal and abnormal (albumin, glucose) Polyuria, oliguria, anuria (mention) 	charts, films	Very short answers
--	--	--	---	---------------	--------------------

			<ul style="list-style-type: none"> • Alteration in disease • Applications and implications in nursing. 		
X	2	Describe the physiology of skin	Skin and Temperature regulation <ul style="list-style-type: none"> • Functions of skin • Normal body temperature, measurement • Regulation of body temperature- role of skin and hypothalamus • Alteration in disease • Applications and implications in nursing. 	Lecture Discussion. Explain using Charts, films.	Short answers Very short answers
XI	5	Describe the physiology of sensory organs	Special Senses <ul style="list-style-type: none"> • Functional anatomy of Eye • -visual receptors- • functions of rods and cones • visual pathway • visual acuity- mention tests • -colour vision- receptor, • colour blindness(briefly) • Functional anatomy of ear, organ of corti • Mechanism of hearing • Pathway in brief • Hearing tests • Vestibular apparatus • olfaction- 	Lecture Discussion. Explain using Charts, films.	Essay Short answers Very short answers

			<ul style="list-style-type: none"> • receptors and pathway • Taste- receptors, primary taste sensations (pathways in comparison) • Alteration in disease • Applications and implications in nursing. 		
XII	5	Describe the physiology of endocrine glands.	<p>Endocrine System.</p> <ul style="list-style-type: none"> • Functions of endocrine glands • Hypothalamus:- • Endocrine functions, hypothalamo hypophyseal portal system, feedback loop • Pituitary Gland:- • -Hormones of anterior pituitary- Growth hormone-functions, other hormones-functions-(briefly) • -Role of releasing and inhibitory hormones of each gland-mention; • -Posterior pituitary-functions & physiological actions of ADH, • Oxytocin- Physiological actions and functions. • neuroendocrine reflex 	Lecture discussion Explain using Charts, films. Demonstration of BMR	Essay Short answers Very short answers

			<ul style="list-style-type: none"> • Thyroid gland- hormones and functions • Parathyroid gland- hormones influencing calcium homeostasis- parathyroid hormone, vitamin D, calcitonin; normal plasma calcium levels. • Parathyroid hormone- functions. • Endocrine pancreas -types of cells and hormones, • insulin-actions, glucagon-action • Adrenal glands- adrenal cortex-functional anatomy; hormones- glucocorticoids, mineralocorticoids, sex hormones and their actions; • Adrenal medulla- catecholamines- actions • Alteration in disease • Applications and implications in nursing. 		
XIII	4	Describe the physiology of male and female	Reproductive System. <ul style="list-style-type: none"> • Male reproductive system:- • -Functions of testes • -Functions of testosterone 	Lecture, discussion. Explain using	Essay Short answers

	reproductive system	<ul style="list-style-type: none"> • -Spermatogenesis and factors influencing it. • Female reproductive system:- - Oogenesis • -Functions of ovary • -Action of oestrogens and progesterone • Menstrual cycle; ovarian, uterine , cervical and vaginal changes during menstrual cycle • -Ovulation, tests of ovulation(Mention) • -Hormonal regulation of menstrual cycle • -menarche and menopause. • Pregnancy-fertilization, implantation,corpus luteum of pregnancy (brief); placenta-functions,tests for pregnancy-immunological test • Lactation- Functions of breast, hormones influencing lactation,review of neuroendocrine reflex. • Physiological principles underlying contraception • Alteration in disease • Applications and 	Charts, films, models, specimens.	Very short answers
--	---------------------	---	-----------------------------------	--------------------

			implications in nursing.		
XIV	2	Describe the physiology of Lymphatic and Immunological System.	Lymphatic and Immunological System. <ul style="list-style-type: none"> • Circulation of Lymph • Immunity • Formation of T-cells and B Cells. • Types of Immune response • Antigens • Cytokines • Antibodies 	Lecture, Discussion. Explain using Charts, films.	Short answers. Very short answers.

MICROBIOLOGY Course No.3

Placement - I year

Theory (In hours) -90

(Class hours-80+ Lab hours- 10)

Course Description:

This course is designed to enable students to acquire understanding of fundamentals of microbiology and identification of various micro organisms. It also provides opportunities for practicing infection control measures in hospital and community settings.

Unit	Time (Hrs.)	Learning Objectives	Content	Teaching Learning activities	Assessment Methods
I	6	Explain Concepts and principles of microbiology and their importance in nursing	Introduction <ul style="list-style-type: none"> • Historical perspective • Concepts and terminology • Principles of microbiology • Importance and relevance in nursing 	Lecture, discussion	Short answers Objective type
II	15	Describe the Structure, classification morphology and growth of bacteria Identify micro organism	General characteristics of microbes <ul style="list-style-type: none"> • Structure and classification of microbes • Morphological types • Size and form of bacteria • Motility • Colonization • Bacterial spores • Growth and nutrition of microbes • Temperature • Moisture • Blood and body fluids • Culture / transport medias • Laboratory methods of 	Lecture Discussion Demonstration Laboratory visits Staining practices	Short answers Objective type

			<p>identification of microorganism</p> <ul style="list-style-type: none"> • Staining techniques, gram staining, acid fast staining, hanging drop preparation 		
III	15	<p>Describe the methods of infection control</p> <p>Identify role of nurse in hospital infection control program</p>	<p>Infection Control</p> <ul style="list-style-type: none"> • Infection: source, portal of entry and exit, types of transmission • Asepsis- Types • Disinfection; types and methods • Sterilization types and methods • Chemotherapy and antibiotics • Antibiotic policy • Standard safety measures • Biomedical waste management • Role of nurse In Disinfection Sterilization Standard safety measures Biomedical waste management 	<p>Lecture Discussion Demonstration Visit to CSSD Clinical practice of aseptic techniques</p>	<p>Short answers</p> <p>Objective type</p>

			<ul style="list-style-type: none"> • Hospital acquired infection • Hospital infection control program • Hospital infection committee Protocols • Collection and transportation of samples • Preparation of reports and status of rate of infection in the units / hospital 		
IV	32	Describe different disease producing organisms	<p>Pathogenic organisms</p> <ul style="list-style-type: none"> • Microorganisms • Cocci – <ul style="list-style-type: none"> Gram positive <ul style="list-style-type: none"> - Staphylococci - Streptococci - Pneumococci Gram negative <ul style="list-style-type: none"> - Gonococci - Meningococci • Bacilli – <ul style="list-style-type: none"> Gram positive <ul style="list-style-type: none"> -Mycobacterium - tuberculosis / leprae / Atypical 	Lecture Discussion Laboratory visits Practical session	Essay Short answers Objective type

			<ul style="list-style-type: none"> - Corynebacterium diphtheria - Clostridium tetani, Botulinum & perfringens - Listeria, <p>Gram negative</p> <ul style="list-style-type: none"> - Shigella, - Proteus - Bordetella, - Campylobacter - Helicobacter - Enterobacteriae - Escherichia Coli - Klebsiella - Salmonella - Vibrio cholera - Pseudomonas - H Influenza - Spirochaete - Mycoplasma - Rickettsiae - Chlamydiae <p>• Viruses</p> <ul style="list-style-type: none"> - HIV - Hepatitis - Varicella zoster - Poliomyelitis - Measles - Mumps - Rubella 	
--	--	--	---	--

			<ul style="list-style-type: none"> - Rabies - Arbovirus - Dengue - Chikungunya - Japanese encephalitis - Influenza virus - Yellow fever - Oncogenic virus - Pox virus - • Fungi- <ul style="list-style-type: none"> - Superficial - Dermatophytosis, candidiasis, tinea versicolor - Deep mycoses - Mycosis- candida albicans, Cryptococcus • Parasites <ul style="list-style-type: none"> - Entamoeba histolytica, - Giardia, - Trichomonas, - malaria, - Filaria, - intestinal Nematodes, - tape worms infecting man - Secondary parasitic infections in AIDS - Nematodes • Rodents & vectors

NUTRITION ————— Course No.4

Placement :

I Year

Theory (In hours) -60

(Class hours-40+ Lab hours -20)

Course Description:

This course is designed to acquire knowledge of nutrition for maintenance of optimum health at different stages of life and its application for practice of nursing.

Unit	Time (Hrs)		Learning Objectives	Content	Teaching Learning activities	Assessment Methods
	T	P				
I	4		Describe the relationship between nutrition and health	Introduction : <ul style="list-style-type: none"> •Nutrition: History, concepts •Role of nutrition in maintaining health •Nutritional problems in India 	Lecture, discussion	Short answers Very sort answers

			<ul style="list-style-type: none"> •National nutrition policy •Factors affecting food and nutrition: socioeconomic, cultural, tradition, production, system of distribution, lifestyle and food habits etc. •Role of food and its medicinal value. •Classification of foods. •Food standards. •Elements of nutrition: macro and micro. •Calorie, BMR 		
II	2	Describe the classification, functions, sources and recommended daily allowances (RDA) of carbohydrates	<p>Carbohydrates</p> <ul style="list-style-type: none"> •Classification •Calorie value • Recommended Daily Allowances •dietary sources •Functions •Digestion, absorption and storage, metabolism of carbohydrates • Malnutrition : deficiencies and overconsumption 	Lecture, discussion	<p>Essay</p> <p>Short answers</p> <p>Very sort answers</p>

III	2		Describe the classification, functions, sources and recommended daily allowances (RDA) of Fats	Fats <ul style="list-style-type: none"> •Classification •Calorie value •Recommended Daily Allowances •Dietary sources •Functions •-Digestion, absorption and storage, metabolism •Malnutrition: deficiencies and overconsumption 	Lecture Discussion	Essay Short answers Very short answers
IV	2		Describe the classification, functions, sources and recommended daily allowances (RDA) of Proteins	Proteins <ul style="list-style-type: none"> •Classification •Calorie value •Recommended Daily Allowances •Dietary sources •Functions •-Digestion, absorption and storage, metabolism •Malnutrition: deficiencies and overconsumption 	Lecture Discussion	Essay Short answers Very short answers
V	3		Describe the daily calorie requirement for different categories of people.	Energy <ul style="list-style-type: none"> •Unit of energy-Kcal •Energy requirement of different categories of people. •Measurement of energy •Body Mass Index(BMI) and basic metabolism. •Basal Metabolic Rate(BMR) • Determination and factors affecting BMR 	Lecture, Discussion , Exercise demonstration.	Short answers Very short answers

VI	4		Describe the classification, functions, sources and recommended daily allowances (RDA) of Vitamins	Vitamins <ul style="list-style-type: none"> • Classification • Recommended Daily Allowances • Dietary sources • Functions • Absorption, synthesis, metabolism, storage and excretion • Deficiencies • Hypervitaminosis 	<ul style="list-style-type: none"> • Lecture, • Discussion. • 	Short answers Very short answers
VII	4		<ul style="list-style-type: none"> • Describe the • classification, functions, sources and recommended daily allowances (RDA) of Minerals 	Minerals <ul style="list-style-type: none"> • Classification • Recommended Daily Allowances • Dietary sources • Functions • Absorption, synthesis, metabolism, storage and excretion • Deficiencies- Overconsumption and toxicity 	Lecture Discussion	Short answers Very short answers
VIII	3		Describe the sources, functions and requirements of Water and Electrolytes	Water <ul style="list-style-type: none"> • Daily requirement • Regulation of water metabolism • Distribution of body water • Electrolytes 	Lecture Discussion	Short answers Very short answers

				<ul style="list-style-type: none"> • Types, sources, composition of body fluids • Maintenance of fluid - electrolyte balance • Over hydration, dehydration and water intoxication • Electrolyte imbalances. 		
IX	5	15	<p>-Describe the cookery rules and preservation of nutrients</p> <p>-Prepare and serve simple beverages and different types of foods</p>	<p>Cookery rules and preservation of nutrients</p> <ul style="list-style-type: none"> • Principles, methods of cooking and serving • Preservation of nutrients • Safe food handling-toxicity • Storage of food • Food preservation, food additives and its principles • Prevention of Food Adulteration Act (PFA) • Food standards • Preparation of simple beverages and different types of foods 	<p>Lecture</p> <p>Discussion</p> <p>Demonstration</p> <p>Practice session</p>	<p>Short answers</p> <p>Very short answers</p>
X	7	5	Describe and plan balanced diet for	<p>Balanced diet</p> <ul style="list-style-type: none"> • Elements • Food groups 	<p>Lecture</p> <p>Discussion</p>	Short answers

		different categories of people	<ul style="list-style-type: none"> • Recommended Daily Allowance • Nutritive value of foods • Calculation of balanced diet for different categories of people • Planning of menu • Budgeting of food • Introduction to therapeutic diets: • Naturopathy-diet 	<p>Demonstration</p> <p>Practice session</p> <p>Meal planning</p>	<p>Very short answers</p> <p>Exercise on meal planning</p>
XI	4	<p>-Describe various National Programmes related to nutrition</p> <p>-Describe the role of nurse in assessment of nutritional status and nutrition education</p>	<p>Role of nurse in nutritional programmes</p> <ul style="list-style-type: none"> • National programme related to nutrition: • Vitamin A prophylaxis programme • National Iodine Deficiency Disorders(IDD) Programme • Mid-day- meal programme • Integrated child development scheme (ICDS) • National and International agencies working towards food/ 	<p>Lecture</p> <p>Discussion</p> <p>Demonstration of assessment of nutritional status</p>	<p>Short answers</p> <p>Very short answers</p>

				nutrition-NIPCCD, CARE, FAO, NIN, CFTRI(Central Food Technology and Research Institute). <ul style="list-style-type: none"> • Assessment of nutritional status • Nutrition education- role of the nurse

BIOCHEMISTRY — **CourseNo.5**

Placement-I Year

Theory (Hrs) - 40

Course Description:

The course is designed to assist the students to acquire knowledge of the normal biochemical composition and functioning of human body and understand the alterations in biochemistry in diseases for practice of nursing.

Unit	Time (Hrs.)	Learning Objectives	Content	Teaching Learning activities	Assessment Methods
I	4	Describe the structure, composition and function of cell Differentiate between Prokaryotic and Eukaryotic cell Describe the transport mechanisms	Introduction <ul style="list-style-type: none"> • Definition and significance in nursing • Cell biology • Difference between Prokaryote and Eukaryote cell • Review of structure and function of cell and sub cellular particles. • Cell membrane-structure and function • Transport mechanisms: passive and active transport 	Lecture, discussion using charts and slides	Short answers Very short answers
II	7	Describe the metabolism of carbohydrates	Metabolism of carbohydrates <ul style="list-style-type: none"> • Classification, Biological importance of carbohydrates • Monosaccharide's: glucose & fructose. • Disaccharides :lactose & sucrose, lactose intolerance. • Polysaccharides. • Digestion and absorption of carbohydrates 	Lecture, discussion using charts and slides. Demonstration of laboratory tests.	Essay Short answers Very short answers

			<ul style="list-style-type: none"> • Regulation of blood glucose • Diabetes mellitus- classification, biochemical derangement, clinical features, investigation , complications • Oral glucose tolerance test • Investigations and their interpretations. 		
III	6	Explain the metabolism of Lipids	<p>Metabolism of Lipids</p> <ul style="list-style-type: none"> • Classification of lipids, chemistry of fatty acids, unsaturated fatty acids(essential fatty acids), significance of PUFA • Chemistry of Triacyl glycerol, cholesterol and phospholipids. • Digestion and absorption of lipids • Lipoprotein ,chylomicron, LDLs, VLDLs and HDL(briefly) • Lipid profile, bile salts • Atherosclerosis • Formation and utilization 	<p>Lecture, discussion.</p> <p>Explain using charts, models slides.</p> <p>Demonstration of laboratory tests.</p>	<p>Essay</p> <p>Short answers</p> <p>Very short answers</p>

			<p>of ketone bodies, ketoacidosis in diabetes and starvation</p> <ul style="list-style-type: none"> • Investigations and their interpretations. 		
IV	6	<p>Explain the metabolism of Aminoacids and Proteins.</p>	<p>Metabolism of Amino acids and Proteins</p> <ul style="list-style-type: none"> • Classification of Amino acids-based on structure, nutritional status and metabolic rate • Describe digestion and absorption of proteins • Formation and disposal of Ammonia • Plasma proteins, serum levels, functions of albumin, hypo protinaemia • Metabolism of amino acids and proteins • Protein synthesis • Targeting and glycosylation • Chromatography • Electrophoresis • Sequencing • Metabolism of nitrogen • -Fixation and assimilation • -Urea cycle • -Haemes and chlorophylls • Investigations and their interpretations 	<p>Lecture, discussion.</p> <p>Explain using charts, models slides.</p> <p>Demonstration of laboratory tests.</p>	<p>Essay</p> <p>Short answers</p> <p>Very short answers</p>

V	2	Explain clinical enzymology	Clinical Enzymology <ul style="list-style-type: none"> • Clinical Enzymology • Investigations and their interpretations 	Lecture, discussion. Explain using charts, models slides.	Essay Short answers Very short answers
VI	5	Explain the types, functions, sources and deficiency manifestations of vitamins and minerals	Vitamins and minerals <ul style="list-style-type: none"> • Dietary sources, biochemical functions and deficiency manifestations of fat soluble vitamins • Dietary sources, biochemical functions and deficiency manifestations of water soluble vitamins • Minerals -dietary sources, functional importance and altered levels of iron and calcium • Dietary sources, functional importance and altered levels of copper, fluorine, sodium and potassium • Investigations and their interpretations 	Lecture, discussion. Explain using charts, models slides	Essay Short answers Very short answers
VII	2	Explain Acid Base balance	Acid Base balance <ul style="list-style-type: none"> • PH, buffers and Acid Base disorders • Investigations and their interpretations 	Lecture, Discussion. Explain using charts, models slides	Short answers Very short answers

VIII	4	Explain different function tests	Function Tests <ul style="list-style-type: none"> • LFT(briefly describe the important tests) • RFT-Urea , S. Creatinine, urine examination. (briefly describe the important tests) 	Lecture, discussion. Explain using charts, models slides	Short answers Very short answers
IX	2	Describe the metabolism of Haemoglobin	Haemoglobin <ul style="list-style-type: none"> • Catabolism of haemoglobin • Biochemical basis of jaundice. 	Lecture, discussion. Explain using charts, models slides	Short answers Very short answers
X	2	Describe the immunochemistry	Immunochemistry <ul style="list-style-type: none"> • Structure and functions of immunoglobulin • Immune Response • Mechanism of antibody production • Antigens- HLA Typing • Free radicals and antioxidants • Electrophoretic and quantitative determination of immunoglobulins-ELISA • Investigations and their interpretations. 	Lecture, discussion. Explain using charts, models slides	Short answers Very short answers

PSYCHOLOGY Course No.6

Placement –I Year

Theory (In hours) -60

Course Description:

This course is designed to assist the students to acquire knowledge of fundamentals of psychology and develop an insight into behavior of self and others.

Further it is aimed at helping them to practice the principles of mental hygiene for promoting mental health in nursing practice.

Unit	Time (Hrs)	Learning Objectives	Content	Teaching Learning activities	Assessment Methods
I	3	Describe the history, scope and methods of psychology	Introduction: <ul style="list-style-type: none"> • History of psychology. • Definitions & Scope of Psychology • Branches of psychology • Methods of Psychology • Relevance of psychology in nursing. 	Lecture, discussion	Short answers Very short answers
II	6	Explain the biology of - Human behavior	Biology of behavior <ul style="list-style-type: none"> • Body mind relationship • Heredity and environment. • Brain and behavior: Nervous 	Lecture, discussion	Essay Short answers

			<p>System, Neurons and synapse.</p> <ul style="list-style-type: none"> • Association Cortex, Rt. and Lt.Hemispheres. • Psychology of Sensations. • Muscular and glandular controls of behavior. • Nature of behavior of an Organism/Integrated responses 		Very short answers
III	20	Describe various cognitive processes and their applications	<p>Cognitive processes</p> <ul style="list-style-type: none"> • Attention:- <ul style="list-style-type: none"> - Definition -Types -determinants -Span of attention - Shifting of attention - Distraction. • Perception: - <ul style="list-style-type: none"> - Definition -Principles -Factors - Errors in perception. • Learning: - <ul style="list-style-type: none"> -Nature -Types - Factors - Laws -Theories of learning 	<p>Lecture</p> <p>Discussion</p> <p>Psychometric assessment- Practice Sessions</p>	<p>Essay</p> <p>Short answers</p> <p>Very short answers</p>

			<p>Trial and error</p> <p>Classical conditioning</p> <p>Gestalt Theory</p> <p>Operant Conditioning</p> <p>Cognitive Theory</p> <p>Transfer of Learning</p> <p>- Study habits</p> <p>• Memory: -</p> <p>-Definition</p> <p>-Types</p> <p>-Factors</p> <p>-Methods of memorizing</p> <p>- Theories of Memory</p> <p>-Information Processing</p> <p>- Theory of general memory</p> <p>• Forgetting:-</p> <p>-Definition</p> <p>-Types</p> <p>-Factors</p> <p>-Theories of forgetting</p> <p>-Decay Theory</p> <p>-Interference Theory</p> <p>-Repression Theory</p> <p>-Storage failure</p> <p>• Thinking:-</p> <p>-Types</p> <p>-Levels</p> <p>-Stages of Development</p> <p>- Relationship with language and</p>

MEDICAL SURGICAL NURSING (ADULT including GERIATRICS) –I

MEDICAL NURSING — Course No. 10

Placement: II Year

Theory- 110 Hrs

Nursing faculty-90hrs

External faculty-20hrs

Practical: 440 hrs

Course Description:

The purpose of this course is to enable students to identify the etiology, pathophysiology, symptomatology, diagnostic measures and management (medical, nursing and dietetic) of common medical, communicable and dermatological diseases and to develop proficiency in caring for patients with these diseases.

Unit	Time	Learning objectives	Content	Teaching learning activities	Assessment methods
I	5 (NF-4 EF-1)	<p>Appreciate the trends in medicine and medical nursing</p> <p>Describe the role of a nurse in caring patients with medical dermatologic and communicable diseases.</p> <p>Describe the common signs, symptoms and problems and their specific nursing interventions</p>	<p>Introduction</p> <ul style="list-style-type: none"> • - Evolution and trends of medicine • - Review concepts of health and illness, • - concepts of disease causation • - International classification of diseases (ICD-10 or later version) • - Acute illness, chronic illness, terminal illness • - Stages of illness. • - Review concepts of comprehensive nursing care. • - Review of nursing process • - Evolution and trends in medical nursing • - Role and responsibilities of nurse in medical wards 	<p>Lecture</p> <p>Discussion</p> <p>Assignments</p>	<p>Short - answers</p> <p>Very short answers</p>
II	7 NF-6 EF-1	<p>Describe the common signs, symptoms and problems and</p>	<p>Common signs& symptoms and its management.</p> <ul style="list-style-type: none"> • - Fluid and electrolyte imbalances • - Acid base imbalances • Oedema, Pain, Dyspnoea 	<p>Lecture</p> <p>Discussion</p> <p>Demonstration</p>	<p>Short - answers</p> <p>Very short</p>

		their specific nursing interventions	and cough, Unconsciousness, Syncope, Fever and hyperthermia.		answers
III	12 NF-10 EF-2	Explain the etiology, Patho physiology, Clinical manifestations diagnostic measures and management of patients with disorders of respiratory system.	<p>Nursing management of patients with respiratory problems.</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of respiratory system. • -Assessment of respiratory system - nursing history and physical examination • -Diagnostic measures and related nursing care – • sputum examination, X-ray, pulmonary function test, allergic tests, mantoux test • thoracentesis, bronchoscopy, pulse oximetry, ventilation perfusion scan • - Etiology, pathophysiology, clinical manifestations, complications, diagnosis, • medical, dietetic and nursing management of patients with the following diseases <ul style="list-style-type: none"> - Lower respiratory infections, COPD, Bronchial asthma, Bronchiectasis, 	Lecture Discussion Demonstration Observation visit supervised clinical practice Drug book Presentations Lab practice Health education	Essay Short - answers Very short answers

			<p>Bronchitis, Atelectasis, Pneumonia, Pulmonary tuberculosis, Pleurisy, Pleural effusion, Pulmonary hypertension, Pulmonary oedema, Pulmonary embolism</p> <ul style="list-style-type: none"> • -special therapies: <ul style="list-style-type: none"> -Chest physiotherapy, - incentive spirometry • -Rehabilitation • - Review drugs used in the treatment of respiratory disorders. 		
IV	18 NF-15, EF-3	<p>Explain the etiology pathophysiology clinical manifestations diagnostic measures & management of patients with disorders of cardiovascular & hematologic system.</p>	<p>Nursing management of patients with Cardiovascular and hematological diseases._</p> <ul style="list-style-type: none"> • - Review anatomy and physiology of cardiovascular system. • -Nursing assessment and physical examination • - Diagnostic measures and related nursing care : • - complete blood count, ECG, echocardiogram, cardiac catheterization, cardiac enzymes, nuclear, imaging, TMT, coronary angiography, CVP, Doppler 	<p>Lecture Discussion Demonstration observation supervised clinical practice Drug book Presentations Lab practice Health education</p>	<p>Essay Short - answers Very short answers</p>

			<p>studies, plethysmography, arteriography, bone marrow analysis.</p> <ul style="list-style-type: none"> • - Etiology, pathophysiology, symptomatology, diagnosis, medical, dietetic and nursing management of patients with the following conditions: <ul style="list-style-type: none"> - Atherosclerosis, Coronary Artery Diseases -Myocardial infarction, Angina pectoris - Hypotension, Hypertension - Endocarditis, Pericarditis, Myocarditis - Rheumatic Heart Disease - CCF , Cor Pulmonale, Pulmonary oedema - Cardiogenic shock - CPR • Haematology <ul style="list-style-type: none"> - Anaemia - Iron deficiency anaemia, Haemolytic anaemia, Megaloblastic anaemia, Thalassemia Sickle cell disease, Aplastic anemia, Polycythemia -Bleeding disorders :- - Disseminated intravascular coagulation, Hemophilia, Thrombocytopenia 	
--	--	--	--	--

			<ul style="list-style-type: none"> - Leukemia, Leukopaenia, Lymphoma, Agranulocytosis, Myeloma • -Bone marrow/ stem cell transplantation • -Blood transfusion - safety checks, procedure and requirements, management of adverse reactions, recording. - Management and counselling of blood donors, -phlebotomy and post donation management, blood bank functioning and hospital transfusion committee - Biosafety and waste management in relation to blood transfusion • - Review drugs used in the treatment of cardiovascular and haematologic disorders. 		
V	10 NF-8, EF-2	Describe the etiology, patho-physiology, clinical manifestations, diagnostic	Nursing management of patients with disorders of digestive system <ul style="list-style-type: none"> • - Review anatomy and physiology of digestive system. 	Lecture Discussion Demonstration observation n visit	Essay Short - answers Very

	measures and management of patient with disorders of digestive system	<ul style="list-style-type: none"> • - Nursing assessment- history and physical examination, nutritional assessment. • - Diagnostic measures and related nurses role - endoscopy, LFT, barium meal, barium enema, ultrasonography, gastric analysis, liver biopsy, endoscopic retrograde Cholangio pancreatography, blood studies. • - Etiology, pathophysiology, symptomatology, diagnosis, medical, dietetic and nursing management of patients with the following conditions: <ul style="list-style-type: none"> - disorders of oral cavity. - Oesophagitis, GERD - Irritable bowel syndrome, -Hepatitis, Cirrhosis of liver, Portal hypertension, -Hepatic failure and hepatic coma, -Metabolic syndrome, Obesity, • - Review drugs used in the treatment of gastrointestinal disorders. 	supervised clinical practice Drug book Presentations Lab practice Health education	short answers

MEDICAL NURSING - PRACTICAL

Practical: 440 Hrs (11 Wks)

Area	Duration (in weeks)	Objectives	Skills	Assignments	Assessment methods
General Medical Ward (respiratory, gastroenterology, renal, hematology, neurology, endocrine)	6 (1 week night duty)	Provide nursing care to clients with medical disorders -Counsel and educate patients and families	Assessment of the patient -Taking history -Perform physical examination -Identify alteration and deviations -Practice medical and surgical asepsis and standard safety measures -Administer medications oral, IV, IM, subcutaneous and intradermal -IV therapy -IV cannulation	-Plan and provide care to 3-4 assigned patients -Nursing care plan -2 -Nursing care study and presentation -1 -Drug book -Drug presentation -Clinical presentation	-Assess performance with rating scale. -Assess skill with check list - Evaluation of care study, presentation - Completion of activity

			<ul style="list-style-type: none"> -maintenance and monitoring I/O Chart. -oxygen therapy by different methods -Nebulization -Chest physiotherapy -Nasogastric feeding -Assist in common diagnostic procedures -Assist in common therapeutic procedures -Blood and component therapy -Throat suctioning -Collect specimens for common investigations -Maintain elimination <ul style="list-style-type: none"> - bladder catheterization -Bowel wash -enema -maintain continuous bladder drainage -Teaching related to specific disease conditions and procedures 	<ul style="list-style-type: none"> record -OSCE
--	--	--	---	---

Cardiology Ward	1	<ul style="list-style-type: none"> -Provide nursing care to clients with cardiac medical disorders -Counsel and educate patients and families 	<ul style="list-style-type: none"> -Physical examination of cardiovascular system -recording ECG -Assisting in diagnostic and therapeutic procedures- -Administer cardiac drugs - cardiopulmonary resuscitation -Teach patients and families -Practice medical and surgical asepsis and standard safety measures 	<ul style="list-style-type: none"> -Plan and provide care to 3-4 assigned patients -Nursing care plan -1 -Drug book -Drug presentation -Teaching patients and families 	<ul style="list-style-type: none"> Assess performance with rating scale. -Assess skill with check list Evaluation of case study, presentation Completion of activity record
Dermatology and Communicable disease ward	2	<ul style="list-style-type: none"> -Identify common skin problems and communicable diseases -Provide nursing care to clients with skin disorders and communicable diseases -Counsel and educate 	<ul style="list-style-type: none"> -Assessment of patients with skin disorders and communicable diseases -practice barrier nursing and isolation techniques – Assist in diagnostic / therapeutic procedures 	<ul style="list-style-type: none"> -Plan and provide care to 3-4 assigned patients -Health talk - Drug book -Case presentation 	<ul style="list-style-type: none"> Assess performance with rating scale. -Assess skill with check list Evaluation of case presentation , health talk Completion of activity record

		patients and families			
Casualty emergency Department	1	Provide emergency care to patients with various medical emergencies	-Emergency assessment of patients with medical emergencies -Assist in diagnostic and therapeutic procedures- - Counsel and educate patients and families	Report of activities	Assess performance with rating scale. -Assess skill with check list Evaluation of reports Completion of activity record
Medical ICU	1	Provide care to patients with critical medical illnesses	-Assessment of seriously ill patients - Monitor the patients conditions with continuous monitoring equipments - Assist with diagnostic and therapeutic procedures - Technical skill in using various equipments - Use flow sheets for recording	- Provide care to 1-2 assigned patients -Nursing care plan-1 -Drug book	Assess performance with rating scale. -Assess skill with check list Evaluation of care plan Completion of activity record

MEDICAL SURGICAL NURSING (ADULT including GERIATRICS) –I

SURGICAL NURSING Course No. 12

Placement: II Year

Theory - 110hrs

Nursing faculty- 75 hrs + External faculty- 35hrs

Practical: 520 hrs

Course description:

This course is designed to enable the students to recognize the etiology, pathophysiology, clinical manifestations, diagnosis and management of patients with common surgical conditions and provide comprehensive nursing care based on nursing process during the pre operative, intra operative, and post operative period.

Unit	Time (Hrs)	Objectives	Content	Teaching Learning Activities	Evaluation
I	6 NF-4 EF-2 (surge on)	-Describe the concepts of surgical nursing. - Identify the current trends in surgery and surgical nursing. -	Surgery & surgical nursing. <ul style="list-style-type: none"> • -History & trends in surgery & surgical nursing. • -Wound- types, wound healing,. • -Inflammation, abscess, • -Wound infection, surgical dressing. • -Role of nurse in the care 	Lecture Discussion Demonstration Supervised clinical practice	Short answers Very short answers

		Identify the role of nurses in the management of a patient undergoing surgery.	of patients undergoing surgery–pre operative, intra operative, immediate and late post operative period. <ul style="list-style-type: none"> • -Haemorrhage, shock 		
II	20 NF-15 EF-5 (Anaesthetic)	-Describe the organization and physical set up of Operation Theatre, -Identify the instruments and equipments used for common surgical procedures -Describe the perioperative nursing care - Describe the infection control measures in the operation theatre - Describe the	Operating Room Technique <ul style="list-style-type: none"> • -Organization and physical set up of operation theatre, OT design, OT team, Duties and responsibilities of nurse in OT, OT dress code, principles of operation theatre technique, OT Table, • Suture materials, equipments in OT, Instruments for common surgical procedures. • -Positions and draping for common surgical procedures, scrubbing, gowning, gloving. • -Preparation of instrument trolley for major & minor surgeries. • -Maintenance of therapeutic environment 	Lecture Discussion Demonstration Supervised clinical practice	Short answers Very short answers

		care of patients undergoing anesthesia	<p>in OT.</p> <ul style="list-style-type: none"> • -Monitoring patients during surgical procedures. • -Infection control in OT, Standard precautions, disinfection, sterilization, fumigation of OT, biomedical waste management in OT, • -Prevention of accidents and hazards in OT • - Anesthesia: <ul style="list-style-type: none"> -types of anesthesia, anesthetic agents, methods of administration, equipments, stages of anesthesia, -Pre anesthetic check up, Premedication, management of patients before , during & after anesthesia. -Complications of anesthesia. 		
III	18 NF-12 EF- 6(surgeon)	Describe the pre and post operative management of patients undergoing	<p>Nursing management of patients undergoing Gastrointestinal surgeries</p> <ul style="list-style-type: none"> • -Etiology, pathophysiology, clinical manifestations, diagnosis, surgical & 	Lecture, Discussion, Demonstration	Essay Short answers Very

		Gastrointestinal surgeries	<p>nursing management of patients with disorders of :</p> <ul style="list-style-type: none"> - Oral cavity: Inflammation, Infection, pre malignant & malignant lesions of oral cavity • -Oesophagus : Inflammation, Stricture , obstruction, bleeding, carcinoma of oesophagus • -Stomach & duodenum : -- Pyloric stenosis, tumours, bleeding, Carcinoma stomach, hiatus hernia. • -Small and large intestine: inflammation, infection, enteritis, obstruction, tumour, perforation. Inflammatory bowel disease, intestinal obstruction, acute abdomen - Hernia, • -Appendix: Appendicitis • -Rectum and Anal canal: Haemorrhoids, Anal fissure, Fistula, Carcinoma rectum, Pilonidal cyst. • -Gall bladder: inflammation, infection, tumours. 	Supervised clinical practice	short answers

SURGICAL NURSING -PRACTICAL

Total – 520 hours (13 weeks)

Area	Durati on (in week)	Objectives	Skills	Assign ments	Assessment methods
Surgical Ward & Burns unit	4 (1 week night duty)	Provide pre & post operative care to patients undergoing Surgeries Provide comprehensive care to patients with burns	-Preoperative preparation of patients, receiving patients after surgery, monitoring of patients after surgery, care of wounds & drains, suture removal -Chest physiotherapy, -Ambulation and exercise after surgery, - Care of inter costal drainage, -provide comprehensive care to patients after surgery, -Management of patients with burns - Health education at the time of discharge after surgery.	- Preopera tive work up of two patients, -care plan - 2 -care study-1 -Night report	-Assess performance using rating scale -Assess skill with check list -Evaluation of care study, care plan , presentation -Completion of activity record -OSCE
Surgical ICU	1	Provide comprehensive care to patients in the immediate	-Haemodynamic monitoring of patients after surgery, monitor for bleeding and other complications, maintain fluid	-Plan and provide care to 1-2 assigned patients	Assess performance using rating scale -Assess skill with check list

		<p>post operative period</p> <p>-Detect & manage complications after surgery</p>	<p>&electrolyte balance after surgery,</p> <p>-Deep breathing & coughing exercise,</p> <p>-Chest physiotherapy,</p> <p>-Endotracheal and oral suctioning.</p>	<p>-Care plan-1</p> <p>-Drug book</p> <p>-Report of special procedures</p>	<p>-Evaluation of careplan ,</p> <p>report of special procedures</p> <p>-Completion of activity records</p>
Operation Theatre	4	<p>Identify instruments used in common surgeries ,</p> <p>Participates in infection control practices in Operation theatre,</p> <p>Sets up instrument trolley for common surgical procedures</p> <p>Assist in Surgeries,</p> <p>Provide peri operative Nursing care.</p>	<p>-Scrubbing, gowning, gloving, carbolization, disinfection, fumigation,</p> <p>-Setting up of instrument trolley for common surgical procedures,</p> <p>-Sterilization of instruments, --</p> <p>-Positioning and draping of patients for various surgeries,</p> <p>-Assisting in giving Anesthesia,</p> <p>-Assist with major &minor surgeries,</p> <p>Practice surgical aseptic techniques</p> <p>Handling specimens.</p>	<p>Assist as a circulatory nurse, Assist as a scrub nurse in major surgeries -8 minor surgeries -10,</p> <p>Maintain Daily Report. Prepare check list for practicing surgical asepsis in operation Theatre.</p>	<p>-Assess performance using rating scale</p> <p>-Assess skill with check list</p> <p>-Completion of activity record</p>

Orthopaedic Ward & OP	2	Provide comprehensive nursing care to patients with musculoskeletal disorders.	-Assess patients with musculoskeletal disorders, assist- in application of plaster cast, skin traction & skeletal traction, - ROM exercises, -provide comprehensive care(pre & post operative) to patients with musculoskeletal disorders.	-Plan and provide care to assigned patients -Care plan -1 -Report of plaster cast application, traction. -case study/ presentation	-Asses performance using rating scale -Assess skill with check list -Evaluation of careplan , presentation, report of special procedures -Completion of activity record
ENT wd & OP	1	Provide comprehensive care to patients with ENT disorders.	Assess patients with ENT disorders, Assist with diagnostic & therapeutic procedures, instill ear drops, perform tracheostomy care & suctioning, Provide comprehensive care(pre & post operative) to patients with ENT disorders.	-Plan and provide care to assigned patients - Observati on report -Drug file	-Asses performance using rating scale -Assess skill with check list -Evaluation of report of special procedures -Completion of activity record
Ophthalmology Ward,	1	Provide care to patients with Eye	Assess patients with disorders of eye, assist diagnostic &	-Plan and provide care to assigned	Asses performance using rating

OP, OT		Disorders	therapeutic procedures, instill eye drops, apply eye bandage, provide pre & post operative care to patients with eye disorders, health education to patients after eye surgery .	patients Observati on report- OPD, OT, Eye bank -Drug file -Provide health educatio n to patients with eye surgery, Observati on report, -Drug file	scale -Assess skill with check list -Evaluation of health talk, report of special procedures -Completion of activity record
--------	--	-----------	--	---	--

DETAILS OF PRACTICAL RECORD

Nursing Care study - 1

Pre operative preparation of selected surgical cases - 2

Nursing Care plan – 4

(surgical Ward – 2, surgical ICU – 1, Orthopaedic ward – 1)

Instrument sets : major surgeries assisted – 2

Instrument sets of a minor surgeries assisted - 2

List of surgeries assisted with details of patients :

(Major surgeries -5, Minor surgeries- 5)

PHARMACOLOGY — Course No. 13

Placement: II year

Theory – 60 hours.

Course Description:

This course is designed to enable students to acquire understanding of pharmacodynamics, pharmacokinetics, principles of therapeutics and nursing implications.

Unit	Time (hours)	Learning objectives	Content	Teaching learning activities	Assessment method
I	5	Describe pharmacodynamics, pharmacokinetics, classification and the principles of drug administration	<p>Introduction to Pharmacology</p> <ul style="list-style-type: none"> -Definitions -Sources -Terminology used -Types: Classification • -Pharmacodynamics: <ul style="list-style-type: none"> Actions: therapeutic, adverse, toxic • -Pharmacokinetics: <ul style="list-style-type: none"> absorption, distribution, metabolism, interaction, excretion. • - Review : routes and principles of administration of drugs • - Indian Pharmacopoeia: <ul style="list-style-type: none"> Legal issues • - Rational use of drugs • - Principles of therapeutics. 	Lecture Discussion	Short answers Very short answers
II	10	Explain chemotherapy of specific infections and infestations and nurse's responsibilities	<p>Chemotherapy</p> <ul style="list-style-type: none"> • - Pharmacology of commonly used antibiotics. <ul style="list-style-type: none"> -Pencillin - Cephalosporins - Aminoglycosides - Macrolide & 	Lecture Discussion	Essay Short answers Very short answers

			<p>broad spectrum antibiotics</p> <ul style="list-style-type: none"> - Sulfonamides - Quinolones - Antiamoebic - Antimalarials - Anthelmintic - Antiscabies agents - Antiviral & anti fungal agents - Antitubercular drugs - Anti leprosy drugs • -Anticancer drugs • - Immuno suppressants • Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity • role of nurse. 		
III	2	Describe antiseptics, disinfectants, insecticides and nurse's responsibilities	<p>Pharmacology of commonly used antiseptics, disinfectants and insecticides</p> <ul style="list-style-type: none"> • - Antiseptics • - Disinfectants • - insecticides • Composition, action, dosage, route, 	Lecture Discussion	<p>Essay</p> <p>Short answers</p> <p>Very short answers</p>

			indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse.		
IV	4	Describe drugs acting on Gastro intestinal system and nurse's responsibilities	<p>Drugs acting on G.I.System</p> <ul style="list-style-type: none"> • - Pharmacology of commonly used - <ul style="list-style-type: none"> • Antiemetics, • Emetics • Purgatives • Antacids • Cholinergic • Anticholinergics • Fluid and electrolyte therapy • Anti diarrhoeals • Histamines • Composition, action, dosage, route, indications, contraindications, drug Interactions, side effects, adverse effects, toxicity and role of nurse. 	Lecture Discussion	Essay Short answers Very short answers
V	3	Describe drugs used on Respiratory system and	<p>Drugs used on Respiratory System</p> <ul style="list-style-type: none"> • Pharmacology of commonly used drugs 	Lecture Discussion	Essay Short answers

		nurse's responsibilities	<ul style="list-style-type: none"> • Anti asthmatics • Mucolytics • Decongestants • Expectorants • Antitussives • Bronchodilators • Broncho constrictors • Antihistamines • Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse. 		Very short answers
VI	2	Describe drugs used on Urinary system and nurse's responsibilities	<p>Drugs used on Urinary system</p> <ul style="list-style-type: none"> • Pharmacology of commonly used. • Diuretics and antidiuretics • Urinary antiseptics • Cholinergic and anti cholinergics • Acidifiers and alkalanizers • Composition, action, dosage , route, indications, contraindications, drug 	Lecture Discussion	Essay Short answers Very short answers

			Interactions, side effects, adverse effects, toxicity and role of nurse.		
VII	4	Describe Drugs used in de-addiction, emergency, deficiency of vitamins & minerals, poisoning, immunization and immuno-suppression and nurse's responsibilities	Miscellaneous Drugs <ul style="list-style-type: none"> • Drugs used in de-addiction • Drugs used in CPR and emergency • Vitamins and minerals • Immunosuppressants • Antidotes • Antivenom • Vaccines and sera 	Lecture Discussion	Essay Short answers Very short answers
VIII	2	Describe drugs used on skin & mucous membranes and nurse's responsibilities	Drugs used on skin and mucous membranes <ul style="list-style-type: none"> • - Topical applications for skin, eye, ear, nose and buccal cavity • Antipruritics • Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse. 	Lecture Discussion	Essay Short answers Very short answers

IX	10	Describe drugs used on Nervous system and role of nurse.	Drugs acting on Nervous system <ul style="list-style-type: none"> • Basic & Applied pharmacology of commonly used: <ul style="list-style-type: none"> • Analgesics and Anaesthetics • Analgesics • Non steroidal anti inflammatory (NSAID) drugs • Antipyretics • Hypnotics and Sedatives • Opioids • Non-Opioids • Tranquilizers • General & local anesthetics - Gases: oxygen, nitrous oxide, carbon-dioxide • Cholinergic and anti-cholinergics: <ul style="list-style-type: none"> - Muscle relaxants - Major tranquilizers - Anti-psychotics - Antidepressants - Anticonvulsants - Adrenergics - Noradrenics' - Mood stabilizers 	Lecture Discussion	Essay Short answers Very short answers
----	----	--	---	-----------------------	--

			<ul style="list-style-type: none"> - Acetylcholine - Stimulants • Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse. 		
X	6	Describe drugs used on Cardiovascular system and nurse's responsibilities	<p>Cardiovascular drugs</p> <ul style="list-style-type: none"> • Haematinics • Cardiotonics • Anti anginals • Anti-hypertensives & Vasodilators • Anti-arrhythmics • Plasma expanders • Coagulants & anticoagulants • Antiplatelets & thrombolytics • Hypolipidemics • Composition, action, dosage , route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse. 	Lecture Discussion	<p>Essay</p> <p>Short answers</p> <p>Very short answers</p>

<p>XI</p>	<p>6</p>	<p>Describe drugs used for hormonal disorders and supplementation and medical termination of pregnancy and nurse's responsibilities</p>	<p>Drugs used for hormonal disorders/supplementation and medical termination of pregnancy</p> <ul style="list-style-type: none"> • Insulins & oral hypoglycemics • Thyroid supplements and suppressants • Steroids, Anabolics • Uterine stimulants and relaxants • Oral contraceptives • Other estrogen-progestrone preparations • Corticotrophine & Gonadotropines • Adrenaline • Prostaglandins • Calcitonins • Calcium salts. • Calcium regulators • Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse. 	<p>Lecture Discussion</p>	<p>Essay Short answers Very short answers</p>
-----------	----------	---	---	-------------------------------	---

XII	6	Demonstrate awareness of the common drugs used in alternative system of medicine	Introduction to Drugs used in alternative systems of medicine: <ul style="list-style-type: none"> • Ayurveda, • Homeopathy, • Unani • Siddha etc. 	Lecture	Short answers
				Discussion	Very short answers

COMMUNITY HEALTH NURSING I – Practical

Placement : II Year

Duration: 160 Hrs (4 Weeks)

Areas	Duration (in weeks)	Skills	Assignments	Assessment methods
Sub Centre	1 week	-Maintain interpersonal relationship.	Health talk-1 -Report of the activities of SC, PHC, CHC, UHC	-Assess clinical performance with rating scales
Primary Health Centre	1 week	-Identify health deviations of individuals -History taking -Physical examination -Collect specimens : sputum, malaria smear	-Report of the posting to clinics (Preventive clinic , NCD Clinic and Family Planning unit) -Epidemiological survey- Report Report of field visits to	-Health talk -Report of observation visits -Completion of activity record
Community Health Centre	1 week	-Perform simple lab tests- blood for Haemoglobin, sugar, urine for albumin & sugar	-Water purification plant, Sewage treatment plant and Milk pasteurizing plant, Anganwadi , Meat processing unit,	
Urban Health Centre- UHC	1 week	-Administer vaccines and medications to adults -Render need based services to the clients -Educate individuals on prevailing health problems -Conduct epidemiological survey - chlorination of domestic well.		

THIRD YEAR B.SC NURSING

MEDICAL SURGICAL NURSING –II (ADULT including GERIATRICS)-II

Course
No. 15

Placement: III Year

Theory: 110 hours

Nursing faculty: 80 hours

External faculty: 30 hours

Practical-400 hours

Course description:

This course is designed to enable the students to recognize the etiology, pathophysiology, symptomatology, diagnostic measures and management of patients with complex medical and surgical conditions in cardiology, cardiothoracic surgery, neurology, neurosurgery, nephrology, urology, oncology, plastic and reconstructive surgery and emergencies and to provide comprehensive nursing care to such patients.

Unit	Time (hrs)	Learning objectives	Content	Teaching learning activities	Assess ment method
I	8	-Describe the organization of critical care units. -Describe the role of the nurse in management of patients in critical care units.	Nursing management of patients in critical care units <ul style="list-style-type: none"> • Critical care units : organizational set up, policies, staffing norms, • principles of critical care nursing • protocols, equipments and supplies , ventilators, monitors, infusion pumps, defibrillators, • infection control in critical care units. • psychosocial aspects. • nursing assessment- history& physical 	Lecture Discussion Explain using charts, graphs, models, films, slides, Demonstr a tion	Essay Short notes Very short notes

Child Health Nursing Course No. 16

Placement- III Year

Theory: 140 hours

Nursing Faculty: 105 hours

External Faculty: 35 hours

Practical: 400 Hours

Time Allotment:

Genetics & Embryology- 10 Hours	Pediatric surgery - 10 Hours
Pediatric Medicine - 15 hours	Child health nursing- 105 Hours
Total - 140 Hours	

Course Description:

Students identify the normal growth and development, needs/problems of children of various age groups and deviations from normal, recognize the basic concepts, principles and techniques of child care and the role of family in child rearing, develop beginning ability to plan and provide comprehensive nursing care to children suffering from diseases and disorders.

Unit	Time (hrs)	Learning Objectives	Content	Teaching learning activity	Assessment methods
I	6	-Explain the concept of child care -Describe the principles of child health nursing -Recognize the difference between child and adult nursing -Describe national policy	Concepts of child care <ul style="list-style-type: none"> • History of Child Health Nursing • Principles of Child Health Nursing • Difference between adult and child nursing • Rights of children • Qualities of a Child Health Nurse • National policy & legislations in 	Lecture Discussion	Essay Short answers Very short answers

		and child welfare programmes	relation to child health and welfare. <ul style="list-style-type: none"> • Child welfare programmes: State, National, International 		
II	2	-Recognize universal Immunization programme -Explain the activities of preventive clinics	Preventive Pediatrics <ul style="list-style-type: none"> • Child Morbidity and mortality rates. • Universal Immunization Programme, cold chain, • Under-five clinic, well baby clinic -Child Guidance Clinic • IMNCI 	Lecture Discussion Field visit to Child Guidance Clinic	Short answers Very short answers
III	12	-Describe the normal growth & development of children at different ages -Appreciate the role of play for normal & sick children	The healthy child <ul style="list-style-type: none"> • -Principles of growth and development • -Factors affecting growth & development • -Growth and development, theories of development from infancy to adolescence, 	Lecture Discussion Demonstration Field visit to Anganwadi	Essay Short answers Very short answers

			<p>developmental problems and needs of children from infancy to adolescence;</p> <p>behavioural problems, habit disorders and management</p> <ul style="list-style-type: none"> • -Play needs of children 		
IV	5	<p>Describe the Nutritional needs of infants & children</p> <p>-Explain the nursing management of children with various nutritional disorders.</p>	<p>Nutritional needs and care of children with Nutritional disorders.</p> <ul style="list-style-type: none"> • Nutritional needs of infants & children: breast feeding, supplementary/ artificial feeding and weaning • -Baby friendly hospital initiative • -Nutritional requirements in children, • -Nutritional deficiency • Disorders:-Protein Energy Mal nutrition, • -Vitamin & Mineral Deficiencies 	<p>Lecture</p> <p>Discussion</p> <p>Demonstration</p> <p>Practice session</p> <p>Clinical practice</p>	<p>Essay</p> <p>Short answers</p> <p>Very short answers</p>

V	10	<p>-Explain the nursing management of normal/ high risk neonate.</p> <p>-Perform neonatal resuscitation.</p> <p>-Recognize and manage common neonatal problems</p>	<p>Nursing care of a neonate</p> <ul style="list-style-type: none"> • -Nursing care of a normal newborn • -Essential newborn care • -Kangaroo mother care • -Nursing management of high risk neonate: low birth weight babies, preterm babies, • Management of common neonatal problems: respiratory distress syndrome, hyperbilirubinemia, meconium aspiration syndrome, infant of diabetic mother, neonatal sepsis 	<p>Lecture</p> <p>Discussion</p> <p>Workshop</p> <p>on neonatal resuscitation</p> <p>Demonstration</p> <p>Practice session,</p> <p>Clinical practice</p>	<p>Essay</p> <p>Short answers</p> <p>Very short answers</p>
VI	3	<p>-Identify the reactions of child and family towards hospitalization and illness</p> <p>-Describe the major functions</p>	<p>Caring for a hospitalized child</p> <ul style="list-style-type: none"> • -Role of Child Health Nurse in caring for a hospitalized child • -Reaction of child and family towards illness and 	<p>Lecture</p> <p>Discussion</p>	<p>Essay</p> <p>Short answers</p>

		and role of pediatric nurse in caring a hospitalized child	<p>hospitalization and nurse's role in minimizing stress.</p> <ul style="list-style-type: none"> -General preoperative and post-operative management of children

NURSING RESEARCH AND STATISTICS Course No. 18

Placement: III Year

Theory- 50 hours

(Nursing Research-35 hours; **Statistics-15 hours**)

Practical - 80 hours (2 weeks)

Course Description:

This course is designed to enable students to develop an understanding of basic concepts of research, research process and statistics. It is further structured to conduct/participate in need based research studies in various settings and utilize the research findings to provide quality nursing care. The hours for practical will be utilized for conducting individual/group research project.

Unit	Time (hrs)	Learning objectives	Content	Teaching learning activity	Assessment methods
I	4	-Describe the concept of research,	Research process <ul style="list-style-type: none"> • -Introduction • -research- definition, 	Lecture Discussion	Essay Short

		<p>terms, need and areas of research in nursing</p> <p>-Explain the steps of research process.</p>	<p>purpose</p> <ul style="list-style-type: none"> • Steps of scientific methods • -Characteristics of good research • Nursing research— definition, importance of research in nursing • need and scope of nursing research • research terminology • -Steps of Research process 		<p>answers</p> <p>Very short answers</p>

FOURTH YEAR B Sc NURSING

OBSTETRIC AND GYNAECOLOGICAL NURSING ———— Course No.19

OBSTETRIC NURSING

Placement: IV Year

Theory - 100 hrs

Nursing faculty: 90 hrs

External faculty: 10 hrs

Practical: 480 hrs

Course Description:

This course is designed for students to appreciate the concepts and principles of obstetric nursing and helps them to acquire knowledge and develop attitude and beginning skills in rendering nursing care to normal and high risk pregnant women during antenatal, natal and postnatal periods in hospital and community settings. It also helps to develop skills in managing normal and high risk neonate and participate in family welfare programmes.

Unit	Time (hours)	Learning Objective	Content	Teaching learning activities	Assess ment method
I	3	-Appreciate the trends and issues in Obstetric nursing -Identify the legal and ethical aspects in obstetric nursing	Introduction to concepts of Obstetric Nursing <ul style="list-style-type: none"> • Historical perspectives and current trends • Hall marks of Midwifery • Contemporary issues in obstetrics • Legal and ethical aspects • Role of Obstetric Nurse 	Lecture Discussion Explain using slides, Charts	Short answers Very short answers
II	7	Describe the anatomy	Review of anatomy and physiology of female reproductive system	Lecture Discussion	Essay

	<p>and physiology of female reproductive system.</p> <p>-Discuss pre conception care and preparation for planned parenthood</p> <p>-Explain conception and fetal development</p>	<ul style="list-style-type: none"> • Female pelvis- general description of the bones, joints, ligaments, planes of the pelvis, diameters of the true pelvis, important landmarks, variation in shape of pelvis. • Female organs of reproduction- external genitalia, internal genital organs and their anatomical relations, musculature- blood, supply, nerves, lymphatics, pelvic floor, pelvic cellular tissue, pelvic peritoneum • Physiology of menstrual cycle- • Preconception care and preparing for parenthood • Conception and foetal development • Review of fertilization, implantation, embedding of the ovum, development of the embryo, foetus and placenta, placenta at term, functions abnormalities, the foetal sac, amniotic fluid, the umbilical cord • Foetal circulation, foetal 	<p>n</p> <p>Explain using charts and models</p> <p>Demonstrate with models, objects</p> <p>Practice sessions</p> <p>-Explain using charts, slides & models</p> <p>-</p> <p>Demonstrate with models, objects</p> <p>Practice session</p>	<p>Short answers,</p> <p>Very short answers</p>

Project		Evaluation of project			

Essential Requirements for registration as Midwife

Antenatal care	20
Antenatal examination	30
Conducting normal deliveries in hospital/ home/ health center	20
Vaginal examination	5
Episiotomy and suturing	5
Neonatal resuscitation	5
Assist with Caesarean Section	2
Witness/ Assist abnormal deliveries	5
Post natal cases nursed in hospital/home/ health center	20
Insertion of IUD	5

Note: All case books must be certified by teacher on completion of essential requirements

Assignments:

Care study	:	2. (Antenatal -1, Post Natal -1)
Case Presentation	:	1 (Antenatal / post natal – 1)
Nursing Care Plan	:	3 (antenatal -1, postnatal -1, newborn – 1(highrisk))
Health talk	:	2
Drug file		Project

Obstetric and Gynaecological Nursing Record:

Antenatal -20, Intranatal -20, Post natal -20

Care study abstract- 3 (Antenatal -1, Post natal -1, Gynaec -1)

Gynec surgeries assisted / witnessed -5

GYNAECOLOGICAL NURSING

Placement: IV Year

Theory: 30 Hours

(Nursing faculty: 20 hrs; External faculty: 10 hrs)

Practical: 160 Hours

Course description:

This course is designed to help the students acquire knowledge, develop attitude and beginning skills in the management of women with gynecological problems and render pre and post operation care to clients undergoing major and minor surgeries

The concept of Health Care Counselling shall be incorporated in all relevant areas

2.7 Total number of hours

Duration of the course shall be four years. Internship integrated practice is incorporated with respective practical hours in each year.

Duration of course	Weeks
Weeks available per year	= 52 weeks
Total Vacation	= 6 weeks
a). Festival Holidays	= 2 weeks
b). Public holidays	= 3 weeks
c). After University theory exam	= 1 week
Examination(including preparation)	= 2+2 weeks
Available weeks	= 42 weeks
Hours per week	= 40 hours
Hours available per academic year	= 1680 (42wks x 40hrs)

2.8 Branches if any with definition

Not Applicable

2.9 Teaching learning methods

As given under 2.6 - Syllabus.

2.10 Content of each subject in each year

As given under 2.6 - Syllabus.

2.11. No: of hours per subject

As given under 2.6 - Syllabus.

2.12. Practical training

As given under 2.6 - Syllabus.

2.13. Records

Proper records of practical work should be meticulously maintained.

2.14. Dissertation

Not Applicable

2.15. Specialty training if any

Not Applicable

2.16. Project work to be done if any

Clinical Assignments & projects work as given under 2.6, Syllabus.

2.17. Any other requirements [CME, Paper Publishing etc.]

Not applicable.

2.18. Prescribed/recommended textbooks for each subject

As given under 2.6 - Syllabus.

2.19. Reference books

As given under 2.6 - Syllabus.

2.20. Journals

As given under 2.6 - Syllabus.

2.21. Logbook

A logbook should be maintained.

3. EXAMINATIONS

3.1. Eligibility to appear for exams

A candidate must score minimum 50% internal marks for theory and practical separately in each subject in order to appear for university examinations.

Each candidate should put in minimum 80% of attendance in theory and clinical practicum for appearing university examination. Condonation of 10% of the attendance once in the entire course period can be granted by the Head of the Institution and the same may be communicated to the university.

Condonation of attendance: -

The principal on recommendation by the HOD / Department in charge can condone the shortage of attendance of a candidate to a maximum of 10% for a subject /

subjects (theory / practical or both) with prescribed fee once in a course period under intimation to the Controller of Examinations. In such cases the Principal shall submit a declaration that the particular candidate has not enjoyed this facility previously in the particular course. There shall be a register for recording the condonation availed in the office of Principal.

3.2. Schedule of Regular/Supplementary exams

Regular university examinations will be conducted at the end of each academic year and supplementary examinations will be conducted after regular examination once in a year. There shall be two University examinations in each academic year including regular and supplementary examinations for theory and practical.

3.3. Scheme of examination showing maximum marks and minimum marks.

A. Duration of university examination

First Year B. Sc Nursing

Subject		Theory (Duration in hours)	Practical (Duration in hours)	Viva
Part -I Paper I	Anatomy	3	-	-
Part -I Paper II	Physiology	3	-	-
Part -I Paper III	Microbiology	3	-	-
Part -I Paper IV	Nutrition & Biochemistry	3	-	-
Part –II Paper I	Psychology	3	-	-
Part -III Paper I	Nursing Foundations	3	3	Yes

Second Year B. Sc Nursing

Subject		Theory (Duration in hours)	Practical (Duration in hours)	Viva
Part -I Paper I	Sociology	3	-	-
Part –II Paper I	Medical Surgical Nursing (Adult including Geriatrics)-I Medical Nursing including	3	3	Yes

	Pathology			
Part -II Paper II	Medical Surgical Nursing (Adult including Geriatrics)-I Surgical Nursing	3	3	Yes
Part -II Paper III	Pharmacology	3	-	-
Part -II Paper IV	Community Health Nursing– I	3	-	-

Third Year B. Sc Nursing

Subject		Theory (Duration in hours)	Practical (Duration in hours)	Viva
Part -I Paper I	Medical Surgical Nursing (Adult including Geriatrics)-II Medical Surgical Nursing- II	3	3	Yes
Part -I Paper II	Child Health Nursing	3	3	Yes
Part -I Paper III	Mental Health Nursing	3	3	Yes
Part -II Paper I	Nursing Research and Statistics	3	-	-

Fourth Year B. Sc Nursing

Subject		Theory (Duration in hours)	Practical (Duration in hours)	Viva
Part -I Paper I	Obstetric and Gynaecological Nursing	3	3	Yes
Part -I Paper II	Community Health Nursing II	3	3	Yes
Part –II Paper I	Nursing Education	3	-	-
Part -II Paper II	Management of Nursing Service and Education	3	-	-

3.4. Papers in each year

As given under 2.4 - Course Outline

3.5. Details of theory exams

As given under 2.4., 3.3, 3.4, 3.5.

3.6. Model question paper for each subject with question paper pattern

QUESTION PAPER PATTERN

Max. Time: 3 Hrs

Max. Marks

Nursing Foundation:100

Nutrition and Biochemistry:50+25

Nursing Research and statistics :50+25

All other subjects:75

I) All Subjects with Max.marks: 75

Long Essay	1*12 marks	12 marks
Short Essay	2*7 marks	14 marks
Short notes	5*5 marks	25 marks
Answer briefly /Differentiate/ list the following/Give reasons	6*4 marks	24 marks
Total marks		75 marks

II) Nursing Foundation Max. marks: 100

Long Essay	1*15marks	15 marks
Short Essay	2*10 marks	20 marks
Short notes	5*5 marks	25 marks

Answer briefly /Differentiate/ list the following/Give reasons	10*4 marks	40 marks
Total marks		100 marks

III)Nutrition / Nursing Research Max.mark: 50

Short Essay	2*7 marks	14 marks
Short notes	4*5 marks	20 marks
Answer briefly /Differentiate/ List the following/Give reasons	4*4 marks	16 marks
Total marks		50 marks

IV)Statistics: Max.marks: 25

Statistical Calculations	1*7 marks	7 marks
Short notes	6*3 marks	18 marks
Total mark		25 marks

V) Biochemistry: Max.marks : 25

Short notes	2*5 marks	10 marks
Answer briefly /Differentiate list the following/Give reasons	5*3 marks	15 marks
Total mark		25 marks

Reg. No:

First Year B.Sc Nursing Degree Examinations, 2016 Scheme

Anatomy

Time: 3 Hrs

Max. Marks: 75

Answer all questions

Draw diagram wherever necessary

Questions

Long Essays: (1×12=12)

1. Describe the classification of Joints? Describe each type with examples? Explain the applied anatomy of Synovial Joint with suitable examples? (4+4+4)

Short Essays: (2×7 =14)

2. Draw and label the chambers and vessels of heart? Describe the interior of heart in detail? (3 + 4)
3. Enumerate the parts of respiratory system? Explain the anatomy of lung? (4 + 3)

Write Short Notes on: (5×5 = 25)

4. Structure of Kidney.
5. Types of Cartilage
6. Structure of a neuron.
7. Ear ossicles
8. Ventricles of Brain

Answer briefly: (4×4=16)

09. List the Organs of male and female reproductive system.
10. What are the Branches of Aorta?
11. Enumerate the Pituitary Hormones
12. Enumerate the cranial nerves

Differentiate between: (2×4=8)

13. Small and large intestine
14. Systemic circulation and pulmonary circulation
-

Physiology

Time: 3 Hrs

Max. Marks: 75

Answer all questions

Draw diagram wherever necessary

Long Essays: (1×12=12)

1. Explain the regulation of respiration? Define the lung volumes and capacities with their normal values? (4+4+4)

Short Essays: (2×7 =14)

2. What is menstrual cycle? Briefly explain the changes during menstrual cycle? (3+4)
3. What are the different types of Blood groups? Briefly explain the functions of leukocytes? (3+4)

Write Short Notes on: (5×5 = 25)

4. Conducting system of heart.
5. Function of nephron
6. Refractive errors of Eye
7. Neuro Muscular Junction
8. Pregnancy tests

Answer briefly: (3×4=12)

09. What are the functions of CSF ?
10. Mechanism of urine formation?
11. Reflex action

Differentiate between: (3×4=12)

12. Active and Passive immunity
13. Enzymes and Hormones
14. Erythropoiesis and Erythrolysis

Reg. No:

MICROBIOLOGY

Time: 3hrs

max.marks:75

Answer all questions

Draw diagrams wherever necessary

Essay:

1. Define sterilization and classify sterilizing agents. Explain in detail sterilization by moist heat. Enumerate the role of a nurse in sterilization.
(1+2+6+3=12)

Short essays:

(2×7 =14)

2. Describe the morphology, clinical features and laboratory diagnosis of cholera(1+2+4=7)
3. Define hospital acquired infections (HAI). Describe the various sources, routes of transmission and the common types of HAI.
(1+2+2+2=7)

Short notes:

(5*5=25)

4. Universal precautions
5. Lab diagnosis of pulmonary tuberculosis
6. Innate immunity
7. Microfilaria
8. Candidiasis

Answer briefly:

(3*4=12)

9. Prophylaxis of rabies
10. Immunization schedule
11. Bacterial spores

Differentiate:

(3*4=12)

12. Live and killed vaccines
13. Agglutination and precipitation
14. Exotoxins and endotoxins

First year B.Sc. Nursing Degree Examination 2016 Scheme

Reg. No:

NUTRITION AND BIO CHEMISTRY

Time : 3 Hours

Maximum Mark : 75

Answer all questions

Section A – NUTRITION

Marks :50

Short Essay

2x7 marks 14 marks

1. Explain the absorption, digestion and metabolism of Carbohydrates
2. Explain the functions, requirements and management of Water

Write Short notes

4x5 marks 20 marks

1. Plan a diabetic diet for a 60 year old woman with 164 cms tall and 72 kg weight
2. Nutritional problems in India
3. Methods of preservation of nutrients
4. Classification of Fats
5. Commercial methods of food preservation

Answer Briefly

4x4 marks 16 marks

8. Balance Diet.
9. Glycemic Index
10. Rickets
11. Prepare a day's menu for a pregnant woman with hypertension

Section B – BIO CHEMISTRY

Marks :25

Write Short notes;

2 x 5 = 10 Marks

1. How is toxic Ammonia converted to non toxic Urea? Explain the process?
2. Write down the normal level of Calcium? How is Calcium regulated in the body?

Answer Briefly;

2 x 3 = 6 Marks

3. Pellagra
4. Diabetic Ketoacidosis

Differentiate between;

3 x 3 = 9 Marks

5. Essential amino acids and Non essential amino acids.
6. Metabolic acidosis and respiratory acidosis
7. Hypokalemia and Hyperkalemia

Model Question Paper

Time: 3 Hours

Total Marks: 100

NURSING FOUNDATIONS
ANSWER ALL QUESTIONS

Long Essay:

1. Define pressure ulcer. Enumerate the common sites of pressure ulcer. State the risk factors of pressure ulcer. Explain the nursing interventions for the prevention of pressure ulcer. (1+3+4+7 =15)

Short Essay:

2. Define catheterization. What are the indications of catheterization? Explain the nursing management of a client with continuous bladder drainage. (1+4+5=10)

3. Define first aid. Enumerate the qualities of first aider. Explain the management of a client with food poisoning. (1+4+5=10)

Short notes : (5x5=25)

- 4 Characteristics of profession.
5. Factors affecting pulse rate.
6. Standard safety precautions.
7. Nursing interventions to improve appetite
8. Care of dead body.

Differentiate between the following (5x4=20)

9. Palpation - Percussion
10. Injection _ Infusion
11. Isometric exercise -Isotonic exercise
12. Gastric gavage _ Gastric lavage
13. Source isolation _ protective isolation.

List down the following: (5x4=20)

14. Four positions and its purposes.
15. Four principles of medicine administration.
16. Four functions of hospital.
17. Four comfort devices and its purposes.
18. Four values of records.

3.7. Internal assessment component

Internal marks: Calculation of internal marks shall be based on the ongoing and continuous assessment.

Theory:

Minimum three written examinations distributed throughout the year for each subject should be conducted. Average of best two examinations (University Model Exam mandatory) can be considered for the calculation of internal marks.

Marks of evaluation by other methods like assignments, seminars, projects etc. can be added to the internal marks.

Internal marks-weight age

Theory Marks	Weightage
Average of written examinations	80%
Other methods of evaluation (if any)	20%
Total	100%
Practical Marks	
Ongoing clinical evaluation	40%
Clinical Assignments	30%
Internal practical examination	30%
Total	100%

The internal marks shall be signed by the candidate before transmission to the University.

3.8. Details of practical/clinical practicum exams.

All practical examinations are to be conducted in the respective clinical areas. Facility for observation of all candidates simultaneously in the same ward / clinical area by the examiners during practical examinations is mandatory.

One internal examiner and one external examiner should jointly conduct the practical examination.

Each candidate should be evaluated for a period of three hours for practical and should undergo minimum 10 minutes viva voce separately by internal and external examiner.

Maximum number of candidates for practical examination should not exceed 15 per day

3.9. Number of examiners needed (Internal & External) and their qualifications

Qualification of the examiner

Lecturer or above in a College of Nursing with Post graduation in the concerned subject and minimum 3 years of teaching experience in the collegiate programme after obtaining PG degree is eligible for examinership. But for Nursing Foundations (I year), Nursing Research and Statistics (III year), Nursing Education (IV year) and Management of Nursing Service and Education (IV year), faculty having M Sc Nursing in any specialty shall be considered provided they have teaching experience in the above subjects and 3 years of teaching experience in the collegiate programme

3.10. Details of Viva

Distribution of marks - Theory, practical examinations & viva.

MASTER OF SCIENCE IN NURSING

Medical Surgical Nursing

Course Code 271

(2016-17 admission onwards)

2016

2. COURSE CONTENT

2.1 Title of course:

MASTER OF SCIENCE IN NURSING – MSc Medical Surgical Nursing

Sub specialties :-

- a. *Cardio Vascular & Thoracic Nursing*
- b. *Critical care Nursing, Oncology Nursing*
- c. *Neurosciences Nursing*
- d. *Nephro-Urology Nursing*
- e. *Orthopedic Nursing*
- f. *GastroEnterology Nursing.*

2.2 AIM & OBJECTIVES OF THE COURSE

AIM

Aim of the postgraduate programme in nursing is to prepare graduates to assume responsibilities as Clinical Nurse Specialists, Nurse Practitioners, Consultants, Educators, Researchers and Administrators in a wide variety of professional settings.

OBJECTIVES

On completion of the 2 year M.Sc Nursing programme, the graduates will be able to:-

1. Apply the concepts, theories and principles of nursing science.
2. Demonstrate competencies in nursing practice.
3. Practice as Clinical Nurse Specialist.
4. Establish collaborative relationship with the members of other disciplines.
5. Assume leadership in various care settings.
6. Participate in health planning, implementation and evaluation at different levels of health care system.
7. Function as effective nurse educators and nurse managers.
8. Conduct independent nursing research and utilize the research findings in nursing practice and education.

9. Critically evaluate various educational programmes in nursing.
10. Demonstrate interest and positive attitude in continuing education for personal and professional growth.
11. Demonstrate advanced skills and competence in the nursing management of patients with various medical and surgical conditions.
12. Incorporate evidence based nursing practice and identify the areas of research in the field of medical and surgical nursing.
13. Describe recent advancements in the field of medical and surgical nursing.
14. Explain the legal and ethical issues in caring patients with various medical and surgical conditions.
15. Function as medical surgical nurse specialists and practitioners.

2.3 Medium of instruction:

Medium of instruction shall be in English

2.4 Course outline

1 year	Theory (hrs)	Practical (hrs)
Nursing Education	150	150
Advanced Nursing Practice	150	500
Nursing Research and Statistics	150	100
Medical Surgical Nursing-I	150	900
Total	600	1650
II Year	Theory (hrs)	Practical (hrs)
Nursing Management	150	200
Nursing Research (Dissertation)	-	300
*Medical Surgical Nursing -II	150	1450
Total	300	1950
Grand Total	900	3600

*Sub Specialty:-

- a. Cardio Vascular & Thoracic Nursing

- b. *Critical care Nursing*
- c. **Oncology Nursing**
- d. *Neurosciences Nursing*
- e. *Nephro-Urology Nursing*
- f. *Orthopedic Nursing*
- g. *Gastro Enterology Nursing*

2.5 Duration

Duration of the course is for 2 years.

Weeks/year	: 52 weeks
Leave	: 3 weeks (20 days)
Preparation and Exam	: 2 weeks
Total weeks available	: 47 weeks
Total hours/week	: 48 hours
48 hoursX47weeks	: 2256 hour/year

2.6 Syllabus

As given under "Content of each subject in each year"

The concept of Health Care Counselling shall be incorporated in all relevant areas

2.7 Total number of hours

As given under "Content of each subject in each year "

2.8 Branches if any with definition

Not Applicable

2.9 Teaching learning methods

As given under "Content of each subject in each year "

2.10 Content of each subject in each year

**FIRST YEAR M.Sc NURSING
NURSING EDUCATION**

Course No. 21

Placement: 1st Year

Hours of Instruction

Theory 150 Hours
Nursing Faculty-115
External Faculty- 35
Practical 150 Hours
Total: 300 Hours

Course Description

This course is designed to assist students to develop a broad understanding of fundamental Principles, concepts, trends and issues related to education and nursing education. Further, it would provide opportunity to students to understand, appreciate and acquire skills in teaching and evaluation, curriculum development, implementation, maintenance of standards and accreditation of various nursing educational programs.

Objectives

At the end of the course, students :

1. Explain the aims of education, philosophies, trends in education and its impact on nursing education.
2. Describe the teaching learning process.
3. Prepare and utilize various instructional media and methods in teaching learning process.
4. Demonstrate competency in teaching, using various instructional strategies.
5. Critically analyze the existing nursing educational programs, their problems, issues and future trends.
6. Describe the process of curriculum development, and the need and methodology of curriculum change, innovation and integration.
7. Plan and conduct continuing nursing education programs.
8. Critically analyze the existing teacher preparation programs in nursing
9. Demonstrate skill in guidance and counselling.
10. Describe the problems and issues related to the implementation of nursing curriculum including selection and organization of clinical experience.
11. Explain the development of standards and accreditation process in nursing education programs.
12. Identify research priorities in nursing education.
13. Discuss various models of collaboration in nursing education and services.

14. Explain the concept, principles, steps, tools and techniques of Evaluation.
15. Construct, administer and evaluate various tools for assessment of knowledge, skill, and attitude.

* External Faculty (EF)

Activities

- Framing philosophy, aims and objectives.
- Lesson Planning.
- Micro teaching-2.
- Conduct practice teachings using different teaching strategies -10
(Like lecture cum discussion, demonstration- lab method, field trips, seminars, project, role play, panel discussion, clinical methods etc)
- Preparation and utilization of instructional Aids using different media.
- Develop course plans, unit plans, rotation plans.
- Conduct a continuing education workshop.
- Annotated bibliography.
- Critical evaluation of any nursing education program offered by a selected institution.
- Planning and Organizing field visits.
- Construct, administer and evaluate tools (objective & essay type test, observation checklist, rating scale etc)
- Observe and practice application of various non-standardized tests, (intelligence, Aptitude, Personality, Sociometry, physical & mental disabilities tests.)

Methods of Teaching

- Lecture cum discussion
- Demonstration/ Return demonstration
- Seminar / Presentations
- Project work
- Field visits

- Workshop

Methods of evaluation

- Tests
 - Presentation
 - Project work

Assignments –Theory

Lesson plan-2, courseplan -1, unit plan 2, rotation plan-2(master plan, clinical rotation)

Evaluation tool-construction, administration and evaluation (Essay, objective type, rating scale, checklist)

Construction of an achievement test

Practical

Practice teaching using different strategies (lecture cum discussion-5, demonstration-2, seminar-1, clinical teaching -2, symposium/role play/panel discussion)

Internal Assessment (Theory)

	Weightage
Sessional exams (3)	50%
Assignments	25%
Seminar/presentation	25%
Total	100%

Practical – Internal assessment

Preparation of Learning resource material &	25%
Construction of tests/rotation plan.	
Practice Teaching	50%
Conduct Workshop /Short Term Course	25%
Total	100%

Placement: 1st Year

Hours of Instruction

Theory: 150 Hours

External Faculty:-30hrs

Nursing Faculty:-120hrs

Practical: 500 Hours

Total : 650 Hours

Course Description

The course is designed to develop an understanding of concepts and constructs of theoretical basis of advanced nursing practice and critically analyze different theories of nursing and other disciplines.

Objectives:

At the end of the course the students will be able to:

1. Describe ethical, legal, political and economic aspects of health care delivery and nursing practice.
2. Identify latest trends in nursing and the basis of advanced nursing practice.
3. Explain bio- psycho- social dynamics of health, life style and health care delivery system.
4. Discuss concepts, principles, theories, models, approaches relevant to nursing and their application.
5. Perform health assessment and General physical examination
6. Provide holistic and comprehensive care following nursing process approach
7. Perform extended and expanded role of nurse.
8. Describe alternative modalities of nursing care.
9. Describe the concept of quality control in nursing.
10. Identify the scope of nursing research.
11. Use computer in patient care delivery system and nursing practice.
12. Appreciate importance of self-development and professional advancement

Hours of Instruction

Theory : 150 Hours

Practical : 100 Hours

Total : 250 Hours

Part A: Nursing Research

Theory: 100 Hours

Practical: 75 Hours

Total : 175 Hours

Course Description:

The course is designed to assist the students to acquire an understanding of the research methodology and statistical methods as a basis for identifying research problem, planning and implementing a research plan. It will further enable the students to evaluate research studies and utilize research findings to improve quality of nursing practice, education and management.

General Objectives:

At the end of the course, the students will be able to:

1. Recognize the significance of research in nursing and its importance in evidence- based nursing practice.
2. Identify the steps of quantitative and qualitative research.
3. Discuss the ethical aspects of research.
4. Review literature utilizing various resources.
5. Identify researchable problems in nursing.
6. Demonstrate skill in planning and conducting research studies.
7. Communicate research findings.
8. Utilize research findings.
9. Critically evaluate research reports and articles.
10. Write scientific paper for publications.

I	5	<p>Introduction</p> <p>Review:</p> <p>Problem solving and scientific method.</p> <p>Research –definition, characteristics, purposes, types of research, Basic research terms, Scope of nursing research, Overview of Research process, Significance of research in nursing, Historical Evolution of nursing research.</p> <ul style="list-style-type: none"> <input type="checkbox"/> Future trends in nursing research. <input type="checkbox"/> Problems and challenges in nursing research, health and social research. <input type="checkbox"/> Priorities for nursing research. <input type="checkbox"/> Evidence based practice. <input type="checkbox"/> Ethics in research 		
II	5	<p>Review of Literature</p> <p>Review-</p> <ul style="list-style-type: none"> • Importance, purposes, sources, criteria for selection of resources • Guidelines for writing literature review. 	5	Literature search-web Search

III	10	Research problem: <ul style="list-style-type: none"> <input type="checkbox"/> Identification of research problem/ research question. <input type="checkbox"/> Formulation of problem statement and research objectives <input type="checkbox"/> Definition of terms <input type="checkbox"/> Assumption and delimitations <input type="checkbox"/> Identification of variables <input type="checkbox"/> Hypothesis –definition, formulation and types. 	5	1. Identification of research question. 2. Formulation of problem statement and research objectives
IV	5	Developing theoretical /conceptual framework. <ul style="list-style-type: none"> <input type="checkbox"/> Review Theories: Nature, characteristics, purpose and application in research <input type="checkbox"/> Using, testing and developing conceptual framework, models and theories. 	5	Developing theoretical /conceptual framework.
V	15	Research Approach and designs Qualitative and Quantitative, Mixed methods Qualitative research approaches: Grounded theory, phenomenology, ethnography, case study and historical research. Quantitative: Experimental and non experimental: types, characteristics, advantages and disadvantages. Randomised control design, cohort study, clinical trials		
VI	8	Sampling Population and sample. Factors influencing sampling Sampling techniques Sample size Probability and sampling error		

VII	20	<p>a) Data collection methods and Tools: Concepts of data collection, Data sources, methods/techniques quantitative and qualitative. Tools for data collection-types and characteristics</p> <p>b) Measurement and data quality Validity and reliability of tools, Characteristics of an instrument Steps in development of an instrument. Procedure for data collection</p>		
VIII	3	Critical analysis of research reports and articles	15	Critical analysis of research reports and articles
IX	4	Developing and presenting a research proposal	5	Presenting a research proposal
X	5	Implementing research plan Pilot study, review research plan (design), planning for data collection, administration of tool/interventions, Collection of data	40	Pilot study
XI	10	Analysis and interpretation of data Plan for data analysis: quantitative and qualitative Preparing data for computer analysis and Presentation , Statistical analysis Interpretation of data Conclusion and generalizations Summary and discussion		
XII	10	Reporting and utilizing research findings: Communication of research results; oral and written Writing research report purposes, methods and style, Vancouver, American Psychological Association (APA),		

		Utilization of research findings. Writing scientific articles for publication: purposes & style		
--	--	---	--	--

Activities:

- Annotated Bibliography of research reports and articles. -4
- Review of literature of selected topic and reporting
- Formulation of problem statement, objective and hypothesis
- Developing theoretical /conceptual framework.
- Preparation of a sample research tool.
- Analysis and interpretation of given data
- Developing and presenting research proposal
- Journal presentation-1
- Critical evaluation of selected research studies –dissertaton-1,journal article -1
- Writing a scientific paper

Methods of Teaching:

- Lecture-cum-discussion
- Seminar/Presentations
- Project
- Class room exercises
- Journal club

Methods of Evaluation:

- Quiz, Tests(Term)
- Assignments/Term paper
- Presentations
- Project work (Concerned specialty)

Internal Assessment Techniques	Weightage (15 marks)
Sessional exams (2)	40%
Presentations/Seminar	20%
Research critique & presentation	20%
Annotated bibliography ,assignments	20%
Total	100%

Part –B: Statistics (External Faculty)

Hours of Instruction

Theory	50Hours
Practical	25 Hours
Total	75 Hours

Course Description:

At the end of the course, the students will be able to develop an understanding of the statistical methods and apply them in conducting research studies in nursing

General Objectives:

At the end of the course the students will be able to:

1. Explain the basic concepts related to statistics
2. Describe the scope of statistics in health and nursing
3. Organize, tabulate and present data meaningfully
4. Use descriptive and inferential statistics to predict results
5. Draw conclusions of the study and predict statistical significance of the results
6. Describe vital health statistics and their use in health related research
7. Use statistical packages for data analysis.

Course content

Unit	Hours		Content
	Theory	Practical	
I	7		Introduction: <ul style="list-style-type: none"> □ Concepts, types, significance and scope of statistics, meaning of data □ Sample, parameter □ Type and levels of data and their Measurement <ul style="list-style-type: none"> □ Organization and presentation of data-Tabulation of data □ Frequency distribution □ Graphical and tabular presentations
II	4		Measures of central tendency: Mean, Median, Mode
III	4		Measures of variability: □ Range, Percentiles, Average deviation, Quartile deviation, Standard deviation
IV	3		Normal Distribution: □ Probability, Characteristics and application of normal probability curve, Sampling error
V	6		Measures of relationship: □ Correlation-need and meaning □ Rank order correlation □ Scatter diagram method, product moment correlation, Simple linear regression analysis and prediction,
VI	5		Designs and meaning: <ul style="list-style-type: none"> □ review -Experimental designs □ Comparison in pairs, randomized block design, Latin squares.
VII	8		Significance of Statistic and Significance of difference between Two Statistics(Testing hypothesis) <ul style="list-style-type: none"> □ Non parametric test-Chi-square test, Sign, median test, Mann Whitney test □ Parametric test- t' test, ANOVA,

VIII	5		Use of statistical methods in psychology and education: <ul style="list-style-type: none"> ▫ Scaling-Z Score, Z Scaling ▫ Standard Score and T Score ▫ Reliability of test scores: test-retest method, parallel forms split half method
IX	4	5	Application of statistics in health: <ul style="list-style-type: none"> Ratios, Rates, Trends Vital health statistics –Birth and death rates Measures related to fertility, morbidity and mortality
X	4	20	Use of Computers for data analysis <ul style="list-style-type: none"> Use of statistical package

Activities:

- Exercises on organization and tabulation of data
- Graphical and tabular presentation of data
- Calculation of descriptive and inferential statistics (chi square, t-test, correlation)
- Practice in using statistical package
- Computing
- Vital health statistics

Methods of Teaching:

- Lecture-cum-discussion
- Demonstration-on data organization, tabulation, calculation of statistics, use of statistical package, Classroom exercises, organization and tabulation of data
- Computing Descriptive and inferential statistics; vital and health

statistics and use of computer for data entry and analysis using statistical package

Methods of Evaluation:

- Test, Classroom statistical exercises

Internal Assessment Techniques

weightage 10 marks

Sessional exams – (2)

100%

CLINICAL SPECIALTY – I

MEDICAL SURGICAL NURSING-I

Course No. 24

Placement: 1st Year

Hours of instruction

Theory: 150 Hours

Nursing Faculty: 120Hours

External Faculty: 30 Hours

Practical: 900 Hours

Total: 1050 Hours

Course Description

It is designed to assist students in developing expertise and in-depth knowledge in the field of Medical Surgical Nursing. It will help students to appreciate the patient as a holistic individual and develop skill to function as a specialized Nurse. It will further enable the student to function as educator, manager and researcher in the field of Medical – Surgical Nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate the trends & issues in the field of Medical – Surgical Nursing as a specialty.
2. Apply concepts & theories related to health promotion.
3. Appreciate the client as a holistic individual.
4. Perform physical, psychosocial assessment of Medical – Surgical patients.
5. Apply Nursing process in providing care to patients.
6. Integrate the concept of family centred nursing care with associated disorder such as genetic, congenital and long-term illness.
7. Recognize and manage emergencies
8. Describe various recent technologies & treatment modalities in the management of critically ill patients.
9. Appreciate the legal & ethical issues
10. Prepare a design for ICU
11. Appreciate the role of alternative systems of Medicine in care of patients.
12. Incorporate evidence based Nursing practice and identify the areas of research
13. Recognize the role of Nurse practitioner as a member of the health team.
14. Conduct clinical Teaching for undergraduate nursing students & in-service nurses.

SECOND YEAR M.Sc NURSING
NURSING MANAGEMENT ————— **Course No. 25**
Placement: II Year
Hours of Instruction

Nurse Specialist :105 Hours

Theory :150 Hours

External :45 Hours

Practical :200 Hours

Total : 350 Hours

Course Description

This course is designed to assist students to develop a broad understanding of principles, concepts, trends and issues related to nursing management. Further, it would provide opportunity to students to understand, appreciate and acquire skills in planning, supervision and management of nursing services at different levels to provide quality nursing services.

Objectives

At the end of the course, students will be able to:

1. Formulate the philosophy and objectives of the health care institutions at various levels.
2. Identify trends and issues in nursing
3. Discuss the public administration, health care administration and nursing administration
4. Describe the principles of administration applied to nursing
5. Explain the organization of health and nursing services at the various levels/institutions.
6. Discuss the planning, supervision and management of nursing workforce for various health care settings.
7. Discuss various collaborative models between nursing education and nursing service to improve the quality of nursing care
8. Identify and analyze legal and ethical issues in nursing administration
9. Describe the process of quality assurance in nursing services.
10. Demonstrate leadership in nursing at various levels.
11. Organize staff development programme.

COURSE CONTENT

Unit	Theory	Content
I	10 *EF5	<p>Introduction</p> <ul style="list-style-type: none"> • Concepts of Management Philosophy, theories, elements, Principles, -(Review). Functions of administration <p>Indian Constitution, Indian Administrative system health care delivery system:</p> <p>National, State and Local</p> <p>Organisation and functions of nursing services and education at National, State, District and institutions: Hospital and Community</p> <p>Planning process: Five year plans, Various Committee Reports on health, State and National Health policies, national population policy, national policy on AYUSH and plans</p>
II	10	<p>Nursing management</p> <p>Concept, types, principles and techniques</p> <p>Vision and Mission Statements</p> <p>Philosophy, aims and objective</p> <p>Current trends and issues in Nursing Administration</p> <p>Theories and models</p> <p>Application to nursing service and education</p> <p>Autonomy and accountability for nursing practice.</p>
III	15 EF5	<p>Planning and control</p> <p>Co-ordination and delegation</p> <p>Decision making – decentralization basic goals of decentralization.</p> <p>Strategic planning</p> <p>Operational plans</p> <p>Management plans</p> <p>Programme evaluation and review technique(PERT), Gantt chart,</p> <p>Management by objectives(MBO)</p> <p>Planning new venture</p> <p>Planning for change</p>

		Innovations in nursing Application to nursing service and education
IV	15 EF5	Organisation Concept , principles, objectives, Types and theories, Minimum requirements for organisation, Developing an organizational Structure, levels, organizational Effectiveness and organizational, Climate, Organising nursing services and patient care: Methods of patient assignment- Advantages and disadvantages, primary nursing care, Planning and Organising: hospital, unit and ancillary services(specifically central sterile supply department, laundry, kitchen, laboratory services, emergency etc) Disaster management: plan, resources, drill, etc Application to nursing service and education
V	15 EF5	Human Resource for health Staffing Philosophy Norms: Staff inspection unit(SIU), Bajaj Committee, High power committee, Indian nursing council (INC) Estimation of nursing staff requirement- activity analysis Various research studies Recruitment: credentialing, selection, placement, promotion Retention Personnel policies Termination Staff development programme Duties and responsibilities of various category of nursing personnel Applications to nursing service and education

<p>VI</p>	<p>15</p> <p>EF5</p>	<p>Directing</p> <p>Roles and functions</p> <p>Motivation: Intrinsic, extrinsic, Creating motivating climate, Motivational theories</p> <p>Communication : process, types, strategies, Interpersonal communication, channels, barriers, problems, Confidentiality, Public relations</p> <p>Delegation; common delegation errors</p> <p>Managing conflict: process, management, negotiation, consensus</p> <p>Collective bargaining: health care labour laws, unions, professional associations, role of nurse manager</p> <p>Occupational health and safety</p> <p>Application to nursing service and education</p>

***EF- External Faculty**

PRACTICALS

1. Prepare prototype personal files for staff nurses, faculty and cumulative records
2. Preparation of budget estimate, revised estimate and performance budget
3. Plan and conduct staff development programme
4. Preparation of Organization Chart
5. Developing nursing standards/protocols for various units
6. Design a layout plan for specialty units /hospital, community and educational institutions
7. Preparation of job description of various categories of nursing personnel
8. Prepare a list of equipments and supplies for specialty units
9. Assess and prepare staffing requirement for hospitals, community and educational institutions
10. Plan of action for recruitment process
11. Prepare a vision and mission statement for hospital, community and educational institutions
12. Prepare a plan of action for performance appraisal.
13. Identify the problems of the specialty units and develop plan of action by problem solving approach
14. Plan a duty roster for specialty units/hospital, community and educational institutions
15. Prepare: anecdotes, incident reports, day and night reports, handing and taking over

reports, enquiry reports, nurse's notes, official letters, curriculum vitae, presentations etc.

16. Prepare a plan for disaster management

17. Observation visit to a multispecialty teaching hospital and College and School of Nursing

Methods of Teaching

- Lecture cum discussion
- Seminar / Presentations
- Workshop

Methods of evaluation

- Tests
- Presentation
- Written assignments

Internal Assessment Techniques	Weightage (%)
Sessional exam (3)	50
Assignments	25
Seminar/presentations	25

Total **100%**

Assignments

Theory

Statement of Philosophy, mission, vision and objective of a hospital. Prepare Job Descriptions of Various Categories of Nursing Personnel. Prepare Budget estimate for Nursing Department.

Compute Staffing Requirement of hospital (Yearly, Monthly, Weekly.)

Performance Appraisal Format for Nursing Staff.

Practical

Nursing Rounds	2
Clinical Teaching of Students	1
Staff Development Programme	1

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING-II

SUB SPECIALITY – **CARDIO VASCULAR AND THORACIC NURSING**

Placement : II year

Hours of Instruction

Theory : 150 hours.

Nursing Faculty:-125 hrs

External Faculty:-25 hrs

Practical : 1450 hours.

Total : 1600 hours.

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of cardiovascular and thoracic nursing. It will help students to develop advanced skills for nursing intervention in various cardio medical and surgical conditions. It will enable the student to function as Cardio vascular and Thoracic Nurse practitioner/specialist. It will further enable the student to function as educator, manager and researcher in the field of cardio vascular and thoracic nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate trends and issues related to cardio vascular and thoracic Nursing.
2. Describe the epidemiology, etiology, patho-physiology and diagnostic assessment of cardio vascular and thoracic conditions
3. Participate in national health programs for health promotion, prevention and rehabilitation of patients with cardio vascular and thoracic conditions
4. Perform physical, psychosocial & spiritual assessment
5. Assist in various diagnostic, therapeutic and surgical procedures
6. Apply nursing process in providing comprehensive care to patients with cardio vascular and thoracic conditions
7. Demonstrate advance skills/competence in managing patients with cardio vascular and thoracic conditions including Advance Cardiac Life Support.

8. Describe the various drugs used in cardio vascular and thoracic conditions and nurses responsibility
9. Demonstrate skill in handling various equipments/gadgets used for critical care of cardio vascular and thoracic patients
10. Appreciate team work & coordinate activities related to patient care.
11. Practice infection control measures.
12. Identify emergencies and complications & take appropriate measures
13. Discuss the legal and ethical issues in cardio vascular and thoracic nursing
14. Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs.
15. Appreciate the role of alternative system of medicine in care of patient
16. Incorporate evidence based nursing practice and identify the areas of research in the field of cardio vascular and thoracic nursing
17. Identify the sources of stress and manage burnout syndrome among health care providers.
18. Teach and supervise nurses and allied health workers.
19. Design a layout of ICCU and ICTU and develop standards for cardio vascular and thoracic nursing practice.

CONTENT OUTLINE

Unit	Hours	Content
1	5	Introduction: <ul style="list-style-type: none"> <input type="checkbox"/> Historical development, trends and issues in the field of cardiology. <input type="checkbox"/> Cardio vascular and thoracic conditions – major health problem. <input type="checkbox"/> Concepts, principles and nursing perspectives <input type="checkbox"/> Ethical and legal issues <input type="checkbox"/> Evidence based nursing and its application in cardio vascular and thoracic nursing(to be incorporated in all the units)
II	5	Epidemiology <ul style="list-style-type: none"> <input type="checkbox"/> Risk factors: hereditary, psycho social factors, hypertension, smoking, obesity, diabetes mellitus etc <input type="checkbox"/> Health promotion, disease prevention, Life style modification <input type="checkbox"/> National health programs related to cardio vascular and thoracic
☆		46

		<p>conditions</p> <ul style="list-style-type: none"> <input type="checkbox"/> Alternate system of medicine <input type="checkbox"/> Complementary therapies
III	5	<p>Review of anatomy and physiology of cardio vascular and respiratory system</p> <ul style="list-style-type: none"> <input type="checkbox"/> Review of anatomy and physiology of heart, lung, thoracic cavity and blood vessels. Embryology of heart and lung. <input type="checkbox"/> Coronary circulation, Foetal Circulation <input type="checkbox"/> Hemodynamics and electro physiology of heart. <input type="checkbox"/> Bio-chemistry of blood in relation to cardio pulmonary function
IV	20 EF5	<p>Assessment and Diagnostic Measures:</p> <p>History taking</p> <p>Physical assessment</p> <ul style="list-style-type: none"> <input type="checkbox"/> Heart rate variability: Mechanisms , measurements, pattern, factors, impact of interventions on HRV Diagnostic tests <input type="checkbox"/> Hemodynamic monitoring: Technical aspects, monitoring, functional hemodynamic indices, ventricular function indices, output measurements (Arterial and swan Ganz monitoring). Blood gases and its significance, oxygen supply and demand <input type="checkbox"/> Radiologic examination of the chest: interpretation, chest film findings <input type="checkbox"/> Electro cardiography(ECG) : electrical conduction through the heart, basic electrocardiography, 12 lead electrocardiogram, axis determination - ECG changes in: intraventricular conduction abnormalities- Arrhythmias, ischemia, injury and infarction, atrial and ventricular enlargement, electrolyte imbalance, <input type="checkbox"/> Echocardiography: technical aspects, special techniques, echocardiography of cardiac structures in health and disease, newer techniques <input type="checkbox"/> Nuclear and other imaging studies of the heart: Magnetic Resonance Imaging. <input type="checkbox"/> Cardio electrophysiology procedures: diagnostic studies, interventional and catheter ablation, nursing care
	☆	47

		<ul style="list-style-type: none"> □ Exercise testing: indications and objectives, safety and personnel, pretest considerations, selection, interpretation, test termination, recovery period □ Cardiac catheterization: indications, contraindications, patient preparation, procedure, interpretation of data □ Pulmonary function test: Bronchoscopy and graphies □ Interpretation of diagnostic measures □ Nurse’s role in diagnostic tests <p>• Pneumonias Laboratory tests using blood: Blood specimen collection, Cardiac markers, Blood lipids, Hematologic studies, Blood cultures, Coagulation studies, Arterial blood gases, Blood Chemistries, cardiac enzyme studies, Serum Concentration of Selected drugs. Interpretation and role of nurse.</p>
V	25 EF4	<p>Cardiac disorders and nursing management:</p> <p>Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, newer treatment modalities and nursing management of:</p> <ul style="list-style-type: none"> • Hypertension • Coronary Artery Disease. • Angina of various types. • Cardiomegaly • Myocardial Infarction, Congestive cardiac failure • Heart Failure, Pulmonary Edema, Shock. • Rheumatic heart disease and other Valvular Diseases • Inflammatory Heart Diseases, Infective Endocarditis, Myocarditis, Pericarditis. • Cardiomyopathy, dilated, restrictive, hypertrophic. • Arrhythmias, heart block <p>Associated illnesses</p>
VI	10 EF3	<p>Altered pulmonary conditions</p> <p>Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of:</p> <ul style="list-style-type: none"> • Bronchitis • Bronchial asthma • Bronchiectasis <ul style="list-style-type: none"> • Lung abscess, lung tumour • Pulmonary tuberculosis, fibrosis, pneumoconiosis etc

		<ul style="list-style-type: none"> • Pleuritis, effusion • Pneumo, haemo and pyothorax • Interstitial Lung Disease • Cystic fibrosis • Acute and Chronic obstructive pulmonary disease (conditions leading to) • Cor pulmonale • Acute respiratory failure • Adult respiratory distress syndrome • Pulmonary embolism • Pulmonary Hypertension
VII	10 EF3	<p>Vascular disorders and nursing management</p> <p>Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of:</p> <ul style="list-style-type: none"> • Disorders of arteries • Disorders of the aorta • Aortic Aneurysms, • Aortic dissection • Raynaud’s phenomenon • Peripheral arterial disease of the lower extremities • Venous thrombosis • Varicose veins • Chronic venous insufficiency and venous leg ulcers • Pulmonary embolism

Weaning off the ventilator.</p> <p>Nursing assessment and interventions of ventilated patient</p>
XII	20	<p>Congenital Heart Diseases</p> <p>Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of:</p> <ul style="list-style-type: none"> • Embryological development of heart. • Classification – cyanotic and acyanotic heart disease. • Tetralogy of Fallots. • Atrial Septal Defect, Ventricular Septal Defect., Eisenmenger’s complex. • Patent ductus arteriosus, AP window • Truncus Arteriosus. • Transposition of great arteries. • Total Anomaly of Pulmonary Venous Connection. • Pulmonary stenosis, atresia.

<p>XIII</p>	<p>5</p>	<ul style="list-style-type: none"> • Coarctation of aorta. • Ebstein's anomaly • Double outlet right ventricle, Single ventricle, Hypoplastic left heart syndrome. <p>Pharmacology</p> <p>Review</p> <p>Pharmacokinetics</p> <p>Analgesics/Anti inflammatory agents</p> <p>Antibiotics, antiseptics</p> <p>Drug reaction & toxicity</p> <p>Drugs used in cardiac emergencies</p> <p>Blood and blood components</p> <ul style="list-style-type: none"> • Thrombolytic agents • Inotropic agents • Beta-blocking agents • Calcium channel blockers. • Vaso constrictors • Vaso dilators • ACE inhibitors. • Angiotensin receptor blockers • Anticoagulants • Antiarrhythmic drugs. • Anti hypertensives • Diuretics • Sedatives and tranquilizers. • Digitalis. • Antilipemics <p>Principles of drug administration, role and responsibilities of nurses and care of drugs</p>
<p>XIV</p>	<p>5</p>	<p>Nursing Care of patient undergoing cardio thoracic surgery</p> <p>Indications, selection of patient</p> <p>Preoperative assessment and preparation; counseling.</p>

Intra-operative care: Principles of open heart surgery, equipment, anesthesia, cardiopulmonary bypass.

Surgical procedures for Coronary Artery Bypass Grafting, recent advances and types of grafts, Valve replacement or reconstruction, cardiac transplant, Palliative surgery and different Stents, vascular surgery, other recent advances.

Thoracic surgery: lobectomy, pneumonectomy, tumour excision etc

Immediate postoperative care : assessment, post operative problems and interventions : Bleeding, Cardiac tamponade, Low cardiac output, Infarction, Pericardial effusion, Pleural effusion, Pneumothorax, Haemothorax, Coagulopathy, Thermal imbalance, Inadequate ventilation/perfusion, Neurological problems, renal problems, Psychological problems.

Chest physiotherapy
Nursing interventions- life style modification, complementary therapy/alternative systems of medicine.

Intermediate and late post operative care after CABG, valve surgery,others.

Follow up care

Cardiac rehabilitation
Process
Physical evaluation
Life style modification
Physical conditioning for cardiovascular efficiency through exercise
Counseling
Follow up care

Intensive Coronary Care Unit/intensive cardio thoracic unit:

Quality assurance

- Standards, Protocols, Policies, Procedures
- Infection control; Standard safety measures
- Nursing audit
- Design of ICCU/ICTU
- Staffing; cardiac team
- Burn out syndrome

Nurse's role in the management of I.C.C.U and ICTU.

Mobile coronary care unit.

Planning inservice educational programme and teaching

Practicals

Total – 1450 Hours

1 Weeks = 48 Hours

Essential Nursing Skills

Procedures to be observed

1. Echo cardiogram
2. Ultrasound
3. Monitoring JVP , CVP
4. CT SCAN
5. MRI

6. PET SCAN
7. Angiography
8. Cardiac catheterization
9. Angioplasty
10. Various Surgeries
11. Any other

I. Procedures to be assisted

1. Arterial blood gas analysis
2. Thoracentesis
3. Lung biopsy
4. Computer assisted tomography (CAT Scan)
5. M.R.I.
6. Pulmonary angiography
7. Bronchoscopy
8. Pulmonary function test
9. ET tube insertion
10. Tracheostomy tube insertion
11. Cardiac catheterization
12. Angiogram
13. Defibrillation
14. Treadmill test
15. Echo cardiography
16. Doppler ultrasound
17. Cardiac surgery
18. Insertion of chest tube
19. CVP Monitoring
20. Measuring pulmonary artery pressure by Swan-Ganz Catheter
21. Cardiac Pacing

II. Procedures to be Performed

1. Preparation of assessment tool for CT client (Cardiac, thoracic and vascular).
2. ECG – Recording, Reading, Identification of abnormalities

3. Oxygen therapy – Cylinder, central supply, Catheter, nasal canula, mask, tent, through ET and tracheostomy tube, manual resuscitation bag.
4. Mechanical ventilation
5. Spirometer
6. Tuberculin skin test
7. Aerosol therapy
8. Nebulizer therapy
9. Water seal drainage
10. Chest physiotherapy including – Breathing Exercises, Coughing Exercises, Percussion & Vibration
11. Suctioning – Oropharyngeal, nasotracheal, Endotracheal
12. Through tracheostomy tube
13. Artificial airway cuff maintenance
14. CPR
15. Care of client on ventilator
16. Identification of different – Arrhythmias, abnormal pulses, respirations, B.P. Variation, Heart sounds, Breath sounds
17. Pulse oxymetry
18. Introduction of intracath
19. Bolus I.V. Injection
20. Life line
21. Maintenance of —Heplock||
22. Subcutaneous Injection of Heparin
23. Obtaining leg measurements to detect early swelling in thrombophlebetis
24. Identification of Homans sign
25. Buerger – Allen exercises

Assignments

Nursing care study -2

Nursing care analysis -2

Nursing care plan based on theories -5

Clinical teaching -5
Design floor plan of cardiovascular and thoracic unit
Organise in service education programme for nurses.

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING - CRITICAL CARE NURSING

Placement: II Year

Hours of instruction

Theory: 150 hours

Nursing Faculty:-115 hrs

External Faculty:-35 hrs

Practical: 1450 hours

Total : 1600 hours

Course Description

This course is designed to assist students in developing expertise and in-depth knowledge in the field of Critical Care Nursing. It will help students to develop advanced skills for nursing intervention in caring for critically ill patients. It will enable the student to function as critical care nurse practitioner/ specialist. It will further enable the student to function as educator, manager and researcher in the field of Critical Care Nursing.

Objectives

At the end of the course the students will be able to

1. Appreciate trends and issues related to Critical Care Nursing.
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of critically ill patients
3. Describe the various drugs used in critical care and nurses responsibility
4. Perform physical, psychosocial & spiritual assessment
5. Demonstrate advance skills/competence in managing critically ill patients including Advance Cardiac Life Support.
6. Demonstrate skill in handling various equipments/gadgets used for critical care
7. Provide comprehensive care to critically ill patients.
8. Appreciate team work & coordinate activities related to patient care.
9. Practice infection control measures.
10. Assess and manage pain.
11. Identify complications & take appropriate measures.
12. Discuss the legal and ethical issues in critical care nursing
13. Assist patients and their family to cope with emotional distress, spiritual, grief and anxiety
14. Assist in various diagnostic, therapeutic and surgical procedures
15. Incorporate evidence based nursing practice and identify the areas of research in the field of critical care nursing
16. Identify the sources of stress and manage burnout syndrome among health care providers.
17. Teach and supervise nurses and allied health workers.
18. Design a layout of ICU and develop standards for critical care nursing practice.

Content Outline

Unit	Hours	Content
I	5	<p>Introduction to Critical Care Nursing</p> <p>Historical review- Progressive patient care(PPC)</p> <p>Review of anatomy and physiology of vital organs, fluid and electrolyte balance, Concepts of critical care nursing, Principles of critical care nursing, Scope of critical care nursing, Critical care unit set up including equipments supplies, use and care of various type of monitors & ventilators,flow sheets.</p>
II	10	<p>Concept of Holistic care applied to critical care nursing practice</p> <p>Impact of critical care environment on patients:-</p> <ul style="list-style-type: none"> • Risk factors, Assessment of patients, Critical care psychosis, prevention & nursing care for patients affected with psycho physiological & psychosocial problems of critical care unit, Caring for the patient's family, family teaching, The dynamics of healing in critical care unit:-therapeutic touch, Relaxation, Music therapy, Guided Imagery, acupressure, <p>Stress and burnout syndrome among health team members.</p> <p>Prevention & nursing care for patients affected with psycho physiological & psychosocial problems of critical care unit.</p> <p>Caring for the patient's family, family teaching..</p>
III	14	<p>Review</p> <p>Pharmacokinetics</p> <p>Analgesics/Anti inflammatory agents</p> <p>Antibiotics,antiseptics</p> <p>Drug reaction & toxicity</p> <p>Drugs used in critical care unit (inclusive of ionotropic , life saving drugs)</p> <p>Drugs used in various body systems</p> <p>IV fluid and electrolytes</p> <p>Blood and blood components</p> <p>Principles of drug administration ,role of nurses and care of drugs.</p>

IV	5	<p>Pain Management</p> <p>Pain & Sedation in Critically ill patients</p> <p>Theories of pain, Types of pain, Pain assessment, Systemic responses to pain</p> <p>pain management-pharmacological and non-pharmacological measures Placebo effect</p>
V	5	<p>Infection control in intensive care unit</p> <p>Nosocomial infection in intensive care unit; methicilline resistant, staphylococcus aureus (MRSA), Disinfection, Sterilization, Standard safety measures, Prophylaxis for staff</p>
VI	10 EF3	<p>Gastrointestinal System</p> <p>Causes, Pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Acute Gastrointestinal Bleeding, Abdominal injury, Hepatic Disorders:-Fulminant hepatic failure, Hepatic encephalopathy, Acute Pancreatitis, Acute intestinal obstruction, perforative peritonitis</p>
VII	10 EF3	<p>Renal System</p> <p>Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Acute Renal Failure, Chronic Renal Failure, Acute tubular necrosis, Bladder trauma</p> <p>Management Modalities: Hemodialysis, Peritoneal Dialysis, Continuous Ambulatory Peritoneal Dialysis, Continuous arterio-venous hemodialysis, Renal Transplantation</p>
VIII	10 EF4	<p>Nervous System</p> <p>Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Common Neurological Disorders:- Cerebrovascular disease, Cerebrovascular accident, Seizure disorders, GuilleinBarre-Syndrome, Myasthenia Gravis, Coma, Persistent vegetative state, Encephalopathy, Head injury, Spinal Cord injury</p>
		Management Modalities: Assessment of Intracranial pressure,

		Management of intracranial hypertension, Craniotomy, Problems associated with neurological disorders: Thermo regulation, Unconsciousness, Herniation syndrome
IX	5 EF3	Endocrine System Causes, Pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing Management of :- Hypoglycemia, Diabetic Ketoacidosis, Thyroid crisis, Myxoedema, Adrenal crisis, Syndrome of Inappropriate/ hypersecretion of Antidiuretic Hormone (SIADH)
X	15 EF4	Management of other Emergency Conditions Mechanism of injury, Thoracic injuries, Abdominal injuries, pelvic fractures, complications of trauma, Head injuries Shock: Shock syndrome, Hypovolemic, Cardiogenic, Anaphylactic, Neurogenic and Septic shock Systemic inflammatory Response: The inflammatory response, Multiple organ dysfunction syndrome Disseminated Intravascular Coagulation Drug Overdose and Poisoning, Acquired Immunodeficiency Syndrome (AIDS) Ophthalmic: Eye injuries, Glaucoma, retinal detachment Ear Nose Throat: Foreign bodies, stridor, bleeding, quincy, acute allergic conditions Psychiatric emergencies;, suicide, crisis intervention
XI	20 EF6	Cardiovascular emergencies Principles of Nursing in caring for patient's with Cardiovascular disorders Assessment: Cardiovascular system: Heart sounds, Diagnostic studies:- Cardiac enzymes studies, Electrocardiographic monitoring, Holter monitoring, Stress test. Echo cardiography, Coronary angiography, Nuclear medicine studies Causes, Pathophysiology, Clinical types, Clinical features Diagnostic Prognosis, Management : Medical, Surgical &

<p>XII</p>	<p>15 EF4</p>	<p>Nursing management of:-Hypertensive crisis, Coronary artery disease,Acute Myocardial infarction, Cardiomyopathy, Deep vein thrombosis, Valvular diseases, Heart block, Cardiac arrhythmias & conduction disturbances, Aneurysms, Endocarditis, Heart failure, Cardio pulmonary resuscitation BCLS/ ACLS</p> <p>Management Modalities: Thrombolytic therapy, Pacemaker</p> <p>–temporary & permanent, Percutaneous transluminal coronary angioplasty, Cardioversion, Intra Aortic Balloon pump monitoring, Defibrillations, Cardiac surgeries, Coronary Artery Bypass Grafts (CABG/MIDCAB), Valvular surgeries, Heart Transplantation, Autologous blood transfusion, Radiofrequency Catheter Ablation</p> <p>Respiratory System</p> <p>Acid-base balance & imbalance</p> <p>Assesment : History & Physical Examination</p> <p>Diagnostic Tests:Pulse Oximetry, End –Tidal Carbon Dioxide,Monitoring, Arterial blood gas studies, chest radiography,pulmonary Angiography, Bronchoscopy, Pulmonary function Test, Ventilation perfusion scan, Lung ventilation scan</p> <p>Causes, Pathophysiology, Clinical types, Clinical features, Prognosis, Management: Medical, Surgical and Nursing, management of Common pulmonary disorders:-</p> <p>Pneumonia, Status asthmaticus, interstitial lung disease, Pleural effusion, Chronic obstructive pulmonary disease, Pulmonary tuberculosis, Pulmonary edema, Atelectasis, Pulmonary embolism, Acute respiratory failure, Acute respiratory distress syndrome (ARDS), Chest Trauma Haemothorax, Pneumothorax</p> <p>Management Modalities:-Airway Management</p>
------------	-------------------	---

		<p>Ventilatory Management:-Invasive, non- invasive, long term mechanical ventilations</p> <p>Bronchial Hygiene:-Nebulization, deep breathing exercise, chest physiotherapy, postural drainage, Inter Costal Drainage, Thoracic, surgeries</p>

ESSENTIAL CRITICAL CARE NURSING SKILLS

I. Procedures to be observed

1. CT Scan
2. MRI
3. EEG
4. Hemodialysis
5. Endoscopic Retrograde cholangio Pancreaticogram(ERCP)
6. Heart/ Neuro/GI./ Renal Surgeries

II. Procedures to be assisted

1. Advanced life support system
2. Basic cardiac life support
3. Arterial line/arterial pressure monitoring/blood taking
4. Arterial blood gas
5. ECG recording
6. Blood transfusion
7. IV cannulation therapy

8. Arterial Catheterization
9. Chest tube insertion
10. Endotracheal intubations
11. Ventilation
12. Insertion of central line/cvp line
13. Connecting lines for dialysis

III. Procedure to be Performed

1. Airway management
 - a. Application of oropharyngeal airway
 - b. Oxygen therapy
 - c. CPAP (Continuous Positive Airway pressure)
 - d. Care of tracheostomy
 - e. Endotracheal extubation
2. Cardiopulmonary resuscitation, Basic cardiac life support, ECG
3. Monitoring of critically ill patients – clinically with monitors, capillary refill time (CRT) assessment of jaundice, ECG.
4. Gastric lavage
5. Assessment of critically ill patients
 Identification & assessment of risk factors, Glasgow coma scale, and dolls eye movement, arterial pressure monitoring, cardiac output/pulmonary artery pressure monitoring, and detection of life threatening abnormalities
6. Admission & discharge of critically ill patients
7. Nutritional needs – gastrostomy feeds, pharyngeal feeds, jejunostomy feeds, TPN, formula preparation & patient education.
8. Assessment of patient for alteration in blood sugar levels monitoring blood sugar levels periodically & administering insulin periodically.
9. Administration of drugs: IM, IV injection, IV cannulation & fixation of infusion pump, calculation of dosages, use of insulin syringes/ tuberculin, monitoring fluid therapy, blood administration.
10. Setting up dialysis machine and starting, monitoring and closing dialysis
11. Procedures for prevention of infections:
 Hand washing, disinfection & sterilization surveillance, and fumigation universal

precautions.

12. Collection of specimen.

13. Setting, use & maintenance of basic equipment, ventilator, O2 analyzer, monitoring equipment, transducers, defibrillator, infusion & syringe pumps, centrifuge machine.

IV Other Procedures (If any):

CLINICAL SPECIALTY-II

MEDICAL SURGICAL NURSING- **ONCOLOGY NURSING**

Placement : II Year

Hours of Instruction

Theory : 150 hours

Nursing Faculty:-125hrs

External Faculty:-25hrs

Practicals : 1450 hours

Total : 1600 hours

Course Description

This course is designed to assist students in developing expertise and indepth understanding in the field of oncology Nursing. It will help students to develop advanced skills for nursing intervention in various oncological conditions. It will enable the student to function as oncology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of oncology nursing

Objectives

1. Explain the prevention, screening and early detection of cancer
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of oncological disorders of various body systems
3. Describe the psychosocial effects of cancer on patients and families.
4. Demonstrate skill in administering/assisting in various treatment modalities used for patients with cancer
5. Apply nursing process in providing holistic care to patients with cancer.
6. Apply specific concepts of pain management
7. Appreciate the care of death and dying patients and value of bereavement support.
8. Describe the philosophy, concept and various dimensions of palliative care.
9. Appreciate the role of alternative systems of medicine in care of cancer patients.
10. Appreciate the legal & ethical issues relevant to oncology nursing

11. Recognize and manage oncological emergencies
12. Counsel the patients with cancer and their families
13. Incorporate evidence based nursing practice and identify the areas of research in the field of oncology nursing
14. Recognize the role of oncology nurse practitioner as a member of oncology team.
15. Collaborate with other agencies and utilize resources in caring for cancer patients.
16. Teach and supervise nurses and allied health workers.
17. Design a layout and develop standards for management of oncology units/hospitals and nursing care.

Content outline

UNIT	HOURS	CONTENT
I	4	<p>Introduction</p> <ul style="list-style-type: none"> <input type="checkbox"/> Epidemiology-Incidence, Prevalence – Global, National, State and Local <input type="checkbox"/> Disease burden, concept of cancer, risk factors <input type="checkbox"/> Historical perspectives <input type="checkbox"/> Trends and issues <input type="checkbox"/> Principles of cancer management <input type="checkbox"/> Roles and responsibilities of oncology nurse
II	5 EF5	<p>The Nature of Cancer</p> <ul style="list-style-type: none"> <input type="checkbox"/> Normal cell biology <input type="checkbox"/> The immune system <input type="checkbox"/> Pathological and pathophysiological changes in tissues <ul style="list-style-type: none"> o Biology of the cancer cell o Clone formation Transformation o Tumor stem lines o Structure of a solid tumor o Products produced by the tumor o Systemic effects of tumor growth

X	30	<p>Nursing Care of Patients With Specific Malignant Disorders.</p> <ul style="list-style-type: none"> ☐ Malignancies of G.I. system-oral, oesophagus, stomach, rectal,liver& pancreas, care of ostomies/stoma ☐ Respiratory malignancies, ☐ Genito urinary system malignancies- prostate Bladder, renal, testicular malignancies, Gynecological malignancies-cervix, uterus, ovary , Hematological malignancies-Lymphomas, Leukemias. ☐ Malignancies of musculoskeletal system, Endocrine malignancies ☐ Skin

- Head and Neck -brain tumors,
- Other malignancies – Breast cancer, AIDS related Malignancies(Kaposi's Sarcoma)

XI 10 Paediatric malignancies

- Leukemia, Lymphoma, Neuro- blastoma
- Wilm's tumor, Soft tissue sarcoma, Retinoblastoma
- Nursing Management of children with Paediatric Malignancies

XII 15 Nursing Management of Physiological Conditions and Symptoms of Cancer Patient

- Nutrition: - effects of cancer on nutritional Status and its consequences:-Anemia, Cachexia, Xerostomia, mucositis, Dysphagia , nausea and vomiting, constipation, diarrhoea, electrolyte imbalances, taste alterations
- Impaired mobility: Decubitus ulcer, pathologic fractures, thrombophlebitis, pulmonary embolism, contractures, footdrop.

Other symptoms

- Dyspepsia & hiccup, dyspnoea
- intestinal obstruction,
- Fungating wounds,
- Anxiety & depression,
- Insomnia,
Lymph edema

Impact of cancer on sexuality:

- Effects of radiotherapy/ chemotherapy/surgery on sexuality of the cancer patient.
- Nursing management of cancer patients experiencing sexual dysfunction
- Sexual counselling

□

15. Paracentesis
16. Lumbar Puncture

17. Arterial Blood Gas
18. Nerve Block
19. Chest tube insertion
20. Intercostal drainage
21. CVP monitoring

Procedure to be Performed

1. Screening for cancer
2. Assessment of pain
3. Assessment of Nutritional status
4. Care of Tracheostomy
5. Endotracheal intubation
6. Gastric gavage
7. Pap smear
8. IV cannulation
9. Care of surgical flaps
10. Care of ostomies
11. Blood transfusion and component therapy
12. Counseling
13. Practice standard safety measures
14. Care of dead body and mortuary formalities

Other procedures

(As per the institutional protocol):

1. Alternative therapies

Assignments

Nursing care study -2

Nursing care analysis -2

Nursing care plan based on theories -5

Clinical teaching -5

Design floor plan of oncology unit

Organise in service education programme for nurses

CLINICAL SPECIALTY – II

MEDICAL SURGICAL NURSING- NEUROSCIENCES NURSING

Placement : II Years

Hours of Instruction

Theory – 150 Hours

Nursing Faculty:-110 hrs

External Faculty:-40hrs

Practical- 1450 Hours

Total : 1600 Hours

Course Description

This course is designed to assist students in developing expertise and indepth knowledge in the field of neurology and neurosurgical Nursing. It will help students to develop advanced skills for nursing intervention in caring for patients with neurological and neurosurgical disorders. It will enable the student to function as neuroscience nurse practitioner/ specialist. It will further enable the student to function as educator, manager and researcher in the field of neurology and neurosurgical Nursing.

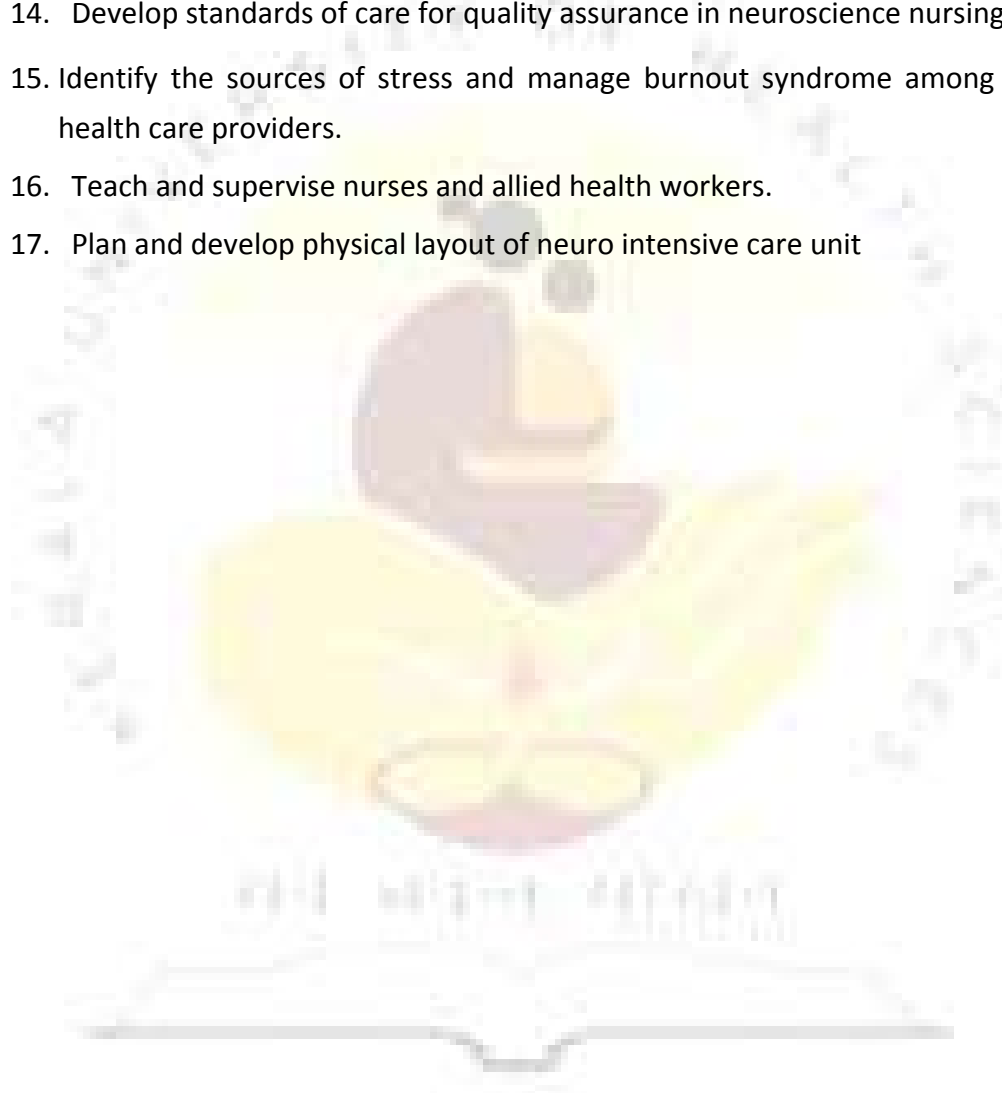

Objectives

At the end of the course the students will be able to

1. Appreciate trends and issues related to Neurology and Neurosurgical Nursing.
2. Review the anatomy and physiology of Nervous system
3. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of patients with Neurological and Neurosurgical disorders
4. Perform Neurological assessment and assist in diagnostic procedures
5. Describe the concepts and principles of Neuroscience nursing
6. Describe the various drugs used in neurosciences and nurses responsibility
7. Assist in various therapeutic and surgical procedures in Neuroscience nursing.
8. Demonstrate advance skills/competence in managing patients with neurological and neurosurgical disorder following nursing process approach
9. Identify psychosocial problems of patients with disabilities and assist patients and their family to cope with emotional distress, spiritual, grief and anxiety
10. Participate in preventive, promotive and rehabilitative services for

neurological and neurosurgical patients.

11. Explain the legal and ethical issues related to brain death, organ transplantation and practice of neuroscience nursing
12. Incorporate evidence based nursing practice and identify the areas of research in the field of neuroscience nursing
13. Organise and conduct inservice education program for nursing personnel.
14. Develop standards of care for quality assurance in neuroscience nursing practice
15. Identify the sources of stress and manage burnout syndrome among health care providers.
16. Teach and supervise nurses and allied health workers.
17. Plan and develop physical layout of neuro intensive care unit

Unit	Hours	Content
I	5	<p>Introduction</p> <ul style="list-style-type: none"> <input type="checkbox"/> Introduction to neuroscience(neurological and neurosurgical) nursing • History-Development in neurological and neurosurgical nursing, Service & education • Emerging trends and issues in neurology and Neurosurgery and its implication to nursing. • Neurological and Neurosurgical problems – • Concepts, principles and nursing perspectives • Ethical and legal issues • Evidence based nursing and its application in Neurological and neurosurgical nursing.
II	5	<p>Epidemiology</p> <ul style="list-style-type: none"> <input type="checkbox"/> Major health problems- <input type="checkbox"/> Risk factors associated with neurological conditions- Hereditary, Psychosocial factors, smoking, alcoholism, dietary habits, cultural and ethnic considerations, occupational and infections. <input type="checkbox"/> Health promotion, disease prevention, lifestyle modification and its implications to nursing. <input type="checkbox"/> Alternate system of medicine/complementary therapies
III	10	<p>Review of Anatomy and physiology</p> <ul style="list-style-type: none"> <input type="checkbox"/> Embryology <input type="checkbox"/> Structure and functions of Nervous system- CNS, ANS, cerebral circulation , cranial and spinal nerves and reflexes, motor and sensory functions. <ul style="list-style-type: none"> <input type="checkbox"/> Sensory organs

<p>IV</p>	<p>15 EF4</p>	<p>Assessment and diagnostic measures</p> <ul style="list-style-type: none"> <input type="checkbox"/> Assessment
		<ul style="list-style-type: none"> • History taking • Physical assessment, psychosocial assessment • Neurological assessments, Glasgow coma scale interpretation & its relevance to nursing. • Common assessment abnormalities <input type="checkbox"/> Diagnostic measures • Cerebro spinal fluid analysis • Radiological studies-Skull and spine X-ray Cerebral Angiography, CT Scan, Single Photon Emission Computer Tomography(SPECT), MRI (Magnetic Resonance Imaging), MRA, MRS, Functional MRI, Myelography, PET (Positron Emission Test), Interventional radiology. • Electrographic studies- Electro encephalography, MEG, EMG, video EEG • Nerve conduction studies-Evoked potentials, visual evoked potentials, brain stem auditory evoked potentials, somatosensory evoked potentials • Ultrasound studies-Carotid duplex, transcranial Doppler sonography, • Immunological studies • Biopsies – muscle, nerve and Brain. <p>Interpretation of diagnostic measures Nurse's role in diagnostic tests</p>
<p>V</p>	<p>5</p>	<p>Meeting Nutritional needs of neurological patients</p> <ul style="list-style-type: none"> <input type="checkbox"/> Basic nutritional requirements <input type="checkbox"/> Metabolic changes following injury and starvation <input type="checkbox"/> Nutritional assessment <input type="checkbox"/> Common neurological problems that interfere with nutrition and strategies for meeting their nutritional needs <input type="checkbox"/> Special metabolic and electrolyte imbalances <input type="checkbox"/> Chronic fatigue syndrome

ESSENTIAL NEURO NURSING SKILLS

I. Procedures to be observed

1. CT scan
2. MRI
3. PET
4. EEG
5. EMG
6. Sleep pattern studies/Therapy
7. Radiographical studies
8. Neuro surgeries
9. Nerve conduction studies
10. Ultrasound studies

II. Procedures to be assisted

1. Advanced Cardiac life support
2. Lumbar Puncture
3. Biopsies – muscle, nerve and Brain
4. Arterial Blood Gas
5. ECG Recording
6. Blood transfusion
7. IV cannulation – open method
8. Endotracheal intubation
9. Ventilation
10. Tracheostomy
11. ICP monitoring
12. Gama Knife
13. Cerebral angiography
14. Myelography
15. Neuro surgeries

III. Procedures to be Performed:

1. Airway management
 - a. Application of Oro Pharyngeal Airway
 - b. Care of Tracheostomy
 - c. Conduct Endotracheal Intubation

- d. use of AMBU bag, artificial respirators
- e. Setting of Ventilators and Care of patients on ventilators
2. Cardio Pulmonary Resuscitation -Defibrillation
3. Neurological assessment -Glasgow coma scale
4. Gastric Lavage
5. IV Cannulation
6. Administration of emergency IV Drugs, fluid
7. Care of patients with incontinence, bladder training ,Catheterization
8. Care of patients on traction related to the neurological conditions
9. Blood Administration.
10. Muscle strengthening exercises
11. Guidance and counseling
12. Monitoring – management and care of monitors.

IV. Other Procedures if any:

Assignments

- Nursing care study -2
- Nursing care analysis -2
- Nursing care plan based on theories -5
- Clinical teaching -5
- Design floor plan of neurosurgery unit
- Organise in service education programme for nurses

CLINICAL SPECIALTY – II

MEDICAL SURGICAL NURSING- NEPHRO-UROLOGY NURSING

Placement : II Year

Hour of Instruction

Theory : 150 Hours

Nursing Faculty:-105hrs

External Faculty:-45hrs

Practical : 1450 Hours

Total : 1600 Hours

Course Description

This course is designed to assist students in developing expertise and indepth understanding in the field of Nephro and urological Nursing. It will help students to develop advanced skills for nursing intervention in various nephro and urological conditions. It will enable the student to function as nephro and urology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of nephro and urology nursing

Objectives

At the end of the course the students will be able to:

1. Appreciate trends and issues related to nephro and urological nursing.
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of nephro and urological conditions
3. Perform physical, psychosocial & spiritual assessment.
4. Assist in various diagnostic, therapeutic and surgical interventions.
5. Provide comprehensive nursing care to patients with nephro and rological conditions.
6. Describe the various drugs used in nephro and urological conditions and nurses responsibility.
7. Demonstrate skill in handling various equipments/gadgets used for patients with nephro and urological conditions.
8. Appreciate team work & coordinate activities related to patient care.

9. Practice infection control measures.
10. Identify emergencies and complications & take appropriate measures.
11. Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs.
12. Discuss the legal and ethical issues in nephro and urological nursing
13. Identify the sources of stress and manage burnout syndrome among health care providers.
14. Appreciate the role of alternative system of medicine in the care of patient.
15. Incorporate evidence based nursing practice and identify the areas of research in the field of nephro and urological nursing.
16. Teach and supervise nurses and allied health workers.
17. Design a layout of kidney transplant unit and dialysis unit.
18. Develop standards of nephro urological nursing practice.

COURSE CONTENT

Unit	Hours	Content
I	5	<p>Introduction</p> <ul style="list-style-type: none"> □ Historical development: trends and issues in the field of nephro and urological nursing. □ Nephro and urological problems □ Concepts, principles & nursing perspectives, Ethical and legal issues □ Evidence based nursing and its application in nephro & urological nursing (to be incorporated in all the units)
II	5	<p>Epidemiology</p> <ul style="list-style-type: none"> □ Major health problems- urinary dysfunction, urinary tract infections, Glomerular disorders, obstructive disorders and other urinary disorders. □ Risk factors associated with nephro and urological conditions - Hereditary, Psychosocial factors, smoking, alcoholism, dietary habits, cultural and ethnic considerations.

		<ul style="list-style-type: none"> □ Health promotion, disease prevention, life style modification and its implications to nursing. □ Alternate system of medicine/complementary therapies
III	5	<p>Review of anatomy and physiology of urinary system</p> <ul style="list-style-type: none"> □ Embryology □ Structure and functions □ Renal circulation □ Physiology of urine formation □ Fluid and electrolyte balance □ Acid base balance □ Immunology specific to kidney
IV	20 EF12	<p>Assessment and diagnostic measures</p> <ul style="list-style-type: none"> □ History taking □ Physical assessment, psychosocial assessment □ Common assessment abnormalities-dysuria, frequency, enuresis, urgency, hesitancy, hematuria, pain, retention, burning on urination, pneumaturia, incontinence, nocturia, polyuria, anuria, oliguria, □ Diagnostic tests-urine studies,blood chemistry, radiological procedures-KUB,IVP, CT scan nephrotomogram,retrograde pyelogram, renal arteriogram, renalultrasound, , MRI, cystogram, renal scan, biopsy, endoscopy-cystoscopy, urodynamics studies-cystometrogram, urinary flow study, sphincter electromyography, voiding pressure flow study, Video urodynamics, Whitaker study. Interpretation of diagnostic measures. □ Nurse's role in diagnostic tests.
V	5 EF5	<p>Renal immunopathy/Immunopathology</p> <ul style="list-style-type: none"> □ General Concept of immunopathology. □ Immune mechanism of glomerular vascular disease. □ Role of mediator systems in glomerular vascular disease.

<p>VI</p>	<p>20 EF5</p>	<p>Urological Disorders and Nursing Management</p> <ul style="list-style-type: none"> <input type="checkbox"/> Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, medical, surgical & nursing management of urological disorders <input type="checkbox"/> Review - Urinary tract infections- pyelonephritis, lower urinary tract infections. <input type="checkbox"/> Disorders for ureters, bladder and urethra. <input type="checkbox"/> Urinary tract infections. <input type="checkbox"/> Urinary dysfunctions- urinary retention, urinary incontinence, urinary reflux. <input type="checkbox"/> Bladder disorders- neoplasms, calculi, neurogenic bladder, trauma, congenital abnormalities. <input type="checkbox"/> Review - Benign prostrate hypertrophy (BPH). <input type="checkbox"/> Ureteral disorders: ureteritis, ureteral trauma, congenital anomalies of ureters. <input type="checkbox"/> Urethral disorders- tumours, trauma, congenital anomalies of ureters.
<p>VII</p>	<p>25 EF5</p>	<p>Glomerular disorders and nursing management</p> <ul style="list-style-type: none"> <input type="checkbox"/> Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, medical, surgical and nursing management of <input type="checkbox"/> Review - Glomerulo nephritis- chronic, acute, nephrotic syndrome. <input type="checkbox"/> Acute Renal failure and chronic renal failure. <input type="checkbox"/> Renal calculi. <input type="checkbox"/> Renal tumours- benign and malignant. <input type="checkbox"/> Renal trauma. <input type="checkbox"/> Renal abscess. <input type="checkbox"/> Diabetic nephropathy. <input type="checkbox"/> Vascular disorders. <input type="checkbox"/> Renal tuberculosis. <input type="checkbox"/> Polycystic. <input type="checkbox"/> Congenital disorders. <input type="checkbox"/> Hereditary renal disorders. <input type="checkbox"/> Neurogenic bladder
<p>VIII</p>	<p>10 EF4</p>	<p>Management of Renal emergencies</p> <ul style="list-style-type: none"> <input type="checkbox"/> Anuria <input type="checkbox"/> Acute Renal failure <input type="checkbox"/> Poisoning

		<ul style="list-style-type: none"> <input type="checkbox"/> Trauma <input type="checkbox"/> Urine retention <input type="checkbox"/> Acute graft rejection <input type="checkbox"/> Hematuria <input type="checkbox"/> Nurse's role
1X	10	Drugs used in urinary disorders <ul style="list-style-type: none"> <input type="checkbox"/> Classification <input type="checkbox"/> Indications, contraindications, actions & effects, toxic effects <input type="checkbox"/> Role of nurse.
X	10 EF4	Dialysis <ul style="list-style-type: none"> <input type="checkbox"/> Dialysis- Historical, types, Principles, goals <ul style="list-style-type: none"> • Hemodialysis- vascular access sites- temporary and permanent • Peritoneal dialysis <input type="checkbox"/> Dialysis Procedures- steps, equipments, maintenance. <input type="checkbox"/> Role of nurse – pre dialysis, intra and post dialysis, <input type="checkbox"/> Complications <input type="checkbox"/> Counseling <input type="checkbox"/> Patient education <input type="checkbox"/> Records and reports.
XI	10 EF6	Kidney transplantation <ul style="list-style-type: none"> <input type="checkbox"/> Nursing management of a patient with kidney transplantation <input type="checkbox"/> Kidney transplantations- a historical review <input type="checkbox"/> Immunology of graft rejections <input type="checkbox"/> The recipient of a renal transplant <input type="checkbox"/> Renal preservations. <input type="checkbox"/> Human Leucocytic Antigen(HLA) typing matching and cross matching in renal transplantation <input type="checkbox"/> Surgical techniques of renal transplantations. <input type="checkbox"/> Chronic renal transplant rejection <input type="checkbox"/> Complication after KTP: Vascular and lymphatic, Urological, cardiovascular, liver and neurological, infectious complication.

		<ul style="list-style-type: none"> □ KTP in children and management of pediatric patient with KTP □ KTP in developing countries □ Results of KTP □ Work up of donor and recipient for renal transplant □ Psychological aspect of KTP and organ donations □ Ethics in transplants, Cadaveric transplantation.
XII	5	Rehabilitation of patient with nephrological problems <ul style="list-style-type: none"> □ Risk factors and prevention. □ Rehabilitation of patients on dialysis and after kidney transplant □ Rehabilitation of patients after urinary diversions □ Family and patient teaching
XIII	10 EF4	Pediatric urinary disorders <ul style="list-style-type: none"> □ Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, medical, surgical and nursing management of children with Renal Diseases -UTI, ureteral reflux, glomerulonephritis, nephrotic syndrome infantile nephrosis, cystic kidneys, familial factors in renal diseases in childhood, Haemolytic uraemic syndrome. Benign recurrent haematuria, nephropathy, wilms tumour.
XIV	5	Critical care units- dialysis , KTP unit <ul style="list-style-type: none"> □ Philosophy, aims and objectives □ Policies, staffing pattern, design and physical plan of Dialysis and KTP units, □ Team approach, functions, □ Psychosocial aspects in relation to staff and clients of ICU, dialysis unit, □ In-service education, □ Ethical and legal issues.
XV	5	Quality assurance in nephrological nursing practice <ul style="list-style-type: none"> □ Role of advance practitioner in nephrological nursing. □ Professional practice standards

- Quality control in nephrological nursing
- Nursing audit.

Sessional exams -3	50%	Ongoing assessment	40%
Term paper - 1	25%	Clinical assignments	40%
Seminars/Presentations	25%	Internal examination	20%
Total	100%	TOTAL	100%

Procedures to be observed

I. Procedures Observed

1. CT Scan
2. MRI
3. Radiographic studies
4. Urodynamics
5. Hemodialysis
6. Renal Surgeries

II. Procedures to be assisted

1. Blood transfusion
2. I V cannulation therapy
3. Arterial Catheterization
4. Insertion of central line/cvp line
5. Connecting lines for dialysis
6. Peritoneal dialysis
7. Renal biopsy
8. Endoscopies- Bladder, urethra

III. Procedures to be performed

1. Health assessment
2. Insertion of urethral and suprapubic catheters
3. Urine analysis
4. Catheterisation
5. Peritoneal dialysis
6. Bladder irrigation
7. Care of ostomies
8. Care of urinary drainage
9. Bladder training
10. Care of vascular access
11. Setting up dialysis machine and starting, monitoring and closing dialysis

12. Procedures for prevention of infections:
13. Hand washing, disinfection & sterilization surveillance, fumigation and universal precautions.
14. Collection of specimen.
15. Administration of drugs: IM, IV injection, IV cannulation & fixation of infusion pump, calculation of dosages, blood administration. Monitoring -fluid therapy, electrolyte imbalance.
16. Nutritional needs , diet therapy & patient education.
17. Counselling

IV. OTHER PROCEDURES IF ANY:

Assignments

- Nursing care study -2
- Nursing care analysis -2
- Nursing care plan based on theories -5
- Clinical teaching -5
- Design floor plan of transplantation unit
- Organise in service education programme for nurses

CLINICAL SPECIALTY – II

MEDICAL SURGICAL NURSING - ORTHOPEDIC NURSING

Placement : II Year

Hours of Instruction

Theory : 150 Hours

Nursing Faculty:- 110hrs

External Faculty:- 40hrs

Practical :1450 Hours

Total : 1600 Hours

Course Description

This course is designed to assist students in developing expertise and indepth understanding in the field of orthopedic nursing. It will help students to develop advanced skills for nursing intervention in various orthopedic conditions. It will enable the student to function as orthopedic nurse practitioner/specialist providing quality care. It will further enable the student to function as educator, manager, and researcher in the field of orthopedic nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate the history and developments in the field of orthopedic nursing
2. Identify the psycho-social needs of the patient while providing holistic care.
3. Perform physical and psychological assessment of patients with orthopedic conditions and disabilities.
4. Describe various disease conditions and their management
5. Discuss various diagnostic tests required in orthopedic conditions
6. Apply nursing process in providing care to patients with orthopedic conditions and those requiring rehabilitation.
7. Recognize and manage orthopedic emergencies.
8. Describe recent technologies and treatment modalities in the management of patients with orthopedic conditions and those requiring rehabilitation.
9. Integrate the concept of family centered, long term care and community based rehabilitation to patients with orthopedic conditions.
10. Counsel the patients and their families with orthopedic conditions
11. Describe various orthotic and prosthetic appliances

12. Appreciate the legal and ethical issues pertaining to patients with orthopedic conditions and those requiring rehabilitation.
13. Appreciate the role of alternative system of medicine in care of patients with orthopedic conditions
14. Incorporate evidence based nursing practice and identify the areas of research in the field of orthopedic nursing.
15. Recognize the role of orthopedic nurse practitioner and as a member of the orthopedic and rehabilitation team.
16. Teach orthopedic nursing to undergraduate students and in-service nurses.
17. Prepare a design and layout of orthopedic and rehabilitative units.

CLINICAL SPECIALTY - II

MEDICAL SURGICAL NURSING - GASTRO ENTEROLOGY NURSING

Placement : II Year

Hours of Instruction

Theory : 150 hrs.

Nursing Faculty:-120hrs

External Faculty:-30hrs

Practical : 1450 hrs.

Total : 1600 hrs.

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of gastro enterology Nursing. It will help students to develop advanced skills for nursing intervention in various gastro enterology conditions. It will enable the student to function as gastro enterology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of gastro enterology nursing.

Objectives

At the end of the course the students will be able to

1. Appreciate trends and issues related to gastro enterology Nursing
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of gastrointestinal conditions.
3. Participate in national health programmes for health promotion, prevention and rehabilitation of patients with gastrointestinal conditions.
4. Perform physical, psychosocial & spiritual assessment.
5. Assist in various diagnostic, therapeutic and surgical procedures.
6. Provide comprehensive care to patients with gastrointestinal conditions.
7. Describe the various drugs used in gastrointestinal conditions and nurses responsibility.
8. Demonstrate skill in handling various equipments/gadgets used for patients with gastrointestinal conditions.

9. Appreciate team work & coordinate activities related to patient care.
10. Practice infection control measures.
11. Identify emergencies and complications & take appropriate measures.
12. Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs.
13. Discuss the legal and ethical issues in Gastro Enterology nursing.
14. Identify the sources of stress and manage burnout syndrome among health care providers.
15. Appreciate the role of alternative system of medicine in care of patient.
16. Incorporate evidence based nursing practice and identify the areas of research in the field of gastrointestinal nursing.
17. Teach and supervise nurses and allied health workers.
18. Design a layout of Gastro enterology intensive care unit (GEICU) , liver care/transplant unit.

I	5	<p>Introduction</p> <ul style="list-style-type: none"> <input type="checkbox"/> Historical development: trends and issues in the field of gastroenterology. <input type="checkbox"/> Gastro enterological problems <input type="checkbox"/> Concepts, principles and nursing perspectives <input type="checkbox"/> Ethical and legal issues <input type="checkbox"/> Evidence based nursing and its application in gastrointestinal nursing(to be incorporated in all the units)
II	5	<p>Epidemiology</p> <ul style="list-style-type: none"> <input type="checkbox"/> Risk factors associated with GE conditions- Hereditary, Psychosocial factors, smoking, alcoholism, dietary habits, cultural and ethnic considerations. <input type="checkbox"/> Health promotion, disease prevention, life style modification and its implications to nursing. <input type="checkbox"/> National health programmes related to gastro enterology. <input type="checkbox"/> Alternate system of medicine/complementary therapies.
III	5	<p>Review of anatomy and physiology of gastrointestinal system</p> <ul style="list-style-type: none"> <input type="checkbox"/> Gastrointestinal system <input type="checkbox"/> Liver, biliary and pancreas <input type="checkbox"/> Embryology of GI system <input type="checkbox"/> Immunology specific to GI system.

IV 15 Assessment and diagnostic measures

EF5

- History taking
- Physical assessment, psychosocial assessment
- Diagnostic tests
 - Radiological studies: Upper GIT- barium swallow, lower GIT- Barium enema,
 - Ultra sound:
 - Computed tomography
 - MRI
 - Cholangiography:
 - Percutaneous transhepatic Cholangiogram(PTC)
 - Magnetic Resonance Cholangio pancreatography (MRCP)
 - Nuclear imaging scans(scintigraphy)
 - Endoscopy
 - Colonoscopy
 - Proctosigmoidoscopy
 - Endoscopic Retrograde Cholangiopancreatography (ERCP)
 - Endoscopic ultrasound
 - Peritoneoscopy(Laproscopy)
 - Gastric emptying studies
 - Blood chemistries: Serum amylase, serum lipase
 - Liver biopsy
 - Miscellaneous tests: Gastric analysis, fecal analysis
 - Liver function tests: Bile formation and excretion, dye excretion test, Protein metabolism, haemostatic functions- prothrombin, vitamin K production, serum enzyme tests, Lipid metabolism- serum

Cholesterol Interpretation of diagnostic measures

Nurse's role in diagnostic tests

Internal Assessment

Theory weightage		Practical weightage	
Sessional exams -3	50%	Ongoing assessment	40%
Term paper - 1	25%	Clinical assignments	40%
Seminars/Presentations	25%	Internal examination	20%
Total	100%	TOTAL	100%

Procedures to be assisted

1. Endoscopy room – Upper G.I. Endoscopy (Diagnostic and therapeutic).
2. Sigmoidoscopy
3. Colonoscopy
4. Polypectomy
5. Endoscopic retrograde cholangiopancreatography (ERCP)
6. Liver biopsy
7. Percutaneous catheter drainage (PCD) of Pseudocyst pancreas
8. Abdominal paracentesis
9. Percutaneous aspiration of liver abscess
10. GE Lab : PT, HbsAg, Markers – A, B, C virus, CBP, ESR, Stool Test

Procedures to be performed

1. History and Physical assessment
2. RT intubation / extubation / aspiration/suction

3. Gastric lavage and gavage
4. Bowel wash
5. Therapeutic Diets
6. Ostomy feeding
7. Stoma care
8. Monitoring vital parameters
9. Plan of inservice education programme for nursing staff and Class-IV employees
10. Counseling

Assignments

- Nursing care study -2
- Nursing care analysis -2
- Nursing care plan based on theories -5
- Clinical teaching -5
- Design floor plan of gastroenterology unit
- Organise in service education programme for nurses

2.11 No: of hours per subject (lecture-tutorial-seminar-group discussion)

As given under “Content of each subject in each year “

2.12 Practical training given in labs/supervision (No: of hours for each exercise/training)

As given under “Content of each subject in each year “

2.13 Records

Proper records of practical work should be meticulously maintained and duly signed by the supervising teacher should be submitted at the time of University practical examination

2.14 Dissertation: Guide/Co-Guide/ Change of Guide

Dissertation

Every candidate pursuing M .Sc Nursing course is required to carry out work on a selected research project under the guidance of a recognized postgraduate teacher. The results of such a work shall be submitted in the form of a dissertation.

The dissertation is aimed to train a postgraduate student in research methods and techniques. It includes identification of problem, formulation of hypothesis, review of literature, getting acquainted with recent advances, designing of a research study, collection of data, critical analysis, and comparison of results and drawing conclusions.

Every candidate shall submit to the University in the prescribed format a synopsis containing particulars of proposed dissertation work after obtaining ethical clearance from the Institutional Ethical Committee comprising principal/ Senior Professor of College of Nursing, **within nine months from the date of commencement of the course on or before the dates notified by the University.**

The synopsis shall be sent through the proper channel.

Such proposal will be reviewed and the dissertation topic will be registered by the university. No change in the dissertation topic or Guide shall be made without prior approval of the University.

Tentative Schedule for dissertation

S. No.	Activities	Scheduled Time
1	Submission of the research proposal	End of 9th month of 1st year
2	Submission of dissertation Final	End of 9th month of IIInd Year

1. The dissertation should be written under the following headings:
2. INTRODUCTION
3. REVIEW OF LITERATURE
4. METHODOLOGY
5. ANALYSIS & INTERPRETATION
6. RESULTS
7. DISCUSSION, SUMMARY AND CONCLUSION

REFERENCES

APPENDICES

Dissertation style: Vancouver style format is used.

The written text of dissertation shall be not less than 75 pages and shall not exceed 100 pages excluding references, questionnaires, and other annexures. It should be neatly typed (font size 12-Times New Roman) in double line spacing on one side of the bond paper (A4 size, 8.27 x 11.69”) and bound properly. Spiral binding should be avoided. The Guide and the Head of the Institution shall certify the dissertation. Checking of Plagiarism may be done as per university norms.

The scientific committee of the college should scrutinize and evaluate the thesis and make required corrections if necessary and accept with modification before submitting to the University.

Four copies of the dissertation prepared shall be submitted to the Principal of the institution for onward transmission to University on the 21st month of commencement of the course.

Hall ticket for the second year examination should be issued to the candidate only after the dissertation has been submitted to the University.

Guidelines for submission of dissertation is given in Annexure

Research Guides

a) Qualification of Guide

Main guide: Nursing faculty / nursing expert in the field of study holding Ph.D. /M.Phil/M.Sc. Nursing with a minimum of 3 years experience in teaching in the Post Graduate Programme in Nursing.

Co-Guide: A Co-Guide is a nursing faculty/expert in the field of study (may be from outside the college but should be within the district)

b) Guide – Students Ratio

Maximum of 1:5 (including as co-guide)

Change of Guide –In the event of a registered guide leaving the college for any reason or in the event of death of Guide, Guide may be changed with prior permission from the University.

c) Research Committee

There should be a research committee/scientific review committee in each college comprising of minimum 5 Post Graduate Faculty representing all specialty chaired by the Principal, College of Nursing.

2.15 Speciality training if any

Nil

2.16 Project work to be done if any

Clinical Assignments as given in “Content of each subject in each year “

2.17 Any other requirements [CNE, Paper Publishing etc.]

As given under “Content of each subject in each year “

2.18 Prescribed/recommended textbooks for each subject

As given under “Content of each subject in each year “

2.19 Reference books

As given under “Content of each subject in each year “

2.20 Journals

As given under “Content of each subject in each year “

2.21 Logbook

Every candidate shall maintain a log book for recording performance of activities/ procedures/ attending/ organizing workshop/ conferences. The logbook shall be verified and certified by the Head of the Institution and presented in the University practical examination

3. EXAMINATIONS

3.1. Eligibility to appear for exams [including Supplementary]

a). Attendance and Marks

Candidate should have 80% attendance for both theory and practical, with minimum 50% of internal marks in each subject both in theory & practical. However 100% of attendance should be completed for practical before the award of degree. There is no provision for condonation of attendance for the PG candidates. The candidate shall submit dissertation before registering for the final year examinations.

b). Examination fee

The examination fee should be remitted for each examination appeared for. A fee as stipulated by the University should also be remitted for the evaluation of the dissertation.

c). Log Book

Every candidate shall maintain a log book for recording performance of activities/ procedures/ attending/ organizing workshop/ conferences. The logbook shall be verified and certified by the Head of the Institution and presented in the University practical examination.

3.2. Schedule of Regular/Supplementary exams

Regular University Examination will be conducted at the end of each academic year and Supplementary examinations will be conducted within six months after the declaration of results of regular examinations

3.3. Scheme of examination showing maximum marks and minimum marks

1 st year	Theory					Practical					Total
	Hours	Internal Marks		External Marks		Hours	Internal Marks		External Marks		
		Maximum	Minimum	Maximum	Minimum		Maximum	Minimum	Maximum	Minimum	
Nursing Education	3	25	12.5	100	50		50	25	100	50	275

											650
Total of Ist & IInd Year											1500

* Nursing Research (External) =75Marks and Statistics (External) =25 Marks

**Nursing Research (Internal) =15 and Statistics (Internal) =10

1. There shall be one regular & one supplementary examination every year.
2. Minimum pass marks shall be 50 % in each of the Theory and practical papers separately.
3. A candidate has to pass in theory and practical exam separately in each of the paper.
4. There is no provision for grace marks for pass in PG examination.
5. Maximum number of candidates for all practical examination should not exceed ten per day.
6. One internal and one external examiner should evaluate dissertation and jointly conduct viva-voce for each student.
7. For Dissertation internal examiner and external examiner should be a Nursing faculty / Nursing expert in the same clinical specialty holding Ph.D./M.Phil/M.Sc. Nursing with a minimum of 3 years experience in guiding the research projects for Post Graduate students of Nursing.

3.4. Papers in each year

As given under “Scheme of examination showing Maximum and Minimum Marks “

3.5. Details of theory exams

As given under “Scheme of examination showing Maximum and Minimum Marks and 3.6

3.6. Model question paper for each subject with question paper pattern

Question Paper Pattern

I) All subjects with Maximum Marks:100		
Long Essay	1x20 marks 1x15 marks	35 marks
Short Essay	4x10 marks	40marks
Short Notes	5x5 marks	25 marks
Total Marks		100 marks

II) Nursing Research Max.marks:75		
Long Essay	2x15 marks	30 marks
Short Essay	3x10 marks	30 marks
Short notes	3x 5 marks	15 marks
Total Marks		75 marks
III) Statistics : 25 marks		
Statistical Calculations	1x10 marks	10 marks
Short notes	3x5 marks	15 marks
Total Marks		25 marks

QP Code:

I YEAR M.SC (NURSING) DEGREE EXAMINATION

ADVANCED NURSING PRACTICE

Model question paper

Time : Three hours

Maximum marks : 100 marks

Answer all questions

Long Essays

- I. a. Define the concept of health promotion
- b. Explain the major assumptions of Penders' Health promotion model.
- c. Describe the application of Health Promotion Model in the management of obesity among women in the reproductive age group.

(2+8+10 = 20 marks)

2. Mr. M is admitted in the surgical ward with hemorrhagic shock after a road traffic accident.

- a. Explain the pathophysiology of haemorrhagic shock
- b. Describe the management for this patient and prepare a care plan for 3 priority nursing diagnosis.

(5+4+6=15marks)

Short Essays

3. Describe the basic elements and explain the barriers of communication (10 marks)
4. Describe the challenges faced by the Health care delivery system in Kerala (10 marks)
5. Briefly explain the safe disposal of biomedical wastes (10 marks)
6. Explain the principles and techniques of counselling (10 marks)

Write short notes on (5x 5 = 25 marks)

7. Telemedicine
8. Use of computers in nursing practice
9. Haemodialysis
10. Metabolic acidosis
11. Genetic counseling

QP Code:

Reg. No.:.....

FIRST YEAR M.Sc NURSING DEGREE EXAMINATION

NURSING RESEARCH & STATISTICS

MODEL QUESTION PAPER

Time: Three Hours. Maximum: 100 Marks

Answer Section A and B in separate answer books

SECTION A : NURSING RESEARCH

Max. Marks : 75

1. Write a research proposal for a research problem 'quality of life of patients with AIDS'
15
2. Describe observation as a method of data collection. 15
3. Explain the criteria for selection of a research problem. 10
4. Describe the methods of controlling extraneous variables. 10
5. Explain the different types of sampling. 10

Write Short notes on

6. Evidence based practice.
7. Grounded theory.
8. Purposes of literature review. (3x5=15)

Section B: statistics

9. Which is the appropriate statistical test to conclude the data given below; growth status and exposure to infection are associated. Conduct the statistical test and arrive your conclusion about data. P value at 5% level significance is 3.84

Growth status	infected	Non infected	Total
good	80	90	170
poor	240	110	350
total	320	300	620

10

SHORT NOTES

10. Properties of normal distribution.

11. Describe different methods of dispersion with merits and demerits

12. Reliability

3x 5 =15

QP Code:

Reg. No.:.....

First Year MSc Nursing Degree Examinations

NURSING EDUCATION

Model question paper

Time : 3 hrs

Max.marks:100

Answer All Questions

Long Essays

1. Explain the current trends in nursing education in India. (20)
2. Prepare the philosophy for a newly started college of nursing (15)

Short Essays

3. Plan a counselling session for nursing students. (10)
4. Describe the role of teachers in the development of pupil in nursing (10)
5. Describe the importance of non –projected aids in nursing education (10)
6. Describe the importance of questioning in education. (10)

WRITE SHORT NOTES

7. Aims of education.
8. Characteristics of an evaluation tool
9. Micro teaching
10. Objective structural practical examination
11. Formative and summative evaluation (5x5=25)

QP Code:

Reg. No.:.....

**I YEAR M.SC (NURSING) DEGREE EXAMINATION
MEDICAL SURGICAL NURSING – I**

Model question paper

Time : Three hours

Maximum marks : 100 marks

Answer all questions

Long Essays

1. a. Describe the pathophysiology of cirrhosis of liver.
- b. List the complications and plan the nursing care of a patient with hepatic failure secondary to cirrhosis

(8+4+8=20marks)

- 2.. Mr. X ,36 years is admitted with chest pain and is diagnosed as having Inferior wall Myocardial Infarction.

- a. What are the complications of inferior wall myocardial infarction?
- b . How will you manage the pain of acute myocardial infarction?

(8+7=15marks)

Short Essays

3. Mr. Y, 26 years is admitted with Acute Respiratory Distress Syndrome (ARDS)
Describe the pathophysiology of ARDS (10)
4. Explain the management of abdominal trauma (10)
5. Describe the assessment findings in a patient with chronic renal failure. (10)
6. Explain the medical management of a patient with tuberculosis (10)

Write short notes on the following:

(5x 5 = 25 marks)

7. Status epilepticus
8. Glaucoma
9. Psoriasis
10. Challenges of geriatric nursing
11. poisoning

QP Code:

Reg. No.:.....

Second Year M.Sc Nursing Degree Examinations

(Model Question Paper)

NURSING MANAGEMENT

Time: 3 hrs Max. Marks: 100

Answer all questions

Time: 3 hrs

Max. marks: 100

Answer all questions.

Long Essays

1. Explain the principles of management with suitable examples. (20)
2. Prepare an evaluation tool for performance appraisal of staff nurses. (15)

Short Essays

3. Explain the utilization of theories of management in nursing service with suitable examples. (10)
4. Explain the role of nurse administrator in supervision. (10)
5. Explain the challenges and current trends in nursing administration. (10)
6. Describe the steps of material management. (10)

Write short notes (5x5=25)

7. Collective bargaining
8. Nurses role in occupational health and safety.
9. Legal issues in nursing
10. Quality circle
11. Conflict management

QP Code:

Reg. No.:.....

**Second Year M.Sc Nursing Degree Examinations
(Model Question Paper)
Clinical Speciality II Medical Surgical Nursing
Subspecialty: Cardiovascular and thoracic nursing
Time: 3 hrs Max.Marks:100
• Answer all questions**

Long Essays

1. Explain the pathophysiology of Acute Myocardial Infarction. Describe the nursing care of a patient with Acute Myocardial Infarction treated with fibrinolytic therapy, for the first 48hrs. (8+12=20)
- 2 Explain the risk factors of hypertension. Describe the lifestyle modification to be followed by a person diagnosed to have hypertension. (8+7=15)

Short Essays

3. Explain the management of a patient with acute respiratory failure (10)
4. Explain the management of patients with bronchial asthma (10)
5. Explain the nurse's role in designing an Intensive Care Thoracic Unit with 10 beds. (10)
6. Prepare a health education plan for a patient undergone permanent pacemaker implantation (10)

Short notes:

(5x5=20)

7. ECG changes in conduction abnormalities
8. Pulmonary edema
9. Venous leg ulcers
10. Calcium channel blockers
11. Cardiac rehabilitation.

QP Code:

Reg. No.:.....

**Second Year M.Sc Nursing Degree Examinations
(Model Question Paper)**

Clinical Speciality II Medical Surgical Nursing

Subspecialty: Critical Care Nursing

Time: 3 hrs

Max.Marks:100

Answer all questions

Long Essays

1. Explain the pathophysiology and medical and nursing management of a patient with acute intestinal obstruction

(5+8+7=20)

2. Explain the complications and the post operative care of a patient undergone renal transplantation for the first 48hrs of surgery.

(5+10=15)

Short Essays

3. Explain the acute management of a patient with spinal cord injury at C4 level.(10)

4. Describe the management of intracranial hypertension

(10)

5. Explain the patho physiology and the nursing management of a patient with asthma (10)

6. Explain the post operative care of a patient undergone valve replacement surgery with emphasis on immediate and long term management (10)

Short notes:

(5x5=25)

7. Asphyxia neonatorum

8. Euthanasia

9. Psychosocial problems of the critically ill person

10. Theories of pain

11. Nutritional management of a critically ill patient

Second Year

M.Sc Nursing Degree Examinations

(Model Question Paper)

Clinical Speciality II Medical Surgical Nursing

Subspecialty: Gastroenterology Nursing

Time: 3 hrs Max. Marks: 100

Answer all questions

Long Essays

1. Explain the pathophysiology, Clinical manifestations and management of intestinal obstruction.

(6+6+8=20)

2. Explain the causes and management of peptic ulcer

(7+8=15)

Short Essays

3. Describe the surgical management of cholecystitis. Explain the nursing management of a patient for the first 48 hrs of surgery (10)

4. Describe the diagnostic tests and the various management modalities of colorectal cancer.

(10)

5. Explain the role of nurse specialist in designing and staffing of Gastroenterology Unit. (10)

6. Explain the complications of cirrhosis of liver based on pathophysiology and plan a discharge plan for a patient with cirrhosis of liver (10)

Write short notes: (5x5=20)

7. Cholangiography

8. Celiac disease

9. Diaphragmatic hernia

10. Biliary obstruction

11. Peritonitis.

3.7. Internal assessment component

- a) There shall be a minimum of 3 periodic assessments, for theory and practical including viva separately, of which the final one will be University model examination and is mandatory.
- b) Average of the marks of the best two periodic assessments shall be taken as internal assessment mark of the candidate. Marks of evaluation by other methods like assignments, seminars, projects etc. can be added to the internal marks.
- c) The class average of internal assessments mark of theory and practical should not exceed 75% of Maximum marks.
- d) The class average of internal assessment for an examination shall be calculated based on the total number of candidates in a particular batch appearing for that internal assessment examination.
- e) The candidate must secure 50% marks for internal assessment in theory and practical including viva separately in a particular subject in order to be eligible to appear in the university examination of the subject.
- f) In cases where the candidate is permitted to improve the internal assessment marks, the new marks will be taken as final.
- g) The internal marks shall be signed by the candidate before transmission to the University

3.8. Details of practical/clinical practicum exams

- ☐ 4 hours of practical examination per student.
- ☐ Maximum number of 10 students per day per specialty.
- ☐ The examination should be held in concerned clinical area for clinical specialties. Facility for observation of all candidates at a time in the same ward / clinical area by the examiners during practical examinations is mandatory.
- ☐ One internal and external examiner should jointly conduct practical examination and viva voce separately for each student.
- ☐ Follow the evaluation guidelines for the conduct of practical examinations Refer 2.2.10 & annexure for guidelines.

3.9. Number of examiners needed (Internal & External) and their qualifications

- ☐ One internal and external examiner should jointly conduct practical examination and viva voce separately for each student.

Examiner – Nursing faculty teaching respective specialty area/subjects in M.Sc nursing programme with minimum 3 years post graduate teaching experience.

The examiners should do evaluation of dissertation prior to viva.

3.10. Details of viva: division of marks

Duration: Viva-Voce -minimum 30 minutes per student.

4. INTERNSHIP

4.1. Eligibility for internship

Not applicable.

4.2. Details of internship

Not applicable.

4.3. Model of Internship Mark lists

Not applicable.

4.4. Extension rules

As given under “Leave , Vacation/ holidays permitted “

4.5. Details of training given

As given under “Content of each subject in each year “

5. ANNEXURES

5.1 Check Lists for Monitoring: Log Book, Seminar, Assessment etc.

As given under clause “Content of each subject in each year”

Abstract

Abstract provides a brief summary of the dissertation/thesis, summing up clearly the problem examined, the methods used and the main findings. The abstract is a one-paragraph, self-contained summary of the most important elements of the paper. The abstract word limit is between 250 and 300 words. All numbers in the abstract (except those beginning a sentence) should be typed as digits rather than words. Keywords (max. 10) should be given, chosen from nursing subject headings. Each word should be separated by semicolon.

Format for the submission of Dissertation Hard & Soft copy

Instructions to candidates

Although your dissertation may be prepared on a computer, consider the following requirements for meeting the standards.

Paper

Use only one side of high-quality, plain white (unlined in any way) bond paper, minimum 20-lb weight, and 8 ½ x 11 inches in size. Erasable paper should not be used.

Type Size and Print

Select fonts type Times New Roman and a size of 12 characters. The size of the titles should be 14 and Bold, the size of subtitles should be 12 and bold. Print should be letter quality or laser (not dot matrix) printing with dark black characters that are consistently clear and dense. Use the same type of print and print size throughout the document.

Pagination

Number all of the pages of your document, including not only the principal text, but also all plates, tables, diagrams, maps, and so on. Roman numerals are used on the preliminary pages (pages up to the first page of text) and Arabic numerals are used on the text pages. The numbers themselves can be placed anywhere on the page, however they should be consistent.

Spacing

Use double spacing except for long quotations and footnotes which are single-spaced.

Margins

To allow for binding, the left-hand margin must be 1.5 inches. Other margins should be 1.0". Diagrams, or photographs in any form should be a standard page size, or if larger, folded so that a free left-hand margin of 1.5 inch remains and the folded sheet is not larger than the standard page.

Photographs

Professional quality black-and-white photographs are necessary for clear reproduction. Colors are allowed, but you should be certain the colored figure will copy clearly and will not be confusing when printed in black and white.

File Fomat

Dissertation format should be in .Doc (Ms Word Document) or PDF (Portable Document Format), Image files in JPG or TIFF format and Audio Visual in AVI (Audio Video Interleave), GIF, MPEG (moving picture expert) files format.

Labeling on CD

CD-ROM Labeling should be standard and should contain title, name of the candidate, degree name, subject name, and guide name, name of the department, college, place and year.

References

Vancouver style format.

MASTER OF SCIENCE IN NURSING

**MSc Mental Health
(Psychiatric) Nursing**

Course Code 272

(2016-17 admission onwards)

2016

2. COURSE CONTENT

2.1 Title of course:

MASTER OF SCIENCE IN NURSING – MSc Mental Health (Psychiatric) Nursing

2.2 Aim & Objectives of the Course

AIM

Aim of the postgraduate programme in nursing is to prepare graduates to assume responsibilities as Clinical Nurse Specialists, Nurse Practitioners, Consultants, Educators, Researchers and Administrators in a wide variety of professional settings.

OBJECTIVES

On completion of the 2 year M.Sc Nursing programme, the graduates will be able to:-

1. Apply the concepts, theories and principles of nursing science.
2. Demonstrate competencies in nursing practice.
3. Practice as Clinical Nurse Specialist.
4. Establish collaborative relationship with the members of other disciplines.
5. Assume leadership in various care settings.
6. Participate in health planning, implementation and evaluation at different levels of health care system.
7. Function as effective nurse educators and nurse managers.
8. Conduct independent nursing research and utilize the research findings in nursing practice and education.
9. Critically evaluate various educational programmes in nursing.
10. Demonstrate interest and positive attitude in continuing education for personal and professional growth
11. Describe the role of various types of complementary and alternative therapies in mental health nursing.
12. Recognize the role of Psychiatric nurse practitioner as a member of the mental health team.

13. Demonstrate advanced skills and competence in the nursing management of patients with mental disorders in various settings.
14. Incorporate evidence based nursing practice and identify the areas of research in the field of mental health nursing.
15. Explain the legal and ethical issues pertaining to mental health nursing.

2.3 Medium of instruction:

Medium of instruction shall be English

Course Description

This course is designed to assist students to develop a broad understanding of fundamental Principles, concepts, trends and issues related to education and nursing education. Further, it would provide opportunity to students to understand, appreciate and acquire skills in teaching and evaluation, curriculum development, implementation, maintenance of standards and accreditation of various nursing educational programs.

Objectives

At the end of the course, students will be able to :

1. Explain the aims of education, philosophies, trends in education and its impact on nursing education.
2. Describe the teaching learning process.
3. Prepare and utilize various instructional media and methods in teaching learning process.
4. Demonstrate competency in teaching, using various instructional strategies.

5. Critically analyze the existing nursing educational programs, their problems, issues and future trends.
6. Describe the process of curriculum development, and the need and methodology of curriculum change, innovation and integration.
7. Plan and conduct continuing nursing education programs.
8. Critically analyze the existing teacher preparation programs in nursing
9. Demonstrate skill in guidance and counselling.
10. Describe the problems and issues related to the implementation of nursing curriculum including selection and organization of clinical experience.
11. Explain the development of standards and accreditation process in nursing education programs.
12. Identify research priorities in nursing education.
13. Discuss various models of collaboration in nursing education and services.
14. Explain the concept, principles, steps, tools and techniques of Evaluation.
15. Construct, administer and evaluate various tools for assessment of knowledge, skill, and attitude.

* External Faculty (EF)

Activities

- Framing philosophy, aims and objectives.
- Lesson Planning.
- Micro teaching-2.
- Conduct practice teachings using different teaching strategies -10
(Like lecture cum discussion, demonstration- lab method, field trips, seminars, project, role play, panel discussion, clinical methods etc)
- Preparation and utilization of instructional Aids using different media.
- Develop course plans, unit plans, rotation plans.
- Conduct a continuing education workshop.
- Annotated bibliography.
- Critical evaluation of any nursing education program offered by a selected institution.
- Planning and Organizing field visits.
- Construct, administer and evaluate tools (objective & essay type test, observation checklist, rating scale etc)
 - Observe and practice application of various non-standardized tests, (intelligence, Aptitude, Personality, Sociometry, physical & mental disabilities tests.)

Methods of Teaching

- Lecture cum discussion
- Demonstration/ Return demonstration
- Seminar / Presentations
- Project work
- Field visits
- Workshop

Methods of evaluation

- Tests
- Presentation
- Project work

Assignments –Theory

Lesson plan-2,courseplan -1,unit plan 2,rotation plan-2(master plan,clinical rotation)

Evaluation tool-construction,administration and evaluation(Essay,objectivetype,ratingscale,checklist)

Construction of an achievement test

Practical

Practice teaching using different strategies (lecture cum discussion-5,demonstration-2,seminar-1,clinicalteaching -2,symposium/role play/panel discussion)

Internal Assessment (Theory)

	Weightage
Sessional exams (3)	50%
Assignments	25%
Seminar/presentation	25%
Total	100%

Practical – Internal assessment

Preparation of Learning resource material &	25%
Construction of tests/rotation plan.	
Practice Teaching	50%
Conduct Workshop /Short Term Course	25%
Total	100%

ADVANCED NURSING PRACTICE

Placement: 1st Year

Hours of Instruction

Theory: 150 Hours

External Faculty:-30hrs

Nursing Faculty:-120hrs

Practical: 500 Hours

Total : 650 Hours

Course Description

The course is designed to develop an understanding of concepts and constructs of theoretical basis of advance nursing practice and critically analyze different theories of nursing and other disciplines.

Objectives:

At the end of the course the students will be able to:

1. Describe ethical, legal, political and economic aspects of health care delivery and nursing practice.
2. Identify latest trends in nursing and the basis of advanced nursing practice.
3. Explain bio- psycho- social dynamics of health, life style and health care delivery system.
4. Discuss concepts, principles, theories, models, approaches relevant to nursing and their application.
5. Perform health assessment and General physical examination
6. Provide holistic and comprehensive care following nursing process approach
7. Perform extended and expanded role of nurse.
8. Describe alternative modalities of nursing care.
9. Describe the concept of quality control in nursing.
10. Identify the scope of nursing research.
11. Use computer in patient care delivery system and nursing practice.
12. Appreciate importance of self development and professional advancement.

Legend: *EF-External Faculty

Practical – 500 Hrs

Clinical posting in the following areas:

Sl. No	Dept/Unit	No. of Weeks
1.	Medical and Surgical Wards	4
2.	ICUs	4
3.	Community Health Centre/ PHC	2
4.	Casualty	1
	Total	11

Activities

- Practice advance clinical procedures
- Prepare care plan and care study based on nursing process and nursing theories (Medial, Surgical)
- Care Analysis (Medial /Surgical)
- Presentation of comparative picture of theories -2
- Clinical presentations/Clinical teaching- 3

Methods of Teaching

- Lecture cum discussion
- Seminar
- Panel discussion
- Debate

- Case Presentations
- Exposure to scientific conferences

Methods of evaluation:

Tests

- Presentation
- Seminar
- Written assignments

Advance Nursing Procedures

Definition, Indication and nursing implications:

- Cardio Pulmonary Resuscitation, Total Parental Nutrition, Hemodynamic monitoring, Endotracheal intubation, Tracheostoma, mechanical ventilation, Pacemaker, Hemodialysis, Peritoneal dialysis, Lumbar Puncture, Blood Transfusion Pleural and abdominal paracentesis Operation Room techniques, Health assessment, Triage, Pulse oxymetry.

Internal Assessment

Theory	Weightage

NURSING RESEARCH AND STATISTICS

Placement: 1st Year

Hours of Instruction

Theory : 150 Hours

Practical : 100 Hours

Total : 250 Hours

Part A: Nursing Research

Theory: 100 Hours

Practical: 75 Hours

Total : 175 Hours

Course Description:

The course is designed to assist the students to acquire an understanding of the research methodology and statistical methods as a basis for identifying research problem, planning and implementing a research plan. It will further enable the students to evaluate research studies and utilize research findings to improve quality of nursing practice, education and management.

General Objectives:

At the end of the course, the students will be able to:

1. Recognize the significance of research in nursing and its importance in evidence- based nursing practice.
2. Identify the steps of quantitative and qualitative research.
3. Discuss the ethical aspects of research.
4. Review literature utilizing various resources.
5. Identify researchable problems in nursing.
6. Demonstrate skill in planning and conducting research studies.
7. Communicate research findings.
8. Utilize research findings.
9. Critically evaluate research reports and articles.
10. Write scientific paper for publications.

COURSE CONTENT:

Unit	Theory hours	Content	Practical hours	Content
I	5	<p>Introduction</p> <p>Review:</p> <ul style="list-style-type: none"> • Problem solving and scientific method. <p>Research –definition, characteristics, purposes, types of research, Basic research terms, Scope of nursing research, Overview of Research process, Significance of research in nursing, Historical Evolution of nursing research.</p> <ul style="list-style-type: none"> <input type="checkbox"/> Future trends in nursing research. <input type="checkbox"/> Problems and challenges in nursing research, health and social research. <input type="checkbox"/> Priorities for nursing research. <input type="checkbox"/> Evidence based practice. <input type="checkbox"/> Ethics in research 		
II	5	<p>Review of Literature</p> <ul style="list-style-type: none"> • Review- <ul style="list-style-type: none"> • Importance, purposes, sources, criteria for selection of resources • Guidelines for writing literature review. 	5	Literature search-web search

III	10	Research problem: <ul style="list-style-type: none"> <input type="checkbox"/> Identification of research problem/ research question. <input type="checkbox"/> Formulation of problem statement and research objectives <input type="checkbox"/> Definition of terms <input type="checkbox"/> Assumption and delimitations <input type="checkbox"/> Identification of variables <input type="checkbox"/> Hypothesis –definition, formulation and types. 	5	1. Identification of research question. 2. Formulation of problem statement and research objectives
IV	5	Developing theoretical /conceptual framework. <ul style="list-style-type: none"> <input type="checkbox"/> Review Theories: Nature, characteristics, purpose and application in research <input type="checkbox"/> Using, testing and developing conceptual framework, models and theories. 	5	Developing theoretical /conceptual framework.
V	15	Research Approach and designs Qualitative and Quantitative, Mixed methods Qualitative research approaches: Grounded theory, phenomenology, ethnography, case study and historical research. Quantitative: Experimental and non experimental: types, characteristics, advantages and disadvantages. Randomised control design, cohort study, clinical trials		
VI	8	Sampling Population and sample. Factors influencing sampling Sampling techniques Sample size Probability and sampling error		

VII	20	<p>a) Data collection methods and Tools: Concepts of data collection, Data sources, methods/techniques quantitative and qualitative. Tools for data collection-types and characteristics</p> <p>b) Measurement and data quality Validity and reliability of tools, Characteristics of an instrument Steps in development of an instrument. Procedure for data collection</p>		
VIII	3	Critical analysis of research reports and articles	15	Critical analysis of research reports and Articles
IX	4	Developing and presenting a research proposal	5	Presenting a research
X	5	Implementing research plan Pilot study, review research plan (design), planning for data collection, administration of tool/interventions, Collection of data	40	Pilot study
XI	10	Analysis and interpretation of data Plan for data analysis: quantitative and qualitative Preparing data for computer analysis and Presentation , Statistical analysis Interpretation of data Conclusion and generalizations Summary and discussion		
XII	10	Reporting and utilizing research findings: Communication of research results; oral and written Writing research report purposes, methods and style, Vancouver, American Psychological Association (APA), Utilization of research findings. Writing scientific articles for publication: purposes & style		

Activities:

- Annotated Bibliography of research reports and articles. -4
- Review of literature of selected topic and reporting
- Formulation of problem statement, objective and hypothesis
- Developing theoretical /conceptual framework.
- Preparation of a sample research tool.
- Analysis and interpretation of given data
- Developing and presenting research proposal
- Journal presentation-1
- Critical evaluation of selected research studies –dissertaton-1,journal article -1
- Writing a scientific paper

Methods of Teaching:

- Lecture-cum-discussion
- Seminar/Presentations
- Project
- Class room exercises
- Journal club

Methods of Evaluation:

- Quiz, Tests(Term)
- Assignments/Term paper
- Presentations
- Project work (Concerned specialty)

Internal Assessment Techniques	Weightage (15 marks)
essional exams (2)	40%
Presentations/Seminar	20%
Research critique & presentation	20%
Annotated bibliography ,assignments	20%
Total	100%

Part –B: Statistics (External Faculty)

Hours of Instruction

Theory	50Hours
Practical	25 Hours
Total	75 Hours

Course Description:

At the end of the course, the students will be able to develop an understanding of the statistical methods and apply them in conducting research studies in nursing

General Objectives:

At the end of the course the students will be able to:

1. Explain the basic concepts related to statistics
2. Describe the scope of statistics in health and nursing
3. Organize, tabulate and present data meaningfully
4. Use descriptive and inferential statistics to predict results
5. Draw conclusions of the study and predict statistical significance of the results
6. Describe vital health statistics and their use in health related research
7. Use statistical packages for data analysis.

Course content

Unit	Hours		Content
	Theory	Practical	
I	7	I	Introduction: <ul style="list-style-type: none"> □ Concepts, types, significance and scope of statistics, meaning of data □ Sample, parameter □ Type and levels of data and their Measurement <ul style="list-style-type: none"> □ Organization and presentation of data-Tabulation of data □ Frequency distribution □ Graphical and tabular presentations
II	4		Measures of central tendency: Mean, Median, Mode
III	4		Measures of variability: □ Range, Percentiles, Average deviation, Quartile deviation, Standard deviation

IV	3		Normal Distribution: □ Probability, Characteristics and application of normal probability curve, Sampling error
V	6		Measures of relationship: □ Correlation-need and meaning □ Rank order correlation □ Scatter diagram method, product moment correlation, Simple linear regression analysis and prediction,
VI	5		Designs and meaning: □ review -Experimental designs □ Comparison in pairs, randomized block design, Latin squares.
VII	8		Significance of Statistic and Significance of difference between Statistics(Testing hypothesis) □ Non parametric test-Chi-square test, Sign, median test, Mann Whitney test □ Parametric test- t' test, ANOVA,
VIII	5		Use of statistical methods in psychology and education □ Scaling-Z Score, Z Scaling □ Standard Score and T Score □ Reliability of test scores: test-retest method, parallel forms split half method
IX	4	5	Application of statistics in health: Ratios, Rates, Trends Vital health statistics –Birth and death rates Measures related to fertility, morbidity and mortality
X	4	20	Use of Computers for data analysis Use of statistical package

Activities:

- Exercises on organization and tabulation of data
- Graphical and tabular presentation of data
- Calculation of descriptive and inferential statistics (chi square, t-test, correlation)
- Practice in using statistical package
- Computing
- Vital health statistics

Methods of Teaching:

- Lecture-cum-discussion
- Demonstration-on data organization, tabulation, calculation of statistics, use of statistical package, Classroom exercises, organization and tabulation of data
- Computing Descriptive and inferential statistics; vital and health statistics and use of computer for data entry and analysis using statistical package

Methods of Evaluation:

- Test, Classroom statistical exercises

Internal Assessment Techniques weightage 10 marks

Sessional exams – (2) 100%

CLINICAL SPECIALTY-1

MENTAL HEALTH (PSYCHIATRIC) NURSING-1

Course No. 27

Placement-I Year

Hours of instruction

Theory	- 150 Hrs.
Practical	- 900 Hrs.
Total	- 1050 Hrs.

Resource Persons

Psychiatric Nursing Faculty-100 Hrs	
Psychiatrist	-25 Hrs
	-20
Psychologist	Hrs
Psychiatric social worker	-5 Hrs

Course Description:

The course is designed to assist students in developing expertise and in depth understanding in the field of psychiatric nursing. It will help the students to acquire knowledge regarding the psychodynamics of human behaviour, epidemiology, manifestations and treatment modalities of various mental disorders, render holistic care to clients in various settings and to function effectively as a nurse specialist among the interdisciplinary team members. It will help the students to appreciate the latest trends and identify researchable areas in the field of psychiatric nursing and utilize research findings in their practice.

Objectives:

At the end of the course, the students:

1. Appreciate the trends and issues in the field of Psychiatry and Psychiatric Nursing.
2. Explain the dynamics of personality development and human behaviour.
3. Describe the concepts of psychobiology and psychopathology in mental disorders and its implications for psychiatric nursing practice.
4. Demonstrate therapeutic communication skills in all interactions.
5. Establish and maintain therapeutic relationship with individual, groups and families.
6. Apply nursing process in providing holistic care to patients with mental disorders.
7. Carryout counselling and guidance programmes to various types of clients
8. Appreciate the legal and ethical issues pertaining to psychiatric nursing.
9. Demonstrate skills /competencies in nursing management of patients with different mental disorders.
10. Participate in various treatment modalities used for Psychiatric patients.
11. Recognize the role of Psychiatric nurse practitioner as a member of the mental health team.

SECOND YEAR M.Sc NURSING NURSING MANAGEMENT

Placement: II Year

Hours of Instruction

Theory :150 Hours

Nurse Specialist :105 Hours

External :45 Hours

Practical :200 Hours

Total : 350 Hours

Course Description

This course is designed to assist students to develop a broad understanding of principles, concepts, trends and issues related to nursing management. Further, it would provide opportunity to students to understand, appreciate and acquire skills in planning, supervision and management of nursing services at different levels to provide quality nursing services.

Objectives

At the end of the course, students will be able to:

1. Formulate the philosophy and objectives of the health care institutions at various levels.
2. Identify trends and issues in nursing
3. Discuss the public administration, health care administration and nursing administration
4. Describe the principles of administration applied to nursing
5. Explain the organization of health and nursing services at the various levels/institutions.
6. Discuss the planning, supervision and management of nursing workforce for various health care settings.
7. Discuss various collaborative models between nursing education and nursing service to improve the quality of nursing care
8. Identify and analyze legal and ethical issues in nursing administration
9. Describe the process of quality assurance in nursing services.
10. Demonstrate leadership in nursing at various levels.
11. Organize staff development programme.

		Stress management Applications to nursing service and education
XII	10 EF5	Legal and ethical issues Laws and ethics Ethical committee Code of ethics and professional conduct Legal system: Types of law, tort law, and liabilities Legal issues in nursing: negligence, malpractice, invasion of privacy, defamation of character Patient care issues, management issues, employment issues Medico legal issues Nursing regulatory mechanisms: licensure, renewal, accreditation Patients rights, Consumer protection act(CPA) Rights of special groups: children, women, HIV, handicap, ageing Professional responsibility and accountability Infection control Standard safety measures

***EF- External Faculty**

PRACTICALS

1. Prepare prototype personal files for staff nurses, faculty and cumulative records
2. Preparation of budget estimate, revised estimate and performance budget
3. Plan and conduct staff development programme
4. Preparation of Organization Chart
5. Developing nursing standards/protocols for various units
6. Design a layout plan for specialty units /hospital, community and educational institutions
7. Preparation of job description of various categories of nursing personnel
8. Prepare a list of equipments and supplies for specialty units
9. Assess and prepare staffing requirement for hospitals, community and educational institutions
10. Plan of action for recruitment process
11. Prepare a vision and mission statement for hospital, community and educational institutions

12. Prepare a plan of action for performance appraisal
13. Identify the problems of the specialty units and develop plan of action by using problem solving approach
14. Plan a duty roster for specialty units/hospital, community and educational institutions
15. Prepare: anecdotes, incident reports, day and night reports, handing and taking over reports, enquiry reports, nurse's notes, official letters, curriculum vitae, presentations etc.
16. Prepare a plan for disaster management
17. Observation visit to a multispecialty teaching hospital and College and School of Nursing

2.11 No: of hours per subject.

As given under “Content of each subject in each year “

2.12 Practical training.

As given under clause “Content of each subject in each year “

2.13 Records

Proper records of practical work should be meticulously maintained and duly signed by the supervising teacher should be submitted at the time of University practical examinations.

2.14 Dissertation: Guide/Co-Guide/ Change of Guide

Dissertation

Every candidate pursuing M Sc Nursing course is required to carry out work on a selected research project under the guidance of a recognized postgraduate teacher. The results of such a work shall be submitted in the form of a dissertation.

The dissertation is aimed to train a postgraduate student in research methods and techniques. It includes identification of problem, formulation of hypothesis, review of literature, getting acquainted with recent advances, designing of a research study, collection of data, critical analysis, and comparison of results and drawing conclusions.

Every candidate shall submit to the University in the prescribed format a synopsis

containing particulars of proposed dissertation work after obtaining ethical clearance from the Institutional Ethical Committee comprising principal/ Senior Professor of College of Nursing, **within nine months from the date of commencement of the course on or before the dates notified by the University.** The synopsis shall be sent through the proper channel.

Such proposal will be reviewed and the dissertation topic will be registered by the university. No change in the dissertation topic or Guide shall be made without prior approval of the University.

Tentative Schedule for dissertation

S. No.	Activities	Scheduled Time
1	Submission of the research proposal	End of 9th month of 1st year
2	Submission of dissertation Final	End of 9th month of IIInd Year

The dissertation should be written under the following headings:

1. INTRODUCTION
2. REVIEW OF LITERATURE
3. METHODOLOGY
4. ANALYSIS & INTERPRETATION
5. RESULTS
6. DISCUSSION, SUMMARY AND CONCLUSION

REFERENCES

APPENDICES

Dissertation style: Vancouver style format is used.

The written text of dissertation shall be not less than 75 pages and shall not exceed 100 pages excluding references, questionnaires, and other annexures. It should be neatly typed (font size 12-Times New Roman) in double line spacing on one side of the bond paper (A4 size, 8.27 x 11.69”) and bound properly. Spiral binding should be avoided. The Guide and the Head of the Institution shall certify the dissertation. Checking of Plagiarism may be done as per university norms.

The scientific committee of the college should scrutinize and evaluate the thesis and make required corrections if necessary and accept with modification before submitting to the University.

Five copies of the dissertation prepared shall be submitted to the Principal of the institution for onward transmission to University on the 21st month of commencement of the course.

Hall ticket for the second year examination should be issued to the candidate only after the dissertation has been submitted to the University.

Guidelines for submission of dissertation is given in Annexure

Research Guides

a) Qualification of Guide

Main guide: Nursing faculty / nursing expert in the field of study holding Ph.D. /M.Phil/M.Sc. Nursing with a minimum of 3 years experience in teaching in the Post Graduate Programme in Nursing.

Co-Guide: A Co-Guide is a nursing faculty/expert in the field of study (may be from outside the college but should be within the district)

b) Guide – Students Ratio

Maximum of 1:5 (including as co-guide)

Change of Guide –In the event of a registered guide leaving the college for any reason or in the event of death of Guide, Guide may be changed with prior permission from the University.

c) Research Committee

There should be a research committee/scientific review committee in each college comprising of minimum 5 Post Graduate Faculty representing all specialty chaired by the Principal, College of Nursing.

2.15 Speciality training if any

Nil

2.16 Project work to be done if any

As given under “Content of each subject in each year “

2.17 Any other requirements [CNE, Paper Publishing etc.]

As given under “Content of each subject in each year “

2.18 Prescribed/recommended textbooks for each subject

As given under “Content of each subject in each year “

2.19 Reference books

As given under “Content of each subject in each year “

2.20 Journals

As given under “Content of each subject in each year “

2.21 Logbook

Every candidate shall maintain a log book for recording performance of activities/ procedures/ attending/ organizing workshop/ conferences. The logbook shall be verified and certified by the Head of the Institution and presented in the University practical examination

3. EXAMINATIONS

3.1. Eligibility to appear for exams [including Supplementary]

a) Attendance and Marks

Candidate should have 80% attendance for both theory and practical, with minimum 50% of internal marks in each subject both in theory & practical. However 100% of attendance should be completed for practical before the award of degree. **There is no provision for condonation of attendance for the PG candidates.**

b) Examination fee

The examination fee should be remitted for each examination appeared for. A fee as stipulated by the University should also be remitted for the evaluation of the dissertation.

c) Log Book

Every candidate shall maintain a log book for recording performance of activities/ procedures/ attending/ organizing workshop/ conferences. The logbook shall be verified and certified by the Head of the Institution and presented in the University practical examination.

3.2. Schedule of Regular/Supplementary exams

Regular University Examination will be conducted at the end of each academic year and Supplementary examinations will be conducted once in a year after regular examination

3.3. Scheme of examination showing maximum marks and minimum marks

	Theory					Practical					Total
	Hours	Internal Marks		External Marks		Hours	Internal Marks		External Marks

* Nursing Research (External) =75Marks and Statistics (External) =25 Marks

**Nursing Research (Internal) =15 and Statistics (Internal) =1

1. There shall be one regular & one supplementary examination every year.
2. Minimum pass marks shall be 50 % in each of the Theory and practical papers separately.
3. A candidate has to pass in theory and practical exam separately in each of the paper.
4. There is no provision for grace marks for pass in PG examination.

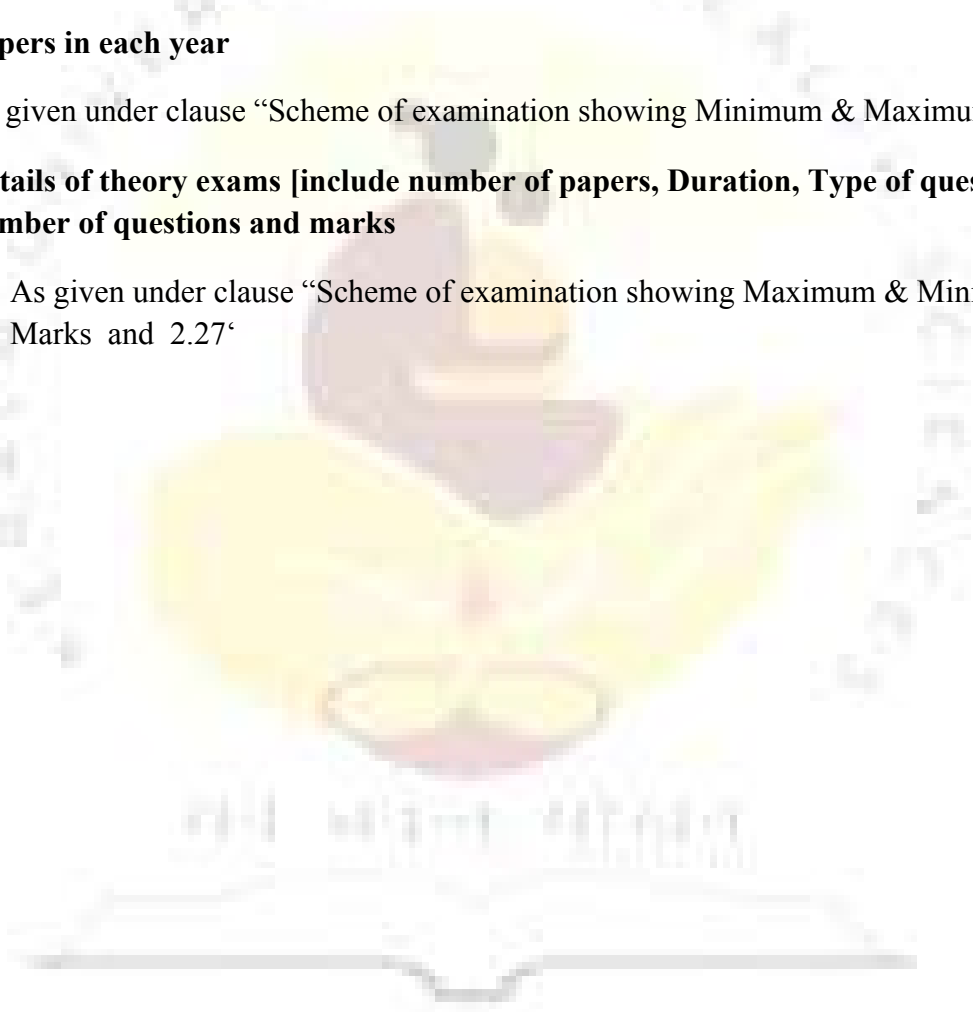

5. Maximum number of candidates for all practical examination should not exceed ten per day.
6. One internal and one external examiner should evaluate dissertation and jointly conduct viva-voce for each student.
7. For Dissertation internal examiner and external examiner should be a Nursing faculty / Nursing expert in the same clinical specialty holding Ph.D./M.Phil/M.Sc. Nursing with a minimum of 3 years experience in guiding the research projects for Post Graduate students of Nursing.

3.4. Papers in each year

As given under clause “Scheme of examination showing Minimum & Maximum Marks “

3.5. Details of theory exams [include number of papers, Duration, Type of questions & number of questions and marks

As given under clause “Scheme of examination showing Maximum & Minimum Marks and 2.27“

3.6. Model question paper for each subject with question paper pattern

Question Paper Pattern

I) All subjects with Maximum Marks:100		
Long Essay	1x20 marks 1x15 marks	35 marks
Short Essay	4x10 marks	40marks
Short Notes	5x5 marks	25 marks
Total Marks		100 marks
II) Nursing Research Max.marks:75		
Long Essay	2x15 marks	30 marks
Short Essay	3x10 marks	30 marks
Short notes	3x 5 marks	15 marks
Total Marks		75 marks
III) Statistics : 25 marks		
Statistical Calculations	1x10 marks	10 marks
Short notes	3x5 marks	15 marks
Total Marks		25 marks

QP Code:

Reg. No.:.....

**I YEAR M.SC (NURSING) DEGREE EXAMINATION
ADVANCED NURSING PRACTICE**

Model question paper

Time : Three hours Maximum marks : 100 marks

Answer all questions

- I a. Define the concept of health promotion
b. Explain the major assumptions of Penders' Health promotion model.
c. Describe the application of Health Promotion Model in the management of obesity among women in the reproductive age group.

(2+8+10 = 20 marks)

2. Mr. M is admitted in the surgical ward with hemorrhagic shock after a road traffic accident.

- a. Explain the pathophysiology of haemorrhagic shock
b. List any 3 nursing diagnosis according to priority for this patient and prepare a care plan.

(5+10=15marks)

3. Describe the basic elements and explain the barriers of communication (10 marks)
4. Describe the challenges faced by the Health care delivery system in Kerala (10 marks)
5. Briefly explain the safe disposal of biomedical wastes (10 marks)
6. Explain the principles and techniques of counseling (10 marks)

Write short notes on (5x 5 = 25 marks)

7. Anti retroviral therapy
8. Use of computers in nursing practice
9. Haemodialysis
10. Metabolic acidosis
11. Genetic counseling

QP Code:

Reg. No.:.....

FIRST YEAR M.Sc NURSING DEGREE EXAMINATION
NURSING RESEARCH & STATISTICS
MODEL QUESTION PAPER

Time: Three Hours. Maximum: 100 Marks

Answer Section A and B in separate answer books

SECTION A : NURSING RESEARCH

Max. Marks : 75

1. Write a research proposal for a research problem 'quality of life of patients with AIDS'.
15
 2. Describe observation as a method of data collection.
15
 3. Explain the criteria for selection of a research problem.
10
 4. Describe the methods of controlling extraneous variables.
10
 5. Explain the different types of sampling.
10
- Write Short notes on
6. Evidence based practice.
 7. Grounded theory.
 8. Purposes of literature review. (3x5=15)

Section B: statistics

9. Which is the appropriate statistical test to conclude the data given below; growth status and exposure to infection are associated. Conduct the statistical test and arrive your conclusion about data. P value at 5% level significance is 3.84

Growth status	infected	Non infected	Total
good	80	90	170
poor	240	110	350
total	320	300	620

10

SHORT NOTES

10. Properties of normal distribution.

11. Describe different methods of dispersion with merits and demerits

12. Reliability

3x 5 =15

QP Code:

Reg. No.:.....

First Year MSc Nursing Degree Examinations

NURSING EDUCATION

Model question paper

Time : 3 hrs

Max.marks:100

Answer All Questions

1. Explain the current trends in nursing education in India. (20)
2. Prepare the philosophy for a newly started college of nursing (15)
3. Plan a counselling session for nursing students. (10)
4. Describe the role of teachers in the development of pupil in nursing (10)
5. Describe the importance of non –projected aids in nursing education (10)
6. Describe the importance of questioning in teaching. (10)

WRITE SHORT NOTES

7. Aims of education.
8. Characteristics of an evaluation tool
9. Micro teaching
10. Objective structured practical examination
11. Formative and summative evaluation (5x5=25)

**FIRST YEAR M.Sc NURSING DEGREE EXAMINATION
CLINICAL SPECIALTY -1**

MENTAL HEALTH (PSYCHIATRIC) NURSING-1

Max. Marks :100 Time : 3 Hours

Model Question paper

Answer all questions

1.
 - a. Explain mental health services available in Kerala and India.
 - b. Discuss the scope, issues and challenges in Psychiatric Nursing. (10+10=20 Marks)
 - 2.. Discuss the medical and nursing management of Mr. X with schizophrenia. (15)
 - 3 Explain the importance of therapeutic use of self and self awareness in psychiatric nursing practice. (10)
 4. Explain the principles of psychiatric nursing (10)
 5. Discuss the legal roles of a Psychiatric Nurse. (10)
 6. Describe the role of nurse while caring a patient with Alcohol Dependence syndrome (10)
- Write short notes on:
7. Transactional analysis.
 8. Critical path ways of care.
 9. Guidance and counselling.
 10. Clinical features of mania
 11. Phobia
- (5 x 5 =25 Marks)

QP Code:

Reg. No.:.....

Second Year M.Sc Nursing Degree Examinations

(Model Question Paper)

NURSING MANAGEMENT

Time: 3 hrs Max. Marks: 100

Answer all questions

Time: 3 hrs

Max. marks: 100

Answer all questions.

1. Explain the principles of management with suitable examples. (20)
 2. Prepare an evaluation tool for performance appraisal of staff nurses. (15)
 3. Explain the utilization of theories of management in nursing service with suitable examples. (10)
 4. Explain the role of nurse administrator in supervision. (10)
 5. Explain the challenges and current trends in nursing administration. (10)
 6. Describe the steps of material management. (10)
- Write short notes (5x5=25)
7. Collective bargaining
 8. Nurses role in occupational health and safety.
 9. Legal issues in nursing
 10. Quality circle
 11. Conflict management

QP Code:

Reg. No.:.....

Second Year M.Sc Nursing Degree Examinations

(Model Question Paper)

Clinical Speciality II - Mental Health (Psychiatric) Nursing

Time: 3 hrs Max. Marks: 100

Answer all questions

1. Explain the process of crisis intervention. Prepare an algorithm for the disaster management at district level. (10+10=20)
2. Discuss the psychosocial problems of people living with HIV/AIDS and nursing management strategies. (15)
3. Discuss the nurses' role in rehabilitation of chronic mentally ill clients. (10)
4. Explain the nursing care of a child with ADHD (10)
5. Describe community mental health practices in Kerala (10)
6. Psychosocial and socio cultural aspects of ageing (10)

Write Short notes:

(5x5=25)

7. Elder abuse
8. District mental health programme
9. Antisocial personality disorder
10. Dissociative disorders
11. Grief

3.7. Internal assessment component

- a) There shall be a minimum of 3 periodic assessments, for theory and practical including viva separately, of which the final one will be University model examination and is mandatory.
- b) Average of the marks of the best two periodic assessments shall be taken as internal assessment mark of the candidate. Marks of evaluation by other methods like assignments, seminars, projects etc. can be added to the internal marks.
- c) The class average of internal assessments mark of theory and practical should not exceed 75% of Maximum marks.
- d) The class average of internal assessment for an examination shall be calculated based on the total number of candidates in a particular batch appearing for that internal assessment examination.
- e) The candidate must secure 50% marks for internal assessment in theory and practical including viva separately in a particular subject in order to be eligible to appear in the university examination of the subject.
- f) In cases where the candidate is permitted to improve the internal assessment marks, the new marks will be taken as final.
- g) The internal marks shall be signed by the candidate before transmission to the University

3.8. Details of practical/clinical practicum exams.

Practicals

- 4 hours of practical examination per student.
- Maximum number of 10 students per day per specialty.
- The examination should be held in concerned clinical area for clinical specialties. Facility for observation of all candidates at a time in the same ward / clinical area by the examiners during practical examinations is mandatory.
- One internal and external examiner should jointly conduct practical examination and viva voce separately for each student.
- Follow the evaluation guidelines for the conduct of practical examinations, Refer 2.10.

3.9. Number of examiners needed (Internal & External) and their qualifications

- One internal and external examiner should jointly conduct practical examination and viva voce separately for each student.

Examiner – Nursing faculty teaching respective specialty area/subjects in M.Sc nursing programme with minimum 3 years post graduate teaching experience.

The examiners should do evaluation of dissertation prior to viva.

3.10. Details of viva:

Duration: Viva-Voce -minimum 30 minutes per student.

4. INTERNSHIP

4.1. Eligibility for internship

Not applicable.

4.2. Details of internship

Not applicable.

4.3. Model of Internship Mark lists

Not applicable.

4.4. Extension rules

As given under clause “Leave, vacation /holidays permitted “

4.5. Details of training given

Not applicable

5. ANNEXURES

5.1. Check Lists for Monitoring: Log Book, Seminar Assessment etc.

As given under “Content of each subject in each year “

Abstract

Abstract provides a brief summary of the dissertation/thesis, summing up clearly the problem examined, the methods used and the main findings. The abstract is a one-paragraph, self-contained summary of the most important elements of the paper. The abstract word limit is between 250 and 300 words. All numbers in the abstract (except those beginning a sentence) should be typed as digits rather than words. Keywords (max. 10) should be given, chosen from nursing subject headings. Each word should be separated by semicolon.

Format for the submission of Dissertation Hard & Soft copy

Instructions to candidates

Although your dissertation may be prepared on a computer, consider the following requirements for meeting the standards.

Paper

Use only one side of high-quality, plain white (unlined in any way) bond paper, minimum 20-lb weight, and 8 ½ x 11 inches in size. Erasable paper should not be used.

Type Size and Print

Select fonts type Times New Roman and a size of 12 characters. The size of the titles should be 14 and Bold, the size of subtitles should be 12 and bold. Print should be letter quality or laser (not dot matrix) printing with dark black characters that are consistently clear and dense. Use the same type of print and print size throughout the document.

Pagination

Number all of the pages of your document, including not only the principal text, but also all plates, tables, diagrams, maps, and so on. Roman numerals are used on the preliminary pages (pages up to the first page of text) and Arabic numerals are used on the text pages. The numbers themselves can be placed anywhere on the page, however they should be consistent.

Spacing

Use double spacing except for long quotations and footnotes which are single-spaced.

Margins

To allow for binding, the left-hand margin must be 1.5 inches. Other margins should be 1.0". Diagrams, or photographs in any form should be a standard page size, or if larger, folded so that a free left-hand margin of 1.5 inch remains and the folded sheet is not larger than the standard page.

Photographs

Professional quality black-and-white photographs are necessary for clear reproduction.

Colors are allowed, but you should be certain the colored figure will copy clearly and will not be confusing when printed in black and white.

File Fomat

Dissertation format should be in .Doc (Ms Word Document) or PDF (Portable Document Format), Image files in JPG or TIFF format and Audio Visual in AVI (Audio Video Interleave), GIF, MPEG (moving picture expert) files format.

Labeling on CD

CD-ROM Labeling should be standard and should contain title, name of the candidate, degree name, subject name, and guide name, name of the department, college, place and year.

References

Vancouver style format.

MASTER OF SCIENCE IN NURSING

M.Sc Child Health (Paediatric) Nursing

Course Code 273

(2016-17 admission onwards)

2016

2. COURSE CONTENT

2.1 Title of course:

MASTER OF SCIENCE IN NURSING – Child Health (Paediatric) Nursing

2.2 Aim & Objectives of the Course

Aim

Aim of the postgraduate programme in nursing is to prepare graduates to assume responsibilities as Clinical Nurse Specialists, Nurse Practitioners, Consultants, Educators, Researchers and Administrators in a wide variety of professional settings.

OBJECTIVES

On completion of the 2 year M.Sc Nursing programme, the graduates will be able to:-

1. Apply the concepts, theories and principles of nursing science.
2. Demonstrate competencies in nursing practice.
3. Practice as Clinical Nurse Specialist.
4. Establish collaborative relationship with the members of other disciplines.
5. Assume leadership in various care settings.
6. Participate in health planning, implementation and evaluation at different levels of health care system.
7. Function as effective nurse educators and nurse managers.
8. Conduct independent nursing research and utilize the research findings in nursing practice and education.
9. Critically evaluate various educational programmes in nursing.
10. Demonstrate interest and positive attitude in continuing education for personal and professional growth.
11. Demonstrate advanced skills and competence in the nursing management of children with medical and surgical conditions in various settings.
12. Incorporate evidence based nursing practice and identify the areas of research

in the field of child health nursing.

13. Describe the recent advancements in the field of child health nursing.

14. Explain the legal and ethical issues pertaining to child health nursing.

15. Function as child health nurse specialist and practitioner.

2.3 Medium of instruction:

Medium of instruction shall be English

2.4 Course outline

1 year	Theory (hrs)	Practical (hrs)
Nursing Education	150	150
Advanced Nursing Practice	150	500
Nursing Research and Statistics	150	100
Child Health (Paediatric)		
Nursing-I	150	900
Total	600	1650
II Year	Theory (hrs)	Practical (hrs)
Nursing Management	150	200
Nursing Research (Dissertation)	-	300
Child Health (Paediatric)		
Nursing -II	150	1450
Total	300	1950
Grand Total	900	3600

2.5 Duration

Duration of the course is for 2 years.

Weeks/year : 52 weeks

Leave : 3 weeks (20 days)

Preparation and Exam : 2 weeks

Total weeks available : 47 weeks

Total hours/week : 48 hours

48 hoursX47weeks : 2256 hour/year

2.6 Syllabus

As given under “Content of each subject in each year”. The concept of Health Care Counselling shall be incorporated in all relevant areas.

2.7 Total number of hours

As given under “Content of each subject in each year”

2.8 Branches if any with definition

Not Applicable

2.9 Teaching learning methods

As given in “Content of each subject in each year”

2.10 Content of each subject in each year

FIRST YEAR M.Sc NURSING

NURSING EDUCATION

Placement: 1st Year

Hours of Instruction

Theory 150 Hours
Nursing Faculty-115
External Faculty- 35
Practical 150 Hours
Total: 300 Hours

Course Description

This course is designed to assist students to develop a broad understanding of fundamental Principles, concepts, trends and issues related to education and nursing education. Further, it would provide opportunity to students to understand, appreciate and acquire skills in teaching and evaluation, curriculum development, implementation, maintenance of standards and accreditation of various nursing educational programs.

Objectives

At the end of the course, students will be able to :

1. Explain the aims of education, philosophies, trends in education and its impact on nursing education.
2. Describe the teaching learning process.
3. Prepare and utilize various instructional media and methods in teaching learning process.
4. Demonstrate competency in teaching, using various instructional strategies.
5. Critically analyze the existing nursing educational programs, their problems, issues and

future trends.

6. Describe the process of curriculum development, and the need and methodology of curriculum change, innovation and integration.
7. Plan and conduct continuing nursing education programs.
8. Critically analyze the existing teacher preparation programs in nursing
9. Demonstrate skill in guidance and counselling.
10. Describe the problems and issues related to the implementation of nursing curriculum including selection and organization of clinical experience.
11. Explain the development of standards and accreditation process in nursing education program Identify research priorities in nursing education.
12. Discuss various models of collaboration in nursing education and services.
13. Explain the concept, principles, steps, tools and techniques of Evaluation.
14. Construct, administer and evaluate various tools for assessment of knowledge, skill, and attitude.

Course Content

* External Faculty (EF)

Activities

- Framing philosophy, aims and objectives.
- Lesson Planning.
- Micro teaching-2.
- Conduct practice teachings using different teaching strategies -10
(Like lecture cum discussion, demonstration- lab method, field trips, seminars, project, role play, panel discussion, clinical methods etc)
- Preparation and utilization of instructional Aids using different media.
- Develop course plans, unit plans, rotation plans.
- Conduct a continuing education workshop.
- Annotated bibliography.
- Critical evaluation of any nursing education program offered by a selected institution.
- Planning and Organizing field visits.
- Construct, administer and evaluate tools (objective & essay type test, observation checklist, rating scale etc)
 - Observe and practice application of various non-standardized tests, (intelligence, Aptitude, Personality, Sociometry, physical & mental disabilities tests.)

Methods of Teaching

- Lecture cum discussion
- Demonstration/ Return demonstration
- Seminar / Presentations
- Project work
- Field visits
- Workshop

Methods of evaluation

- Tests
- Presentation
- Project work

Assignments –Theory

Lesson plan-2,courseplan -1,unit plan 2,rotation plan-2(master plan,clinical rotation)

Evaluation tool-construction,administration and evaluation(Essay,objectivetype,ratingscale,checklist)

Construction of an achievement test

Practical

Practice teaching using different strategies (lecture cum discussion-5,demonstration-2,seminar-1,clinicalteaching -2,symposium/role play/panel discussion)

Internal Assessment (Theory)

	Weightage
Sessional exams (3)	50%
Assignments	25%
Seminar/presentation	25%
Total	100%

Practical – Internal assessment

Preparation of Learning resource material &	25%
Construction of tests/rotation plan.	
Practice Teaching	50%
Conduct Workshop /Short Term Course	25%
Total	100%

ADVANCED NURSING PRACTICE

Placement: 1st Year

Hours of Instruction

Theory: 150 Hours

External Faculty:-30hrs

Nursing Faculty:-120hrs

Practical: 500 Hours

Total : 650 Hours

Course Description

The course is designed to develop an understanding of concepts and constructs of theoretical basis of advance nursing practice and critically analyze different theories of nursing and other disciplines.

Objectives:

At the end of the course the students will be able to:

1. Describe ethical, legal, political and economic aspects of health care delivery and nursing practice.
2. Identify latest trends in nursing and the basis of advanced nursing practice.
3. Explain bio- psycho- social dynamics of health, life style and health care delivery system.
4. Discuss concepts, principles, theories, models, approaches relevant to nursing and their application.
5. Perform health assessment and General physical examination
6. Provide holistic and comprehensive care following nursing process approach
7. Perform extended and expanded role of nurse.
8. Describe alternative modalities of nursing care.
9. Describe the concept of quality control in nursing.
10. Identify the scope of nursing research.
11. Use computer in patient care delivery system and nursing practice.
12. Appreciate importance of self development and professional advancement.

NURSING RESEARCH AND STATISTICS

Placement: 1st Year

Hours of Instruction

Theory : 150 Hours

Practical : 100 Hours

Total : 250 Hours

Part A: Nursing Research

Theory: 100 Hours

Practical: 75 Hours

Total : 175 Hours

Course Description:

The course is designed to assist the students to acquire an understanding of the research methodology and statistical methods as a basis for identifying research problem, planning and implementing a research plan. It will further enable the students to evaluate research studies and utilize research findings to improve quality of nursing practice, education and management.

General Objectives:

At the end of the course, the students will be able to:

1. Recognize the significance of research in nursing and its importance in evidence- based nursing practice.
2. Identify the steps of quantitative and qualitative research.
3. Discuss the ethical aspects of research.
4. Review literature utilizing various resources.
5. Identify researchable problems in nursing.
6. Demonstrate skill in planning and conducting research studies.
7. Communicate research findings.
8. Utilize research findings.
9. Critically evaluate research reports and articles.
10. Write scientific paper for publications.

COURSE CONTENT:

		Utilization of research findings.		
		Writing scientific articles for publication: purposes & style		

Activities:

- ☐ Annotated Bibliography of research reports and articles. -4
- ☐ Review of literature of selected topic and reporting
- ☐ Formulation of problem statement, objective and hypothesis
- ☐ Developing theoretical /conceptual framework.
- ☐ Preparation of a sample research tool.
- ☐ Analysis and interpretation of given data
- ☐ Developing and presenting research proposal
- ☐ Journal presentation-1
- ☐ Critical evaluation of selected research studies –dissertaton-1,journal article -1
- ☐ Writing a scientific paper

Methods of Teaching:

- ☐ Lecture-cum-discussion
- ☐ Seminar/Presentations
- ☐ Project
- ☐ Class room exercises
- ☐ Journal club

Methods of Evaluation:

- ☐ Quiz, Tests(Term)
- ☐ Assignments/Term paper
- ☐ Presentations
- ☐ Project work (Concerned specialty)

Internal Assessment Techniques	Weightage (15 marks)
Sessional exams (2)	40%
Presentations/Seminar	20%
Research critique & presentation	20%
Annotated bibliography ,assignments	20%
Total	100%

Part –B: Statistics (External Faculty)

Hours of Instruction

Theory 50Hours

Practical 25 Hours

Total 75 Hours

Course Description:

At the end of the course, the students will be able to develop an understanding of the statistical methods and apply them in conducting research studies in nursing

General Objectives:

At the end of the course the students will be able to:

1. Explain the basic concepts related to statistics
2. Describe the scope of statistics in health and nursing
3. Organize, tabulate and present data meaningfully
4. Use descriptive and inferential statistics to predict results
5. Draw conclusions of the study and predict statistical significance of the results
6. Describe vital health statistics and their use in health related research
7. Use statistical packages for data analysis.

Course content

Unit	Hours		Content
	Theory	Practical	
I	7		Introduction: <ul style="list-style-type: none"> □ Concepts, types, significance and scope of statistics, meaning of data □ Sample, parameter □ Type and levels of data and their Measurement <ul style="list-style-type: none"> □ Organization and presentation of data-Tabulation of data □ Frequency distribution □ Graphical and tabular presentations
II	4		Measures of central tendency: Mean, Median, Mode

III	4		Measures of variability: □ Range, Percentiles, Average deviation, Quartile deviation, Standard deviation
IV	3		Normal Distribution: □ Probability, Characteristics and application of normal probability curve, Sampling error
V	6		Measures of relationship: □ Correlation-need and meaning □ Rank order correlation □ Scatter diagram method, product moment correlation, Simple linear regression analysis and prediction,
VI	5		Designs and meaning: □ review -Experimental designs □ Comparison in pairs, randomized block design, Latin squares.
VII	8		Significance of Statistic and Significance of difference between two Statistics(Testing hypothesis) □ Non parametric test-Chi-square test, Sign, median test, Mann Whitney test □ Parametric test- t' test, ANOVA,
VIII	5		Use of statistical methods in psychology and education □ Scaling-Z Score, Z Scaling □ Standard Score and T Score □ Reliability of test scores: test-retest method, parallel forms split half method
IX	4	5	Application of statistics in health: Ratios, Rates, Trends Vital health statistics –Birth and death rates Measures related to fertility, morbidity and mortality
X	4	20	Use of Computers for data analysis Use of statistical package

Activities:

- Exercises on organization and tabulation of data
- Graphical and tabular presentation of data
- Calculation of descriptive and inferential statistics (chi square, t-test, correlation)
- Practice in using statistical package
- Computing
- Vital health statistics

Methods of Teaching:

- Lecture-cum-discussion
- Demonstration-on data organization, tabulation, calculation of statistics, use of statistical package, Classroom exercises, organization and tabulation of data
- Computing Descriptive and inferential statistics; vital and health statistics and use of computer for data entry and analysis using statistical package

Methods of Evaluation:

- Test, Classroom statistical exercises

Internal Assessment Techniques	weightage 10 marks
Sessional exams – (2)	100%

CHILD HEALTH (PAEDIATRIC) NURSING-I

Placement :1st Year

Hours of Instruction

Theory 150 Hours

External Faculty- 40 Hours

Internal Faculty- 110 Hours

Practical-900Hours

Total : 1050 Hours

Course Description

This course is designed to assist students in developing expertise and in depth understanding in the field of Child Health Nursing. It will help students to appreciate the child as a holistic individual and develop skill to function as neonatal and child health nurse specialist. It will further enable the student to function as educator, manager, and researcher in the field of Pediatric nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate the history and developments in the field of child health and child health nursing as a specialty.
2. Apply the concepts of growth and development in providing care to the pediatric clients and their families.
3. Perform physical, developmental, and nutritional assessment of pediatric clients
4. Apply nursing process in providing nursing care to neonates & children
5. Integrate the concept of family centered pediatric nursing care with related areas such as genetic disorders, congenital malformations and long term illness.
6. Appreciate the legal and ethical issues pertaining to pediatric and neonatal nursing
7. Describe various recent technologies and treatment modalities in the management of high risk children.
8. Incorporate evidence based nursing practice and identifies the areas of research in the field of pediatric/neonatal nursing

9. Recognize the role of pediatric nurse practitioner as a member of the pediatric and neonatal health team.

10. Teach pediatric nursing to undergraduate students & in-service nurses.

Unit	Hours	Content
I	10	<p>Introduction</p> <p>Review: -</p> <p>Historical development of Pediatrics and Pediatric Nursing in India;</p> <p>Current status of child health in India;</p> <p>Trends in Pediatrics and Pediatric Nursing, Principles of pediatric nursing</p> <p>Ethical and cultural issues in pediatric care</p> <p>Rights of children Nursing theories applicable to child health nursing : Orem's self care deficit, Kulebas theory of comfort , Neuman's system model, Katheryn E Barnard – child health assessment model</p> <p>National health policy for children, special laws and ordinances relating to children.</p> <p>National goals,</p> <p>Five year plans,</p> <p>National health programs related to child health ,National and International organizations related to child health,</p>
II	10 EF 5	<p>Assessment of pediatric clients</p> <p>History taking</p> <p>Developmental assessment</p> <p>Physical assessment</p> <p>Nutritional assessment</p> <p>Family assessment ,Dehydration assessment ,Emergency assessment</p>

III	5	<p>Hospitalized child</p> <p>Review:- Meaning of hospitalization to the child, preparation for hospitalization, effects of hospitalization on the child and family</p> <p>Stressors and reactions related to developmental stages, play activities for ill hospitalized child. Nursing care of hospitalized child and family.</p>
IV	10 EF 5	<p>Pre-natal Pediatrics</p> <p>Embryological and fetal development, Prenatal factors influencing growth and development of fetus,</p> <p>Genetic patterns of common pediatric disorders, chromosomal aberrations, genetic assessment and counseling, Legal and ethical aspects of genetic screening and counseling, role of nurse in genetic counseling, Importance of prenatal care and role of pediatric nurse.</p>
V	10	<p>Growth and Development of children</p> <p>Review: -Factors affecting growth and development</p> <p>Principles of growth and development,</p> <p>Concepts and theories of growth and development,</p> <p>Developmental tasks and special needs from infancy to adolescence, developmental milestones,</p> <p>Assessment of growth and development of pediatric clients, Play needs in different age group, Accidents in children</p> <p>Developmental Problems</p>

<p>VI</p>	<p>10</p> <p>EF 5</p>	<p>Behavioral Pediatrics and Pediatric Nursing</p> <p>Parent child relationship,</p> <p>Basic behavioral pediatric principles and specific behavioral pediatric concepts/disorders- maternal deprivation, failure to thrive, child abuse, battered child syndrome,</p> <p>Common behavioral problems and their management,</p> <p>Child guidance clinic.</p>
<p>VII</p>	<p>10</p> <p>EF 5</p>	<p>Preventive Pediatrics and Pediatric Nursing</p> <p>Concept, aims and scope of preventive pediatrics,</p> <p>Maternal health and its influence on child health, antenatal aspects of preventive pediatrics,</p> <p>Immunization, expanded program on immunization/ universal immunization program and cold chain,</p> <p>Nutrition and nutritional requirements of children, changing patterns of feeding, baby- friendly hospital initiative and exclusive breast feeding, Complementary feeding.</p> <p>Health education, nutritional education for children and mother</p> <p>Nutritional programs</p> <p>Role of pediatric nurse in the hospital and community.</p>

		<p>High Risk Newborn: Identification, classification and nursing management.</p> <p>Nursing management of</p> <ul style="list-style-type: none"> • Preterm, term neonate and growth retarded babies. • Post-mature infant, and baby of diabetic and substance use mothers. • Respiratory conditions, Asphyxia neonatorum, neonatal apnoea, meconium aspiration syndrome, pneumo thorax, pneumo mediastinum • Icterus neonatorum. • Birth injuries. • Hypoxic ischaemic encephelopathy • Congenital anomalies. • Neonatal seizures. • Neonatal hypocalcaemia, hypoglycemia, hypomagnesaemia, Neonatal Hypothyroidism • Neonatal heart diseases. • Neonatal hemolytic diseases • Neonatal infections, neonatal sepsis, ophthalmia, neonatorum, congenital syphilis, HIV/AIDS • Advanced neonatal procedures. • Calculation of fluid requirements. • Hematological conditions – erythroblastosis fetalis, hemorrhagic disorder in the newborn
XIII	20	<p>IMNCI</p> <p>(Integrated management of neonatal and childhood illnesses)</p> <p>Essential New born care, facility based new born care</p>

EF 10: External Faculty

Practical Experience

Total = 900 Hours

1 Week = 48Hours

Sl no	Dept / unit	No of weeks
1.	Pediatric Medical ward	5
2.	Pediatric Surgery ward	2
3.	Labor room/ Maternity ward	1
4.	NICU	8
5.	Community	1
6.	Paed OPD	1
7.	Child guidance clinic	1
	TOTAL	19

Visit to Creche, Child guidance clinic, Anganwadi, Orphanage, Special schools for challenged children.

Clinical Assignments

- Care study – 1 neonatal
- Care analysis - 1
- Clinical presentations - 5
- Growth & developmental assessment – 5
- Health education –individual teaching -5
- Nutritional assessment - 3
- Term paper – 1

- Project

- Drug file
- Project
- Maintain Log book

Procedure to be performed/ assisted

- Assessment of Neonates: Identification & assessment of risk factors, APGAR Score, gestation age, anthropometric assessment
- Admission & discharge of neonates
- Feeding – management of breast feeding, artificial feeding, expression of breast milk
NG(Nasogastric) tube insertion, gavage feeding, TPN, Breast feeding counselling.
- Thermoregulation – Axillary temperature, Kangaroo Mother Care (KMC), Use of Radiant warmer, incubators, management of thermoregulation & control.
- Administration of drugs: I/M, IV injection, IV Cannulation & fixation infusion pump, calculation of dosages neonatal formulation of drugs, use of tuberculin/insulin syringes, Monitoring fluid therapy, Blood administration.
- Procedures for prevention of infections: Hand washing, disinfection & sterilization, fumigation
- Collection of specimens
- Setting, use & maintenance of basic equipment: Ventilator, O2 analyzer, monitoring equipment, Photo therapy unit, Flux meter, infusion pump, Radiant warmer, incubator, Centrifuge machine, Bilimeter, Refractometer, Laminar flow
- Umbilical catheterization – arterial and venous
- Arterial BP monitoring
- Blood transfusion – exchange transfusion full and partial
- Chest tube insertion
- Endotracheal intubation
- Ventilation
- Assist in surgery

Theory weightage		Practical weightage	
Sessional exams (3)	50%	Ongoing clinical evaluation	40%
Term paper -1	25%	Clinical assignments	40%
Seminars	25%	Internal practical	20%
Total	100%	examination Total	100

SECOND YEAR M.Sc NURSING NURSING MANAGEMENT

Placement: II Year

Hours of Instruction

Theory :150 Hours

Nurse Specialist :105 Hours

External :45 Hours

Practical :200 Hours

Total : 350 Hours

Course Description

This course is designed to assist students to develop a broad understanding of principles, concepts, trends and issues related to nursing management. Further, it would provide opportunity to students to understand, appreciate and acquire skills in planning, supervision and management of nursing services at different levels to provide quality nursing services.

Objectives

At the end of the course, students will be able to:

1. Formulate the philosophy and objectives of the health care institutions at various levels.
2. Identify trends and issues in nursing
3. Discuss the public administration, health care administration and nursing administration
4. Describe the principles of administration applied to nursing
5. Explain the organization of health and nursing services at the various levels/institutions.
6. Discuss the planning, supervision and management of nursing workforce for various health care settings.
7. Discuss various collaborative models between nursing education and nursing service to improve the quality of nursing care
8. Identify and analyze legal and ethical issues in nursing administration
9. Describe the process of quality assurance in nursing services.
10. Demonstrate leadership in nursing at various levels.
11. Organize staff development programme.

***EF- External Faculty**

PRACTICALS

1. Prepare prototype personal files for staff nurses, faculty and cumulative records
2. Preparation of budget estimate, revised estimate and performance budget
3. Plan and conduct staff development programme
4. Preparation of Organization Chart
5. Developing nursing standards/protocols for various units
6. Design a layout plan for specialty units /hospital, community and educational institutions
7. Preparation of job description of various categories of nursing personnel

8. Prepare a list of equipments and supplies for specialty units
9. Assess and prepare staffing requirement for hospitals, community and educational institutions
10. Plan of action for recruitment process
11. Prepare a vision and mission statement for hospital, community and educational institutions
12. Prepare a plan of action for performance appraisal
13. Identify the problems of the specialty units and develop plan of action by using problem solving approach
14. Plan a duty roster for specialty units/hospital, community and educational institutions
15. Prepare: anecdotes, incident reports, day and night reports, handing and taking over reports, enquiry reports, nurse's notes, official letters, curriculum vitae, presentations etc.
16. Prepare a plan for disaster management
17. Observation visit to a multispecialty teaching hospital and College and School of Nursing

Methods of Teaching

- Lecture cum discussion
- Seminar / Presentations
- Workshop

Methods of evaluation

- Tests
- Presentation
- Written assignments

CLINICAL SPECIALTY –II

PAEDIATRIC (CHILD HEALTH) NURSING - II

Placement: II Year

Hours of Instruction

Theory: 150 hrs

Practical: 1450 hrs

Total: 1600 hrs

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of Pediatric Nursing. It will help students to develop advanced skills for nursing intervention in various pediatric medical and surgical conditions. It will enable the student to function as pediatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Paediatric nursing.

Objectives

At the end of the course the students will be able to:

1. Apply the nursing process in the care of ill infants to pre adolescents in hospital and community
2. Demonstrate advanced skills/competence in nursing management of children with medical and surgical problems
3. Recognize and manage emergencies in children
4. Provide nursing care to critically ill children
5. Recognize and manage emergencies in neonates.
6. Identify and utilize the recent technology and various treatment modalities in the management of high risk children
7. Prepare a design for layout and describe standards for management of pediatric units/hospitals
8. Identify areas of research in the field of pediatric nursing.

Unit	Hours	Content	Hours	Content
I	5	Introduction Current & Future role of pediatric nurse in various settings -Expanded and Extended		
11	8 EF-2	Medical conditions Pathophysiology, assessment(including interpretation of various invasive and non-invasive diagnostic procedures), treatment modalities and nursing intervention in selected pediatric medical disorders Child with respiratory disorders: Upper respiratory tract: choanal atresia, tonsillitis, epistaxis, aspiration. Lower respiratory tract: Broncheolitis, Bronchopneumonia, Asthma, croup, cystic fibrosis, Empyema, emphysema, pleuraleffusion, lung abscess	5 EF-2	Surgical conditions Assessment(including interpretation of various invasive and non-invasive diagnostic procedures), treatment modalities including cosmetic surgery and nursing interventions in selected pediatric surgical problems/ disorders
III	6 EF-4	Child with gastro-intestinal disorders: Diarrheal diseases, Protuberent abdomen, Abdominal pain, gastro-esophageal reflux Hepatic disorders: Hepatitis, Indian childhood cirrhosis, Wilson's disease, Reyes syndrome, Celiac Disease	8 EF-4	Cleft lip, cleft palate and conditions requiring plastic surgery, Tracheo esophageal fistula/atresia, Hirschsprung's disease/megacolon, malrotation, intestinal obstruction, duodenal atresia, pyloric stenosis, gastrochisis,

		Malabsorption syndrome, Milk protein intolerance, Malnutrition; Deficiency disorders, inflammatory bowel diseases, worm infestations		exomphalus, anorectal malformation, omphalocele, diaphragmatic hernia
IV	5 EF-2	Child with renal/ urinary tract disorders: Nephrotic syndrome, Nephritis, urinary tract infections, Hydronephrosis, hemolytic-uremic syndrome, ARF Fluid electrolyte imbalance in children	4 EF-2	Hypospadias, Epispadias, Undescended testes, Exstrophy bladder Obstructive uropathy, Hydronephrosis,
V	5 EF-2	Child with cardio-vascular disorders: Acquired: Rheumatic fever, Rheumatic heart disease, CCF, Kawasaki's disease, Cardiomyopathy Congenital: Cyanotic and acyanotic	3 EF-2	Surgical Management of Congenital heart diseases.
VI	5	Child with endocrine/metabolic disorders: Diabetes insipidus, Diabetes Mellitus, hyper and hypo thyroidism, inborn errors of metabolism		
VII	5 EF-2	Child with Neurological disorders: seizure disorders, Epilepsy, Status epilepticus, Meningitis, encephalitis, Guillain-Barre syndrome, acute Flaccid paralysis	5 EF-2	Neural tube defects-Spina bifida, Meningocele, Myelomeningocele, hydrocephalus
VIII	6 EF-2	Child with oncological disorders: Leukemias, Lymphomas, Wilms' tumor, neuroblastomas, Rhabdomyosarcoma, retinoblastoma, hepatoblastoma, bone tumors, brain tumors	4 EF-2	Surgical management of Wilms' tumor, neuroblastomas, Rhabdomyosarcoma, retinoblastoma, hepatoblastoma, bone and brain tumors.
IX	5 EF-2	Child with blood disorders: Anemias, thalassemias, hemophilia, polycythemia, thrombocytopenia, and disseminated intravascular coagulation		
X	4	Child with skin disorders: Eczema, Ichthyosis, scabies, atopic dermatitis, staphylococcal scalded skin syndrome, vascular lesions, psoriasis		

XI	5 EF-2	Common Eye & ENT disorders: Nasal obstruction, Epistaxis, wax, otitis externa, otitis media, mastoiditis, childhood deafness, rhinitis, acute sinusitis, tonsillitis, adenoid hypertrophy, laryngeal stridor, congenital glaucoma, cataract, conjunctivitis, trachoma, retinoblastoma, Trauma, strabismus		
XII	6	Common Communicable diseases: TB, Polio, Diphtheria, pertussis, tetanus, chicken pox, measles, mumps, rubella, HIV/AIDS, H1N1, Chikungunya, leptospirosis, dengue, IMN		
XIII		Osteogenesis imperfecta	4	Anomalies of the skeletal system: Talipes, Hip dislocation
XIV			6 EF-2	Nursing management of the child with traumatic injuries: General principles of managing Pediatric trauma; Head injury, abdominal injury, poisoning, foreign body obstruction, burns
XV			2	Bites & Stings
XVI			5 EF-4	Organ transplantation Liver Kidney
XVII			4	Management of stomas, catheters and tubes Management of wounds and drainages
XVIII	20 EF-7	Intensive care for pediatric clients Resuscitation, and post resuscitation management		

		Care of critically ill child – physical, physiological, psychological, Legal and ethical issues in pediatric intensive care Intensive care procedures, central line, intra osseous, endotracheal intubation, mechanical ventilation, tracheostomy care, peritoneal dialysis, emergency medication. Documentation- ICU flow sheet		
X1X	10	Administration and management of pediatric care unit Design & layout, Staffing, Equipment, supplies, Norms, policies and protocols Practice standards for pediatric care unit Organization of neonatal care, services(Levels), transport, neonatal intensive care unit, organization and management of nursing services in NICU Documentation		
XX	5	Education and training in Pediatric care Staff orientation, training and development, In-service education program, Clinical teaching programs.

Clinical Assignments

- Care analysis – 2 (medical -1,Surgical -1)
- Clinical profile- 2
- Clinical presentations – 5
- Clinical teaching -3
- Term paper – 1
- Drug file
- Maintain Log book

Essential

I. Procedures to be observed:

- Echo cardiogram
- Ultrasound head
- ROP screening (Retinopathy of prematurity)
- Any other

II. Procedures to be Assisted

- Advanced neonatal life support
- Lumbar Puncture
- Arterial Blood Gas
- ECG Recording
- Umbilical catheterization – arterial and venous
- Arterial B P monitoring
- Blood transfusion- exchange transfusion full and partial
- IV cannulation& therapy
- Arterial catheterization
- Chest tube insertion
- Endotracheal intubation
- Ventilation
- Insertion of long line-arterial /Venous access
- Assist in surgery

III. Procedures to be Performed:

- Airway Management
 - Application of Oro Pharyngeal Airway
 - Oxygen therapy
 - CPAP(Continuous Positive Airway Pressure)
 - Care of Tracheostomy
 - Endotracheal Intubation

- Neonatal Resuscitation
- Monitoring of Neonates – clinically & with monitors, CRT(Capillary Refill Time), assessment of jaundice, ECG
- Gastric Lavage , Setting of Ventilators
- Phototherapy
- Assessment of Neonates: Identification & assessment of risk factors, APGAR Score, gestation age, Anthropometric assessment, Weighing the baby, Newborn examination, detection of life threatening congenital abnormalities,
- Admission & discharge of neonates
- Feeding - management of breast feeding, artificial feeding, expression of breast milk, OG(Orogastric) tube insertion, gavage feeding, TPN, Breast feeding counseling
- Thermoregulation- Axillary temperature, Kangaroo Mother Care (KMC), Use of Radiant warmer, incubators, management of thermoregulation & control
- Administration of Drugs: I/M, IV injection, IV Cannulation & fixation, infusion pump, Calculation of dosages, Neonatal formulation of drugs, use of tuberculin/ insulin syringes,
- Monitoring fluid therapy, Blood administration
- Procedures for prevention of infections: Hand washing, disinfections & sterilization, surveillance, fumigation
- Collection of specimens
- Setting, Use & maintenance of basic equipment: Ventilator, O2analyzer, monitoring equipment, Photo therapy unit, Flux meter, Infusion pump, Radiant warmer, incubator, Centrifuge machine, Bilimeter, Refractometer, laminar flow

2.11 No: of hours per subject.

As given under “Content of each subject in each year”

2.12 Practical training.

As given under “Content of each subject in each year “

2.13 Records

Proper records of practical work should be meticulously maintained and duly signed by the supervising teacher should be submitted at the time of University practical examinations.

2.14 Dissertation: Guide/Co-Guide/ Change of Guide

Dissertation

Every candidate pursuing M .Sc Nursing course is required to carry out work on a selected research project under the guidance of a recognized postgraduate teacher. The results of such a work shall be submitted in the form of a dissertation.

The dissertation is aimed to train a postgraduate student in research methods and techniques. It includes identification of problem, formulation of hypothesis, review of literature, getting acquainted with recent advances, designing of a research study, collection of data, critical analysis, and comparison of results and drawing conclusions.

Every candidate shall submit to the University in the prescribed format a synopsis containing particulars of proposed dissertation work after obtaining ethical clearance from the Institutional Ethical Committee comprising principal/ Senior Professor of College of Nursing, **within ninemonths from the date of commencement of the course on or before the dates notified by the University.** The synopsis shall be sent through the proper channel.

Such proposal will be reviewed and the dissertation topic will be registered by the university. No change in the dissertation topic or Guide shall be made without prior approval of the University.

Tentative Schedule for dissertation

S. No.	Activities	Scheduled Time
1	Submission of the research proposal	End of 9th month of 1st year
2	Submission of dissertation Final	End of 9th month of IIInd Year

The dissertation should be written under the following headings:

1. INTRODUCTION
2. REVIEW OF LITERATURE
3. METHODOLOGY
4. ANALYSIS & INTERPRETATION
5. RESULTS
6. DISCUSSION, SUMMARY AND CONCLUSION

REFERENCES

APPENDICES

Dissertation style: Vancouver style format is used.

The written text of dissertation shall be not less than 75 pages and shall not exceed 100 pages excluding references, questionnaires, and other annexures. It should be neatly typed (font size 12-Times New Roman) in double line spacing on one side of the bond paper (A4 size, 8.27 x 11.69") and bound properly. Spiral binding should be avoided. The Guide and the Head of the Institution shall certify the dissertation. Checking of Plagiarism may be done as per university norms.

The scientific committee of the college should scrutinize and evaluate the thesis and make required corrections if necessary and accept with modification before submitting to the University.

Four copies of the dissertation prepared shall be submitted to the Principal of the institution for onward transmission to University on the 21st month of commencement of the course.

Hall ticket for the second year examination should be issued to the candidate.

only after the dissertation has been submitted to the University

Guidelines for submission of dissertation is given in Annexure

Research Guides

a) Qualification of Guide

Main guide: Nursing faculty / nursing expert in the field of study holding Ph.D. /M.Phil/M.Sc. Nursing with a minimum of 3 years experience in teaching in the Post Graduate Programme in Nursing.

Co-Guide: A Co-Guide is a nursing faculty/expert in the field of study (may be from outside the college but should be within the district)

b) Guide – Students Ratio

Maximum of 1:5 (including as co-guide)

Change of Guide –In the event of a registered guide leaving the college for any reason or in the event of death of Guide, Guide may be changed with prior permission from the University.

c) Research Committee

There should be a research committee/scientific review committee in each college comprising of minimum 5 Post Graduate Faculty representing all specialty chaired by the Principal, College of Nursing.

2.15 Speciality training if any

Nil

2.16 Project work to be done if any

Clinical Assignments as given in “Content of each subject in each year”

2.17 Any other requirements [CNE, Paper Publishing etc.]

As given under “Content of each subject in each year”

2.18 Prescribed/recommended textbooks for each subject

As given under “Content of each subject in each year”

2.19 Reference books

As given under “Content of each subject in each year”

2.20 Journals

As given under “Content of each subject in each year”

2.21 Logbook

Every candidate shall maintain a log book for recording performance of activities/ procedures/ attending/ organizing workshop/ conferences. The logbook shall be verified and certified by the Head of the Institution and presented in the University practical examination

3. EXAMINATIONS

3.1. Eligibility to appear for exams [including Supplementary]

a). Attendance and Marks

Candidate should have 80% attendance for both theory and practical, with minimum 50% of internal marks in each subject both in theory & practical. However 100% of attendance should be completed for practical before the award of degree. **There is no provision for condonation of attendance for the PG candidates.**

b). Examination fee

The examination fee should be remitted for each examination appeared for. A fee as stipulated by the University should also be remitted for the evaluation of the dissertation.

c). Log Book

Every candidate shall maintain a log book for recording performance of activities/ procedures/ attending/ organizing workshop/ conferences. The logbook shall be verified and certified by the Head of the Institution and presented in the University practical examination.

3.2. Schedule of Regular/Supplementary exams

Regular University Examination will be conducted at the end of each academic year and Supplementary examinations will be conducted once in a year after regular examination.

3.3. Scheme of examination showing maximum marks and minimum marks

1 st year	Theory					Practical					Total
	Hours	Internal Marks		External Marks		Hours	Internal Marks		External Marks

* Nursing Research (External) =75Marks and Statistics (External) =25 Marks

**Nursing Research (Internal) =15 and Statistics (Internal) =10

1. There shall be one regular & one supplementary examination every year.
2. Minimum pass marks shall be 50 % in each of the Theory and practical papers separately.
3. A candidate has to pass in theory and practical exam separately in each of the paper.
4. There is no provision for grace marks for pass in PG examination.
5. Maximum number of candidates for all practical examination should not exceed ten per day.
6. One internal and one external examiner should evaluate dissertation and jointly conduct viva-voce for each student.
7. For Dissertation internal examiner and external examiner should be a Nursing faculty / Nursing expert in the same clinical specialty holding Ph.D./M.Phil/M.Sc. Nursing with a minimum of 3 years experience in guiding the research projects for Post Graduate students of Nursing.

3.4. Papers in each year

As given under clause "Content of each subject in each year "

3.5. Details of theory exams [include number of papers, Duration, Type of questions & number of questions and marks

As given under “Scheme of examination showing Maximum and Minimum Marks and 3.6. “

3.6. Model question paper for each subject with question paper pattern

Question Paper Pattern

I) All subjects with Maximum Marks:100		
Long Essay	1x20 marks 1x15 marks	35 marks
Short Essay	4x10 marks	40marks
Short Notes	5x5 marks	25 marks
Total Marks		100 marks
II) Nursing Research Max.marks:75		
Long Essay	2x15 marks	30 marks
Short Essay	3x10 marks	30 marks
Short notes	3x 5 marks	15 marks
Total Marks		75 marks
III) Statistics : 25 marks		
Statistical Calculations	1x10 marks	10 marks
Short notes	3x5 marks	15 marks
Total Marks		25 marks

QP Code:

Reg. No.:.....

I YEAR M.SC (NURSING) DEGREE EXAMINATION

ADVANCED NURSING PRACTICE

Model question paper

Time: Three hours Maximum marks: 100 marks

Answer all questions

- I a. Define the concept of health promotion
- b. Explain the major assumptions of Penders' Health promotion model.
- c. Describe the application of Health Promotion Model in the management of obesity among women in the reproductive age group.
(2+8+10 = 20 marks)

2. Mr. M is admitted in the surgical ward with hemorrhagic shock after road traffic accident.
 - a. Explain the pathophysiology of haemorrhagic shock
 - b. List any 3 nursing diagnosis according to priority for this patient and prepare a care plan.
(5+10=15marks)

3. Describe the basic elements and explain the barriers of communication (10 marks)
4. Describe the challenges faced by the Health care delivery system in Kerala (10 marks)
5. Briefly explain the safe disposal of biomedical wastes (10 marks)
6. Explain the principles and techniques of counseling (10 marks)

- Write short notes on (5x 5 = 25 marks)
7. Anti retroviral therapy
8. Use of computers in nursing practice
9. Haemodialysis
10. Metabolic acidosis
11. Genetic counseling

QP Code:

Reg. No.:.....

FIRST YEAR M.Sc NURSING DEGREE EXAMINATION

NURSING RESEARCH & STATISTICS

MODEL QUESTION PAPER

Time: Three Hours. Maximum: 100 Marks

Answer Section A and B in separate answer books

SECTION A : NURSING RESEARCH

Max. Marks : 75

1. Write a research proposal for a research problem 'quality of life of patients with AIDS' 15
2. Describe observation as a method of data collection. 15
3. Explain the criteria for selection of a research problem. 10
4. Describe the methods of controlling extraneous variables. 10
5. Explain the different types of sampling. 10

Write Short notes on

6. Evidence based practice.
7. Grounded theory.
8. Purposes of literature review. (3x5=15)

Section B: statistics

9. Which is the appropriate statistical test to conclude in the data given below; growth status and exposure to infection are associated. Conduct the statistical test and arrive your conclusion about data. P value at 5% level significance is 3.84

Growth status	infected	Non infected	Total
good	80	90	170
poor	240	110	350
total	320	300	620

10

SHORT NOTES

10. Properties of normal distribution.

11. Describe different methods of dispersion with merits and demerits

12. Reliability

3x 5 =15

QP Code:

Reg. No.:.....

First Year MSc Nursing Degree Examinations

NURSING EDUCATION

Model question paper

Time : 3 hrs

Max.marks:100

Answer All Questions

1. Explain the current trends in nursing education in India. (20)
2. Prepare the philosophy for a newly started college of nursing (15)
3. Plan a counselling session for nursing students. (10)
4. Describe the role of teachers in the development of pupil in nursing (10)
5. Describe the importance of non –projected aids in nursing education (10)
6. Describe the importance of questioning in education. (10)

WRITE SHORT NOTES

7. Aims of education.
8. Characteristics of an evaluation tool
9. Micro teaching
10. Objective structured practical examination
11. Formative and summative evaluation (5x5=25)

QP Code:

Reg. No.:.....

First Year MSc Nursing Degree Examinations

Model question paper

CHILD HEALTH NURSING I

Time 3 hrs

Answer all questions

Max marks 100

1. Discuss the indications and mechanism of action of exchange transfusion. Briefly explain the role on nurse to prevent complication (10+10)
2. Explain the concept and principles of integrated management of neonatal and child hood illness (15)
3. Describe the genetic pattern of common paediatric disorders (10)
4. Discuss the impact of maternal health on growth and development of Indian children (10)
5. Explain the learning disabilities and its management (10)
6. List the causes of cerebral palsy and describe the rehabilitation of a child with cerebral palsy (10)

Write Short notes

(5X5=25marks)

7. Cultural practices of nutritional assessment
8. Components of nutritional assessment
9. Behavioural problems of school children and their management
10. Concepts of preventive paediatrics
11. Essential care of a terminal ill child

QP Code:

Reg. No.:.....

Second Year M.Sc Nursing Degree Examinations

(Model Question Paper)

NURSING MANAGEMENT

Time: 3 hrs Max. Marks: 100

Answer all questions

Time: 3 hrs

Max. marks: 100

Answer all questions.

1. Explain the principles of management with suitable examples. (20)
 2. Prepare an evaluation tool for performance appraisal of staff nurses. (15)
 3. Explain the utilization of theories of management in nursing service with suitable examples. (10)
 4. Explain the role of nurse administrator in supervision. (10)
 5. Explain the challenges and current trends in nursing administration. (10)
 6. Describe the steps of material management. (10)
- Write short notes (5x5=25)
7. Collective bargaining
 8. Nurses role in occupational health and safety.
 9. Legal issues in nursing
 10. Quality circle
 11. Conflict management

First Year MSc Nursing Degree Examinations

Model question paper

CHILD HEALTH NURSING II

Time 3 hrs

Answer all questions

Max marks 100

1. Describe the signs and symptoms, pathophysiology and management of a child with bronchiolitis (4+6+10)
2. Explain in detail about the causes, signs and symptoms and pathophysiology of hydrocephalus (15)
3. Discuss the congenital cardiac defects with increased pulmonary flow under the following heading
 - Hemodynamic changes
 - Signs and symptoms (10)
4. Explain the immediate post operative management of a child with diaphragmatic hernia (10)
5. Discuss the ethical issues in child care (10)
6. Discuss the practice standards for paediatric care units (10)

Write Short notes

(5X5=25 marks)

7. Extended role of paediatric nurse
8. Nursing care of child with convulsions
9. Clinical features of rheumatic heart disease
10. Hirschsprungs' disease
11. Obstructive uropathy

3.7. Internal assessment component

- a) There shall be a minimum of 3 periodic assessments, for theory and practical including viva separately, of which the final one will be University model examination and is mandatory.
- b) Average of the marks of the best two periodic assessments shall be taken as internal assessment mark of the candidate. Marks of evaluation by other methods like assignments, seminars, projects etc. can be added to the internal marks.
- c) The class average of internal assessments mark of theory and practical should not exceed 75% of Maximum marks.
- d) The class average of internal assessment for an examination shall be calculated based on the total number of candidates in a particular batch appearing for that internal assessment examination.
- e) The candidate must secure 50% marks for internal assessment in theory and practical including viva separately in a particular subject in order to be eligible to appear in the university examination of the subject.
- f) In cases where the candidate is permitted to improve the internal assessment marks, the new marks will be taken as final.
- g) The internal marks shall be signed by the candidate before transmission to the University

3.8. Details of practical/clinical practicum exams to include Duration, Marks, Types of cases/ question

Practicals

- hours of practical examination per student.
- Maximum number of 10 students per day per specialty.
- The examination should be held in concerned clinical area for clinical specialties. Facility for observation of all candidates at a time in the same ward / clinical area by the examiners during practical examinations is mandatory.
- One internal and external examiner should jointly conduct practical examination and viva voce separately for each student.
- Follow the evaluation guidelines for the conduct of practical examinations Refer 2.10

3.9. Number of examiners needed (Internal & External) and their qualifications

- One internal and external examiner should jointly conduct practical examination and viva voce separately for each student.

Examiner – Nursing faculty teaching respective specialty area/subjects in M.Sc nursing programme with minimum 3 years post graduate teaching experience.

The examiners should do evaluation of dissertation prior to viva.

3.10. Details of viva:

Duration: Viva-Voce -minimum 30 minutes per student.

4. INTERNSHIP

4.1. Eligibility for internship

Not applicable.

4.2. Details of internship

Not applicable.

4.3. Model of Internship Mark lists

Not applicable.

4.4. Extension rules

As given under clause “ Leave , Vacation / Holidays permitted.

4.5. Details of training given

Not applicable.

Abstract

Abstract provides a brief summary of the dissertation/thesis, summing up clearly the problem examined, the methods used and the main findings. The abstract is a one-paragraph, self-contained summary of the most important elements of the paper. The abstract word limit is between 250 and 300 words. All numbers in the abstract (except those beginning a sentence) should be typed as digits rather than words. Keywords (max. 10) should be given, chosen from nursing subject headings. Each word should be separated by semicolon.

Format for the submission of Dissertation Hard & Soft copy

Instructions to candidates

Although your dissertation may be prepared on a computer, consider the following requirements for meeting the standards.

Paper

Use only one side of high-quality, plain white (unlined in any way) bond paper, minimum 20-lb weight, and 8 ½ x 11 inches in size. Erasable paper should not be used.

Type Size and Print

Select fonts type Times New Roman and a size of 12 characters. The size of the titles should be 14 and Bold, the size of subtitles should be 12 and bold. Print should be letter quality or laser (not dot matrix) printing with dark black characters that are consistently clear and dense. Use the same type of print and print size throughout the document.

Pagination

Number all of the pages of your document, including not only the principal text, but also all plates, tables, diagrams, maps, and so on. Roman numerals are used on the preliminary pages (pages up to the first page of text) and Arabic numerals are used on the text pages. The numbers themselves can be placed anywhere on the page, however they should be consistent.

Spacing

Use double spacing except for long quotations and footnotes which are single-spaced.

Margins

To allow for binding, the left-hand margin must be 1.5 inches. Other margins should be 1.0". Diagrams, or photographs in any form should be a standard page size, or if larger, folded so that a free left-hand margin of 1.5 inch remains and the folded sheet is not larger than the standard page.

Photographs

Professional quality black-and-white photographs are necessary for clear reproduction. Colors are allowed, but you should be certain the colored figure will copy clearly and will not be confusing when printed in black and white.

File Fomat

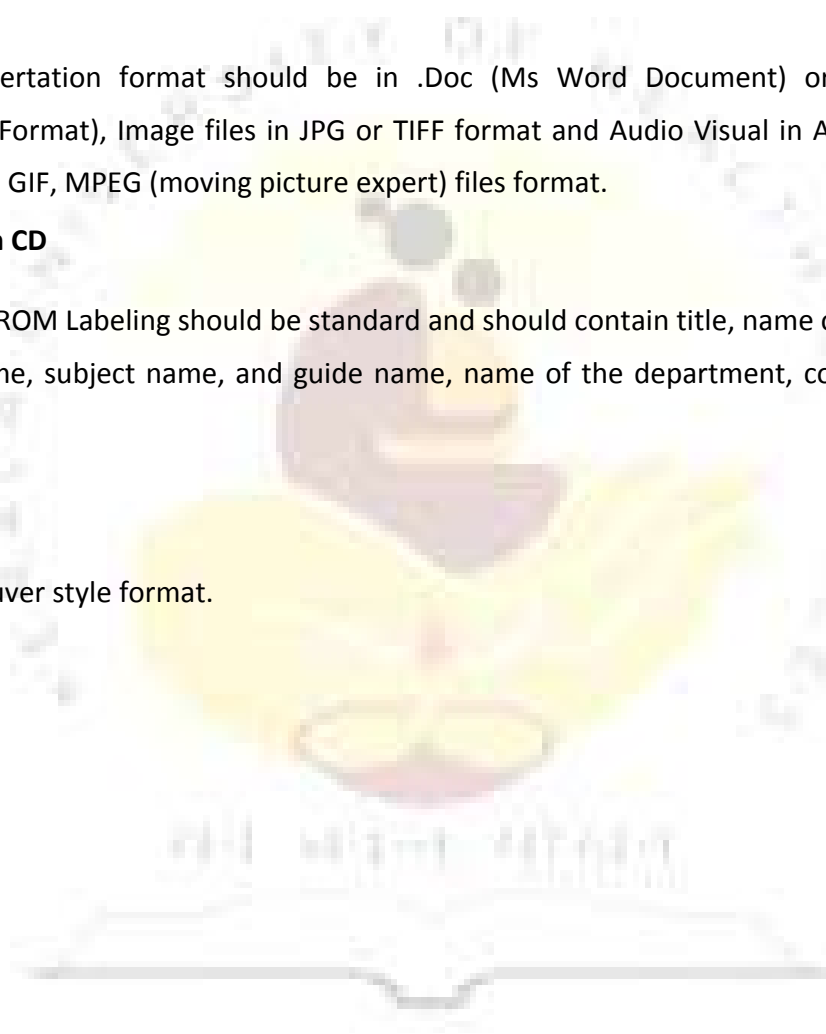

Dissertation format should be in .Doc (Ms Word Document) or PDF (Portable Document Format), Image files in JPG or TIFF format and Audio Visual in AVI (Audio Video Interleave), GIF, MPEG (moving picture expert) files format.

Labeling on CD

CD-ROM Labeling should be standard and should contain title, name of the candidate, degree name, subject name, and guide name, name of the department, college, place and year.

References

Vancouver style format.

MASTER OF SCIENCE IN NURSING

M.Sc. Community Health Nursing

Course Code 274

(2016-17 admission onwards)

2016

2. COURSE CONTENT

2.1 Title of course:

MASTER OF SCIENCE IN NURSING – Community Health Nursing

2.2. Aim and Objectives of the Course

Aim

Aim of the postgraduate programme in nursing is to prepare graduates to assume responsibilities as Clinical Nurse Specialists, Nurse Practitioners, Consultants, Educators, Researchers and Administrators in a wide variety of professional settings.

Objectives

On completion of the 2 year M.Sc Nursing programme, the graduates will be able to:-

1. Apply the concepts, theories and principles of nursing science.
2. Demonstrate competencies in nursing practice.
3. Practice as Clinical Nurse Specialist.
4. Establish collaborative relationship with the members of other disciplines.
5. Assume leadership in various care settings.
6. Participate in health planning, implementation and evaluation at different levels of health care system.
7. Function as effective nurse educators and nurse managers.
8. Conduct independent nursing research and utilize the research findings in nursing practice and education.
9. Critically evaluate various educational programmes in nursing.
10. Demonstrate interest and positive attitude in continuing education for personal and professional growth.
11. Incorporate evidence based nursing practice and identify the areas of research in the field of community health nursing.
12. Describe the recent advancements in the field of community health nursing.
13. Explain the legal and ethical issues pertaining to community health nursing.
14. Function as community health nurse specialist.

2.3. Medium of instruction:

Medium of instruction shall be English.

2.4. Course outline

1 year	Theory (hrs)	Practical (hrs)
Nursing Education	150	150
Advanced Nursing Practice	150	500
Nursing Research and Statistics	150	100
Community Health Nursing-I	150	900
Total	600	1650
II Year	Theory (hrs)	Practical (hrs)
Nursing Management	150	200
Nursing Research (Dissertation)	-	300
Community Health Nursing -II	150	1450
Total	300	1950
Grand Total	900	3600

2.5. Duration

Duration of the course is for 2 years.

Weeks/year : 52 weeks

Leave : 3 weeks (20 days)

Preparation and Exam : 2 weeks

Total weeks available : 47 weeks

Total hours/week : 48 hours

48 hoursX47weeks : 2256 hour/year

2.6. Syllabus

As given under "Content of each subject in each year"

The concept of Health Care Counselling shall be incorporated in all relevant areas

2.7. Total number of hours

As given under "Content of each subject in each year "

2.8. Branches if any with definition

Not Applicable

2.9. Teaching learning methods

As given under “Content of each subject in each year “

2.10. Content of each subject in each year

FIRST YEAR M.Sc NURSING

NURSING EDUCATION

Placement: 1st Year

Hours of Instruction

Theory 150 Hours
Nursing Faculty-115
External Faculty- 35
Practical 150 Hours
Total: 300 Hours

Course Description

This course is designed to assist students to develop a broad understanding of fundamental Principles, concepts, trends and issues related to education and nursing education. Further, it would provide opportunity to students to understand, appreciate and acquire skills in teaching and evaluation, curriculum development, implementation, maintenance of standards and accreditation of various nursing educational programs.

Objectives

At the end of the course, students will be able to :

1. Explain the aims of education, philosophies, trends in education and its impact on nursing education.
2. Describe the teaching learning process.
3. Prepare and utilize various instructional media and methods in teaching learning process.
4. Demonstrate competency in teaching, using various instructional strategies.
5. Critically analyze the existing nursing educational programs, their problems, issues and future trends.
6. Describe the process of curriculum development, and the need and methodology of curriculum change, innovation and integration.
7. Plan and conduct continuing nursing education programs.

8. Critically analyze the existing teacher preparation programs in nursing
9. Demonstrate skill in guidance and counselling.
10. Describe the problems and issues related to the implementation of nursing curriculum including selection and organization of clinical experience.
11. Explain the development of standards and accreditation process in nursing education programs.
12. Identify research priorities in nursing education.
13. Discuss various models of collaboration in nursing education and services.
14. Explain the concept, principles, steps, tools and techniques of Evaluation.
15. Construct, administer and evaluate various tools for assessment of knowledge, skill, and attitude.

Activities

- Framing philosophy, aims and objectives.
- Lesson Planning.
- Micro teaching-2.
- Conduct practice teachings using different teaching strategies -10
(Like lecture cum discussion, demonstration- lab method, field trips, seminars, project, role play, panel discussion, clinical methods etc)
- Preparation and utilization of instructional Aids using different media.
- Develop course plans, unit plans, rotation plans.
- Conduct a continuing education workshop.
- Annotated bibliography.
- Critical evaluation of any nursing education program offered by a selected institution.
- Planning and Organizing field visits.
- Construct, administer and evaluate tools (objective & essay type test, observation checklist, rating scale etc)
 - Observe and practice application of various non-standardized tests, (intelligence, Aptitude, Personality, Sociometry, physical & mental disabilities tests.)

Methods of Teaching

- Lecture cum discussion
- Demonstration/ Return demonstration
- Seminar / Presentations
- Project work
- Field visits
- Workshop

Methods of evaluation

- Tests
- Presentation
- Project work

Assignments –Theory

Lesson plan-2,courseplan -1,unit plan 2,rotation plan-2(master plan,clinical rotation)

Evaluation tool-construction,administration and evaluation(Essay,objectivetype,ratingscale,checklist)

Construction of an achievement test

Practical

Practice teaching using different strategies (lecture cum discussion-5,demonstration-2,seminar-1,clinicalteaching -2,symposium/role play/panel discussion)

Internal Assessment (Theory)

	Weightage
Sessional exams (3)	50%
Assignments	25%
Seminar/presentation	25%
Total	100%

Practical – Internal assessment

Preparation of Learning resource material &	25%
Construction of tests/rotation plan.	
Practice Teaching	50%
Conduct Workshop /Short Term Course	25%
Total	100%

ADVANCED NURSING PRACTICE

Placement: 1st Year

Hours of Instruction

Theory: 150 Hours

External Faculty:-30hrs

Nursing Faculty:-120hrs

Practical: 500 Hours

Total : 650 Hours

Course Description

The course is designed to develop an understanding of concepts and constructs of theoretical basis of advance nursing practice and critically analyze different theories of nursing and other disciplines.

Objectives:

At the end of the course the students will be able to:

1. Describe ethical, legal, political and economic aspects of health care delivery and nursing practice.
2. Identify latest trends in nursing and the basis of advanced nursing practice.
3. Explain bio- psycho- social dynamics of health, life style and health care delivery system.
4. Discuss concepts, principles, theories, models, approaches relevant to nursing and their application.
5. Perform health assessment and General physical examination
6. Provide holistic and comprehensive care following nursing process approach
7. Perform extended and expanded role of nurse.
8. Describe alternative modalities of nursing care.
9. Describe the concept of quality control in nursing.
10. Identify the scope of nursing research.
11. Use computer in patient care delivery system and nursing practice.
12. Appreciate importance of self development and professional advancement.

NURSING RESEARCH AND STATISTICS

Placement: 1st Year

Hours of Instruction

Theory : 150 Hours

Practical : 100 Hours

Total : 250 Hours

Part A: Nursing Research

Theory: 100 Hours

Practical: 75 Hours

Total : 175 Hours

Course Description:

The course is designed to assist the students to acquire an understanding of the research methodology and statistical methods as a basis for identifying research problem, planning and implementing a research plan. It will further enable the students to evaluate research studies and utilize research findings to improve quality of nursing practice, education and management.

General Objectives:

At the end of the course, the students will be able to:

1. Recognize the significance of research in nursing and its importance in evidence- based nursing practice.
2. Identify the steps of quantitative and qualitative research.
3. Discuss the ethical aspects of research.
4. Review literature utilizing various resources.
5. Identify researchable problems in nursing.
6. Demonstrate skill in planning and conducting research studies.
7. Communicate research findings.
8. Utilize research findings.
9. Critically evaluate research reports and articles.
10. Write scientific paper for publications.

Part –B: Statistics (External Faculty)

Hours of Instruction

Theory 50Hours

Practical 25 Hours

Total 75 Hours

Course Description:

At the end of the course, the students will be able to develop an understanding of the statistical methods and apply them in conducting research studies in nursing

General Objectives:

At the end of the course the students will be able to:

1. Explain the basic concepts related to statistics
2. Describe the scope of statistics in health and nursing
3. Organize, tabulate and present data meaningfully
4. Use descriptive and inferential statistics to predict results
5. Draw conclusions of the study and predict statistical significance of the results
6. Describe vital health statistics and their use in health related research
7. Use statistical packages for data analysis.

Course content

Unit	Hours		Content
	Theory	Practical	
I	7		Introduction: <ul style="list-style-type: none">□ Concepts, types, significance and scope of statistics, meaning of data□ Sample, parameter□ Type and levels of data and their Measurement<ul style="list-style-type: none">□ Organization and presentation of data-Tabulation of data□ Frequency distribution□ Graphical and tabular presentations
II	4		Measures of central tendency: Mean, Median, Mode

III	4		Measures of variability: □ Range, Percentiles, Average deviation, Quartile deviation, Standard deviation
IV	3		Normal Distribution: □ Probability, Characteristics and application of normal probability curve, Sampling error
V	6		Measures of relationship: □ Correlation-need and meaning □ Rank order correlation □ Scatter diagram method, product moment correlation, Simple linear regression analysis and prediction,
VI	5		Designs and meaning: <ul style="list-style-type: none"> □ review -Experimental designs □ Comparison in pairs, randomized block design, Latin squares.
VII	8		Significance of Statistic and Significance of difference between t Statistics(Testing hypothesis) <ul style="list-style-type: none"> □ Non parametric test-Chi-square test, Sign, median test, Mann Whitney test □ Parametric test- <u>t</u>' test, ANOVA,
VIII	5		Use of statistical methods in psychology and education <ul style="list-style-type: none"> □ Scaling-Z Score, Z Scaling □ Standard Score and T Score □ Reliability of test scores: test-retest method, parallel forms split half method
IX	4	5	Application of statistics in health: Ratios, Rates, Trends Vital health statistics –Birth and death rates Measures related to fe and mortality
X	4	20	Use of Computers for data analysis Use of statistical package

Activities:

- Exercises on organization and tabulation of data
- Graphical and tabular presentation of data
- Calculation of descriptive and inferential statistics (chi square, t-test, correlation)
- Practice in using statistical package
- Computing
- Vital health statistics

Methods of Teaching:

- Lecture-cum-discussion
- Demonstration-on data organization, tabulation, calculation of statistics, use of statistical package, Classroom exercises, organization and tabulation of data
- Computing Descriptive and inferential statistics; vital and health statistics and use of computer for data entry and analysis using statistical package

Methods of Evaluation:

- Test, Classroom statistical exercises

Internal Assessment Techniques	Weightage	marks
Sessional exams – (2)	100%

CLINICAL SPECIALTY – 1
COMMUNITY HEALTH NURSING – 1

Placement–I Year

Hours of instruction

Theory - 150 hours

External - 20 Hours

Internal -130Hours

Practical - 900 hours

Total - 1050 hours

Course Description:

This course is designed to assist students in developing expertise and indepth understanding in the field of community health. It will enable the students to acquire knowledge regarding concepts, principles, methods and approaches in community health nursing. It will help the students to learn about epidemiology, environmental health, population dynamics and family health care.

Objectives:

At the end of the course, the students will be able to:

1. Review the history and development in the field of community health and community health nursing
2. Analyze the role of individuals and families in promoting health of the community
3. Perform physical, developmental and nutritional assessment of individuals, families and groups
4. Apply the concepts of promotive, preventive, curative and rehabilitative aspects of health while providing care to the members of the community
5. Apply nursing process approach while providing care to individuals, families, groups and community.
6. Integrate the concepts of family centred nursing approach while providing care to the community.
7. Apply concepts and principles of epidemiology in the practice of community health nursing

8. Recognize and participate in the management of emergencies, epidemics and disasters
9. Utilize the concept of demography and its application in public health
10. Appreciate legal and ethical issues pertaining to community health nursing care
11. Conduct need based community health projects
12. Participate in various national health and family welfare programmes at local, state and national level.
13. Participate effectively as a member of community health team
14. Coordinate and collaborate with various agencies operating in the community
15. Teach community health nursing to undergraduates, community health workers and nurses working in the hospital and community.

Practical Experience

Total = 900 Hours

1 week = 48 hours

Sl. No	Dept/Unit	No. of weeks
1	Preventive clinic, Infectious disease unit, Family planning unit, Paediatrics & Neonatology Antenatal & Postnatal unit, Labour room	6 weeks
2	Primary health centre, Community health centre	6 weeks
3	Urban health centre	2 weeks
4	Selected community	5 weeks
	Total	19 weeks

Clinical Activities

- Identification of community leaders and resource persons
- Identification of a selected community (Health Survey, identification of resources and health needs of the community)

- Plan and implement need based health programs for the family and community
- Health Counselling for individuals and families
- Health education- Planned and incidental with the use of IEC materials
- Organize special clinics
- Organize health project/exhibition
- Estimation of vital health statistics – exercise
- Conduct vector survey

- Health assessment – adults, elderly, antenatal & postnatal women, children
- Nutritional assessment, dietary planning, demonstration and education for various age groups
- Filling up of records, reports and registers maintained at sub centre/PHC/CHC

- Assist women in breast self examination
- Conduct antenatal examination
- Conduct vaginal examination
- Conduct deliveries
- Postnatal visits
- Perform Episiotomy and suturing
- Malarial slide preparation

Assisted activities

- Prepare Pap smear
- Conduct insertion/removal of IUCD
- Assist laparoscopic sterilization, vasectomy

- Observation visits/field visits to ART centre, RNTCP unit
- Maintain log book for all practical activities

Assignments

- Health Assessment of an Antenatal and post natal mother, Newborn-1, Infant-1, Preschool child-1 and School child-1
- Community health survey of a selected community
- Community health project/health exhibition-1
- Clinical teaching-2
- Planned health education-4
- Family care study-4

Method of Evaluation

Theory	Weightage

**SECOND YEAR M.Sc NURSING
NURSING MANAGEMENT**

Placement: II Year

Hours of Instruction

Theory :150 Hours
Nurse Specialist :105 Hours

External :45 Hours

Practical :200 Hours

Total : 350 Hours

Course Description

This course is designed to assist students to develop a broad understanding of principles, concepts, trends and issues related to nursing management. Further, it would provide opportunity to students to understand, appreciate and acquire skills in planning, supervision and management of nursing services at different levels to provide quality nursing services.

Objectives

At the end of the course, students will be able to:

1. Formulate the philosophy and objectives of the health care institutions at various levels.
2. Identify trends and issues in nursing
3. Discuss the public administration, health care administration and nursing administration
4. Describe the principles of administration applied to nursing
5. Explain the organization of health and nursing services at the various levels/institutions.
6. Discuss the planning, supervision and management of nursing workforce for various health care settings.
7. Discuss various collaborative models between nursing education and nursing service to improve the quality of nursing care
8. Identify and analyze legal and ethical issues in nursing administration
9. Describe the process of quality assurance in nursing services.
10. Demonstrate leadership in nursing at various levels.
11. Organize staff development programme.

***EF- External Faculty**

PRACTICALS

1. Prepare prototype personal files for staff nurses, faculty and cumulative records
2. Preparation of budget estimate, revised estimate and performance budget
3. Plan and conduct staff development programme
4. Preparation of Organization Chart
5. Developing nursing standards/protocols for various units
6. Design a layout plan for specialty units /hospital, community and educational institutions
7. Preparation of job description of various categories of nursing personnel
8. Prepare a list of equipments and supplies for specialty units
9. Assess and prepare staffing requirement for hospitals, community and educational institutions
10. Plan of action for recruitment process
11. Prepare a vision and mission statement for hospital, community and educational institutions
12. Prepare a plan of action for performance appraisal

13. Identify the problems of the specialty units and develop plan of action by using problem solving approach
14. Plan a duty roster for specialty units/hospital, community and educational institutions
15. Prepare: anecdotes, incident reports, day and night reports, handing and taking over reports, enquiry reports, nurse's notes, official letters, curriculum vitae, presentations etc.
16. Prepare a plan for disaster management
17. Observation visit to a multispecialty teaching hospital and College and School of Nursing

Methods of Teaching

Internal:-	130hours
Practical	: 1450hours
Total	: 1600 hours

Course Description

This course is designed to facilitate students to gain in depth knowledge and develop skill in the administration and management of community health services. It will further enable students to develop leadership qualities and practice as a community health nurse specialist, educator, researcher and manager.

Objectives:

On completion of the course student will be able to:

1. Review the health planning in India
2. Explain the administration and organization of health system in India
3. Plan, organize, implement and evaluate community-oriented programs
4. Participate effectively as a team member in the health planning at local, regional, state and national level
5. Apply epidemiological concepts and principles in community health nursing practice
6. Demonstrate leadership qualities in the field of community health nursing
7. Supervise and guide the nursing personnel working in community health settings
8. Demonstrate competencies in guiding undergraduate students in community health nursing specialty
9. Conduct individual and group research projects in the field of community health nursing.
10. Demonstrate competency in providing independent family centered nursing care
11. Teach and supervise community health nurses and allied health workers

PRACTICAL

Total = 1450 Hours

1 Week = 48 Hours

Sl. No	Department/unit	No. of weeks
1	Urban and rural community	8 weeks
2	Sub centre	4 weeks
3	PHC – Participation in all the relevant health programmes	8 weeks
4	Administration of PHC, CHC and District Office	4 weeks
5	Psychiatric unit and community mental health centres	2 weeks
6	Home for the aged and hospice	1 week
7	Community rehabilitation centres and occupational health visit	1 week
8	Rural health training centre	2 weeks
Total		30 weeks

Observation Visits

- MCH office and DPHN Office
- CHC /First Referral Unit (FRU)
- Anganwadi centre
- Child guidance clinic
- Institute for mentally challenged
- District TB centre
- Cancer centre
- Palliative care
- Home of old age
- De-addiction centre

- Selected occupational health centre
- ESI Health unit
- Municipality / Corporation office

Assisted activities

- Laparoscopic sterilization
- Vasectomy
- Monitoring of national health and family welfare programmes
- School health programmes

Activities to be performed

- Family health care
- Conduct various clinics
- School health assessment
- Health assessment of physically challenged, mentally challenged and older person
- Drug administration as per the Govt. protocols(MDA and Malarial drug administration)
- Treatment of minor ailments
- Investigating outbreak of epidemic
- Screening for leprosy, TB, Malaria and non-communicable diseases
- Counselling services to clients and family
- Report writing- Monthly report of sub-centre and PHC
- Refer the needy clients to the hospital
- Material management – requisition for indent, condemnation, inventory maintenance,
- Supervision of various categories of personnel
- Organize one in service education programme for JPHN/LHI/LHS /any other auxiliary workers
- Liaison with NGO's

Assignments

- Health Assessment of Physically challenged-1, Mentally challenged-1, Older person-1
- Health education-4
- Clinical Teaching-2
- School health Project-1
- In-service training programme for health workers-1
- Family care study-3
- Care analysis-1
- Observation visit Reports

2.11. No: of hours per subject

Given under 2.10

2.12. Practical training

Given under 2.10

2.13. Records

Proper records of practical work should be meticulously maintained and duly signed by the supervising teacher should be submitted at the time of University practical examination

2.14. Dissertation:

Every candidate pursuing M .Sc Nursing course is required to carry out work on

a selected research project under the guidance of a recognized postgraduate teacher. The results of such a work shall be submitted in the form of a dissertation.

The dissertation is aimed to train a postgraduate student in research methods and techniques. It includes identification of problem, formulation of hypothesis, review of literature, getting acquainted with recent advances, designing of a research study, collection of data, critical analysis, and comparison of results and drawing conclusions.

Every candidate shall submit to the University in the prescribed format a synopsis containing particulars of proposed dissertation work after obtaining ethical clearance from the Institutional Ethical Committee comprising principal/ Senior Professor of College of Nursing, **within nine months from the date of commencement of the course on or before the dates notified by the University.** The synopsis shall be sent through the proper channel.

Such proposal will be reviewed and the dissertation topic will be registered by the university. No change in the dissertation topic or Guide shall be made without prior approval of the University.

Tentative Schedule for dissertation

. No.	ctivities	cheduled Time
1	ubmission of the research proposal	nd of 9 th month of 1 st year
2	ubmission of dissertation Final	nd of 9 th month of II nd Year

The dissertation should be written under the following headings:

1. INTRODUCTION
2. REVIEW OF LITERATURE
3. METHODOLOGY
4. ANALYSIS & INTERPRETATION
5. RESULTS
6. DISCUSSION, SUMMARY AND CONCLUSION

REFERENCES

APPENDICES

Dissertation style: Vancouver style format is used.

The written text of dissertation shall be not less than 75 pages and shall not exceed 100 pages excluding references, questionnaires, and other annexures. It should be neatly typed (font size 12-Times New Roman) in double line spacing on one side of the bond paper (A4 size, 8.27 x 11.69”) and bound properly. Spiral binding should be avoided. The Guide and the Head of the Institution shall certify the dissertation. Checking of Plagiarism may be done as per university norms.

The scientific committee of the college should scrutinize and evaluate the thesis and make required corrections if necessary and accept with modification before submitting to the University.

Four copies of the dissertation prepared shall be submitted to the Principal of the institution for onward transmission to University on the 21st month of commencement of the course

Hall ticket for the second year examination should be issued to the candidate only after the dissertation has been submitted to the University.

Guidelines for submission of dissertation is given in Annexure

Research Guides

c) Qualification of Guide

Main guide: Nursing faculty / nursing expert in the field of study holding Ph.D. /M.Phil/M.Sc. Nursing with a minimum of 3 years experience in teaching in the Post Graduate Programme in Nursing.

Co-Guide: A Co-Guide is a nursing faculty/expert in the field of study (may be from outside the college but should be within the district)

b) Guide – Students Ratio

Maximum of 1:5 (including as co-guide)

Change of Guide –In the event of a registered guide leaving the college for any reason or in the event of death of Guide, Guide may be changed with prior permission from the University.

c) Research Committee

There should be a research committee/scientific review committee in each college comprising of minimum 5 Post Graduate Faculty representing all specialty chaired by the Principal, College of Nursing.

2.15. Speciality training if any

Nil

2.16. Project work to be done if any

Included in Clinical Assignments as given in “Content of each subject in each year “

2.17. Any other requirements [CNE, Paper Publishing etc.]

As given under “Content of each subject in each year “

2.18. Prescribed/recommended textbooks for each subject

As given under “Content of each subject in each year “

2.19. Reference books

As given under “Content of each subject in each year “

2.20. Journals

As given under “Content of each subject in each year “

2.21. Logbook

Every candidate shall maintain a log book for recording performance of activities/ procedures/ attending/ organizing workshop/ conferences. The logbook shall be verified and certified by the Head of the Institution and presented in the University practical examination.

3. EXAMINATIONS

3.1. Eligibility to appear for exams [including Supplementary]

a). Attendance and Marks

Candidate should have 80% attendance for both theory and practical, with minimum 50% of internal marks in each subject both in theory & practical. However 100% of attendance should be completed for practical before the award of degree. **There is no provision for condonation of attendance for the PG candidates.**

b). Examination fee

The examination fee should be remitted for each examination appeared for. A fee as stipulated by the University should also be remitted for the evaluation of the dissertation.

c). Log Book

Every candidate shall maintain a log book for recording performance of activities/ procedures/ attending/ organizing workshop/ conferences. The logbook shall be verified and certified by the Head of the Institution and presented in the University practical examination.

3.2. Schedule of Regular/Supplementary exams

Regular University Examination will be conducted at the end of each academic year and Supplementary examinations will be conducted once in a year after regular examination.

3.3. Scheme of examination showing maximum marks and minimum marks

1 st year	Theory					Practical					Total
	Hours	Internal Marks		External Marks		Hours	Internal Marks		External Marks

I YEAR M.SC (NURSING) DEGREE EXAMINATION

ADVANCED NURSING PRACTICE

Model question paper

Time : Three hours Maximum marks : 100 marks

Answer all questions

- I a. Define the concept of health promotion
- b. Explain the major assumptions of Penders' Health promotion model.
- c. Describe the application of Health Promotion Model in the management of obesity among women in the reproductive age group.

(2+8+10 = 20 marks)

2. Mr. M is admitted in the surgical ward with hemorrhagic shock after a road traffic accident.

- a. Explain the pathophysiology of haemorrhagic shock
- b. List any 3 nursing diagnosis according to priority for this patient and prepare a care plan.

(5+10=15marks)

3. Describe the basic elements and explain the barriers of communication (10 marks)

4. Describe the challenges faced by the Health care delivery system in Kerala (10 marks)

5. Briefly explain the safe disposal of biomedical wastes (10 marks)

6. Explain the principles and techniques of counseling (10 marks)

Write short notes on (5x 5 = 25 marks)

7. Anti retroviral therapy
8. Use of computers in nursing practice
9. Haemodialysis
10. Metabolic acidosis
11. Genetic counseling

QP Code:

Reg. No.:.....

FIRST YEAR M.Sc NURSING DEGREE EXAMINATION

NURSING RESEARCH & STATISTICS

MODEL QUESTION PAPER

Time: Three Hours. Maximum: 100 Marks

Answer Section A and B in separate answer books

SECTION A : NURSING RESEARCH

Max. Marks : 75

1. Write a research proposal for a research problem 'quality of life of patients with AIDS'.
15
2. Describe observation as a method of data collection. 15
3. Explain the criteria for selection of a research problem. 10
4. Describe the methods of controlling extraneous variables. 10
5. Explain the different types of sampling. 10

Write Short notes on

6. Evidence based practice.
7. Grounded theory.
8. Purposes of literature review. (3x5=15)

Section B: statistics

9. Which is the appropriate statistical test to conclude the data given below; growth status and exposure to infection are associated. Conduct the statistical test and arrive your conclusion about data. P value at 5% level significance is 3.84

Growth status	infected	Non infected	Total
good	80	90	170
poor	240	110	350
total	320	300	620

10

SHORT NOTES

10. Properties of normal distribution.

11. Describe different methods of dispersion with merits and demerits

12. Reliability

3x 5 =15

QP Code:

Reg. No.:.....

First Year MSc Nursing Degree Examinations

NURSING EDUCATION

Model question paper

Time : 3 hrs

Max.marks:100

Answer All Questions

1. Explain the current trends in nursing education in India. (20)
2. Prepare the philosophy for a newly started college of nursing (15)
3. Plan a counselling session for nursing students. (10)
4. Describe the role of teachers in the development of pupil in nursing (10)
5. Describe the importance of non –projected aids in nursing education (10)
6. Describe the importance of questioning in education. (10)

WRITE SHORT NOTES

7. Aims of education.
8. Characteristics of an evaluation tool
9. Micro teaching
10. Objective structural practical examination
11. Formative and summative evaluation (5x5=25)

QP Code:

Reg. No.:.....

First Year MScNursing Degree Examination

Clinical Specialty -I

Community Health Nursing –I

Model Question Paper

Time: 3 Hours

Answer all questions ,Maximum marks: 100

1. a. Describe the phases of family health nursing process with suitable examples

b. Discuss the challenges and scope of community health nursing

(10+10= 20)

2. a. Discuss the nutritional problems in India

b. Explain the role of Community Health Nurse in controlling these problems

(7+8= 15)

3. Explain the demographic trends in India

(10)

4. Analyse the contribution of National Family Welfare Programme in controlling population growth

(10)

5 Explain the reasons for high maternal mortality in India

(10)

6. Discuss the role of Community Health Nurse in reducing maternal mortality (10)

Write short notes on

(5x 5 =25)

7. Public health laws

8. Impact of ecological changes on health

9. Role of mass media in health education

10. Descriptive epidemiology

11. Family budgeting

QP Code:

Reg. No.:.....

Second Year M.Sc Nursing Degree Examinations

(Model Question Paper)

NURSING MANAGEMENT

Time: 3 hrs Max. Marks: 100

Answer all questions

Time: 3 hrs

Max. marks: 100

Answer all questions.

1. Explain the principles of management with suitable examples. (20)
 2. Prepare an evaluation tool for performance appraisal of staff nurses. (15)
 3. Explain the utilization of theories of management in nursing service with suitable examples. (10)
 4. Explain the role of nurse administrator in supervision. (10)
 5. Explain the challenges and current trends in nursing administration. (10)
 6. Describe the steps of material management. (10)
- Write short notes (5x5=25)
7. Collective bargaining
 8. Nurses role in occupational health and safety.
 9. Legal issues in nursing
 10. Quality circle
 11. Conflict management

QP Code:

Reg. No.:.....

**Second Year M. Sc Nursing Degree Examinations
(Model Question Paper)
Clinical Speciality II Community Health Nursing**

Time: 3 hrs

Max. Marks: 100

- Answer all questions

Essays:

1. Explain the health care delivery system in India. Discuss the methods of evaluation of health services

(10+10=20)

2. Explain the methods of community based rehabilitation. Discuss the trends and issues in community rehabilitation.

(7+8=15)

3. Describe the measures for health promotion of workers in industries

(10)

4. Discuss the nurses role in community mental health programme

(10)

5. Explain role of International Health Regulations in combating global health issues

(10)

6. Discuss the various types of records and reports maintained in community health nursing service

(10)

Short notes:

(5x5=25)

7. National Aids Control programme
8. Health tourism
9. Guidance and Counselling for the disabled
10. Performance appraisal
11. Millennium development goals

3.7. Internal assessment component

- a) There shall be a minimum of 3 periodic assessments, for theory and practical including viva separately, of which the final one will be University model examination and is mandatory.
- b) Average of the marks of the best two periodic assessments shall be taken as internal assessment mark of the candidate. Marks of evaluation by other methods like assignments, seminars, projects etc. can be added to the internal marks.
- c) The class average of internal assessments mark of theory and practical should not exceed 75% of Maximum marks.
- d) The class average of internal assessment for an examination shall be calculated based on the total number of candidates in a particular batch appearing for that internal assessment examination.
- e) The candidate must secure 50% marks for internal assessment in theory and practical including viva separately in a particular subject in order to be eligible to appear in the university examination of the subject.
- f) In cases where the candidate is permitted to improve the internal assessment marks, the new marks will be taken as final.
- g) The internal marks shall be signed by the candidate before transmission to the University

3.8. Details of practical/clinical practicum exams.

Practicals

- ☐ 4 hours of practical examination per student.
- ☐ Maximum number of 10 students per day per specialty.
- ☐ The examination should be held in concerned clinical area for clinical specialties. Facility for observation of all candidates at a time in the same ward / clinical area by the examiners during practical examinations is mandatory.
- ☐ One internal and external examiner should jointly conduct practical examination and viva voce separately for each student.
- ☐ Follow the evaluation guidelines for the conduct of practical examinations - Refer 2.10.

3.9. Number of examiners needed (Internal & External) and their qualifications

- ☐ One internal and external examiner should jointly conduct practical examination and viva voce separately for each student.

Examiner – Nursing faculty teaching respective specialty area/subjects in M.Sc Nursing programme with minimum 3 years post graduate teaching experience.

The examiners should do evaluation of dissertation prior to viva.

3.10. Details of viva:

Duration: Viva-Voce -minimum 30 minutes per student.

4. INTERNSHIP

4.1. Eligibility for internship

Not applicable.

4.2. Details of internship training

Not applicable.

4.3. Model of Internship Mark lists

Not applicable.

4.4. Extension rules

As given under “Leave , vacation /holidays permitted”

4.5. Details of Training given

Not applicable.

5. Annexure

5.1. Check Lists for Monitoring: Log Book, Seminar Assessment etc.

As given under “Content of each subject in each year “

Abstract

Abstract provides a brief summary of the dissertation/thesis, summing up clearly the problem examined, the methods used and the main findings. The abstract is a one-paragraph, self-contained summary of the most important elements of the paper. The abstract word limit is between 250 and 300 words. All numbers in the abstract (except those beginning a sentence) should be typed as digits rather than words. Keywords (max. 10) should be given, chosen from nursing subject headings. Each word should be separated by semicolon.

Note:

1. Only full time teaching in a teaching institution affiliated to KUHS / other universities established by law in India is considered as teaching experience.
2. Attested copies of appointment order, relieving order, service certificate, promotion order & PG degree, Nursing Council registration certificate etc., to be enclosed to claim teaching experience.
3. Qualifications and eligibility for appointment and promotion shall be as per Govt. of Kerala and INC guidelines.
4. Application is to be submitted through proper channel.
5. The envelope should be super scribed as Proforma for Recognition as Post Graduate Teacher'.
8. Any other relevant information: (Attach a separate sheet)

(Regarding additional qualifications, achievements, publications, awards etc.,)

Declaration by the Teacher

I hereby declare that the above information provided by me is true and correct. I shall take the sole responsibility for any wrong information provided and liable for any action taken by the university.

Place :

Date :

Signature of the Teacher

Endorsement by the Principal

The information provided by the teacher is verified from the office records and found to be correct. He/She is eligible to be recognized as a PG teacher to guide the dissertation work of PG students as per the INC regulations.

Place :

Date :

Signature of the Principal

INSTRUCTIONS:

1. The Prescribed Performa must be duly filled by the applicant in his/her own handwriting and submitted to the university through the principal's office.
2. The Principal should verify all the informations provided especially the date of birth, qualification, experience, and service details before sending the proforma to the university.
3. Ensure that attested copies of all relevant documents are furnished along with the application.
4. The Principal will be held responsible for any false information provided.
5. Incomplete and incorrect applications and applications with false information will be rejected and they are liable for disciplinary action by the university.

3. Remarks and Signature of the Principal:

Format for the submission of Dissertation Hard & Soft copy

Instructions to candidates

Although your dissertation may be prepared on a computer, consider the following requirements for meeting the standards.

Paper

Use only one side of high-quality, plain white (unlined in any way) bond paper, minimum 20-lb weight, and 8 ½ x 11 inches in size. Erasable paper should not be used.

Type Size and Print

Select fonts type Times New Roman and a size of 12 characters. The size of the titles should be 14 and Bold, the size of subtitles should be 12 and bold. Print should be letter quality or laser (not dot matrix) printing with dark black characters that are consistently clear and dense. Use the same type of print and print size throughout the document.

Pagination

Number all of the pages of your document, including not only the principal text, but also all plates, tables, diagrams, maps, and so on. Roman numerals are used on the preliminary pages (pages up to the first page of text) and Arabic numerals are used on the text pages. The numbers themselves can be placed anywhere on the page, however they should be consistent.

Spacing

Use double spacing except for long quotations and footnotes which are single-spaced.

Margins

To allow for binding, the left-hand margin must be 1.5 inches. Other margins should be 1.0". Diagrams, or photographs in any form should be a standard page size, or if larger, folded so that a free left-hand margin of 1.5 inch remains and the folded sheet is not larger than the standard page.

Photographs

Professional quality black-and-white photographs are necessary for clear reproduction. Colors are allowed, but you should be certain the colored figure will copy clearly and will not be confusing when printed in black and white.

File Fomat

Dissertation format should be in .Doc (Ms Word Document) or PDF (Portable Document Format), Image files in JPG or TIFF format and Audio Visual in AVI (Audio Video Interleave), GIF,

MPEG (moving picture expert) files format.

Labeling on CD

CD-ROM Labeling should be standard and should contain title, name of the candidate, degree name, subject name, and guide name, name of the department, college, place and year.

References

Vancouver style format.

MASTER OF SCIENCE IN NURSING

M.Sc. Obstetric & Gynaecological Nursing

Course Code 275

(2016-17 admission onwards)

2016

2. COURSE CONTENT

2.1 Title of course:

MASTER OF SCIENCE IN NURSING – Obstetric & Gynaecological Nursing

2.2 Aim and Objectives of the Course

Aim

Aim of the postgraduate programme in nursing is to prepare graduates to assume responsibilities as Clinical Nurse Specialists, Nurse Practitioners, Consultants, Educators, Researchers and Administrators in a wide variety of professional settings.

Objectives

On completion of the 2 year M.Sc Nursing programme, the graduates will be able to:-

1. Apply the concepts, theories and principles of nursing science.
2. Demonstrate competencies in nursing practice.
3. Practice as Clinical Nurse Specialist.
4. Establish collaborative relationship with the members of other disciplines.
5. Assume leadership in various care settings.
6. Participate in health planning, implementation and evaluation at different levels of health care system.
7. Function as effective nurse educators and nurse managers.
8. Conduct independent nursing research and utilize the research findings in nursing practice and education.
9. Critically evaluate various educational programmes in nursing.
10. Demonstrate interest and positive attitude in continuing education for personal and professional growth
11. Describe the role of various types of complementary and alternative therapies in obstetric and gynaecological nursing.
12. Incorporate evidence based nursing practice and identify the areas of research in the field of obstetric and gynaecological nursing.

13. Describe the recent advancement in contraceptive technology and birth control measures.
14. Explain the legal and ethical issues pertaining to obstetric and gynaecological nursing.
15. Function as independent midwifery nurse practitioner

2.3 Medium of instruction:

Medium of instruction shall be English

2.4 Course outline

1 year	Theory (hrs)	Practical (hrs)
Nursing Education	150	150
Advanced Nursing Practice	150	500
Nursing Research and Statistics	150	100
Obstetrics & Gynaecological		
Nursing-I	150	900
Total	600	1650
II Year	Theory (hrs)	Practical (hrs)
Nursing Management	150	200
Nursing Research (Dissertation)	-	300
Obstetric & Gynaecological		
Nursing -II	150	1450
Total	300	1950
Grand Total	900	3600

2.5 Duration

Duration of the course is for 2 years.

Weeks/year	: 52 weeks
Leave	: 3 weeks (20 days)
Preparation and Exam	: 2 weeks
Total weeks available	: 47 weeks
Total hours/week	: 48 hours
48 hoursX47weeks	: 2256 hour/year

2.6 Syllabus

As given under “Content of each subject in each year”

The concept of Health Care Counselling shall be incorporated in all relevant areas.

2.7 Total number of hours

As given under “Content of each subject in each year”

2.8 Branches if any with definition

Not Applicable

Practical 150 Hours
Total: 300 Hours

Course Description

This course is designed to assist students to develop a broad understanding of fundamental Principles, concepts, trends and issues related to education and nursing education. Further, it would provide opportunity to students to understand, appreciate and acquire skills in teaching and evaluation, curriculum development, implementation, maintenance of standards and accreditation of various nursing educational programs.

Objectives

At the end of the course, students will be able to :

1. Explain the aims of education, philosophies, trends in education and its impact on nursing education.
2. Describe the teaching learning process.
3. Prepare and utilize various instructional media and methods in teaching learning process.
4. Demonstrate competency in teaching, using various instructional strategies.
5. Critically analyze the existing nursing educational programs, their problems, issues and future trends.
6. Describe the process of curriculum development, and the need and methodology of curriculum change, innovation and integration.
7. Plan and conduct continuing nursing education programs.
8. Critically analyze the existing teacher preparation programs in nursing
9. Demonstrate skill in guidance and counselling.
10. Describe the problems and issues related to the implementation of nursing curriculum including selection and organization of clinical experience.
11. Explain the development of standards and accreditation process in nursing education programs.

12. Identify research priorities in nursing education.
13. Discuss various models of collaboration in nursing education and services.
14. Explain the concept, principles, steps, tools and techniques of Evaluation.
15. Construct, administer and evaluate various tools for assessment of knowledge, skill, and attitude.

Activities

- Framing philosophy, aims and objectives.
- Lesson Planning.
- Micro teaching-2.
- Conduct practice teachings using different teaching strategies -10
(Like lecture cum discussion, demonstration- lab method, field trips, seminars, project, role play, panel discussion, clinical methods etc)
- Preparation and utilization of instructional Aids using different media.
- Develop course plans, unit plans, rotation plans.
- Conduct a continuing education workshop.
- Annotated bibliography.
- Critical evaluation of any nursing education program offered by a selected institution.
- Planning and Organizing field visits.
- Construct, administer and evaluate tools (objective & essay type test, observation checklist, rating scale etc)
 - Observe and practice application of various non-standardized tests, (intelligence, Aptitude, Personality, Sociometry, physical & mental disabilities tests.)

Methods of Teaching

- Lecture cum discussion
- Demonstration/ Return demonstration
- Seminar / Presentations
- Project work
- Field visits
- Workshop

Methods of evaluation

- Tests
- Presentation
- Project work

Assignments –Theory

Lesson plan-2,courseplan -1,unit plan 2,rotation plan-2(master plan,clinical rotation)

Evaluation tool-construction,administration and evaluation(Essay,objectivetype,ratingscale,checklist)

Construction of an achievement test

Practical

Practice teaching using different strategies (lecture cum discussion-5,demonstration-2,seminar-1,clinicalteaching -2,symposium/role play/panel discussion)

Internal Assessment (Theory)

	Weightage
Sessional exams (3)	50%
Assignments	25%
Seminar/presentation	25%
Total	100%

Practical – Internal assessment

Preparation of Learning resource material &	25%
Construction of tests/rotation plan.	
Practice Teaching	50%
Conduct Workshop /Short Term Course	25%
Total	100%

ADVANCED NURSING PRACTICE

Placement: 1st Year

Hours of Instruction

Theory: 150 Hours

External Faculty:-30hrs

Nursing Faculty:-120hrs

Practical: 500 Hours

Total : 650 Hours

Course Description

The course is designed to develop an understanding of concepts and constructs of theoretical basis of advanced nursing practice and critically analyze different theories of nursing and other disciplines.

Objectives:

At the end of the course the students will be able to:

1. Describe ethical, legal, political and economic aspects of health care delivery and nursing practice.
2. Identify latest trends in nursing and the basis of advanced nursing practice.
3. Explain bio- psycho- social dynamics of health, life style and health care delivery system.
4. Discuss concepts, principles, theories, models, approaches relevant to nursing and their application.
5. Perform health assessment and General physical examination
6. Provide holistic and comprehensive care following nursing process approach
7. Perform extended and expanded role of nurse.
8. Describe alternative modalities of nursing care.
9. Describe the concept of quality control in nursing.
10. Identify the scope of nursing research.
11. Use computer in patient care delivery system and nursing practice.
12. Appreciate importance of self development and professional advancement.

NURSING RESEARCH AND STATISTICS

Placement: 1st Year

Hours of Instruction

Theory : 150 Hours

Practical : 100 Hours

Total : 250 Hours

Part A: Nursing Research

Theory: 100 Hours

Practical: 75 Hours

Total : 175 Hours

Course Description:

The course is designed to assist the students to acquire an understanding of the research methodology and statistical methods as a basis for identifying research problem, planning and implementing a research plan. It will further enable the students to evaluate research studies and utilize research findings to improve quality of nursing practice, education and management.

General Objectives:

At the end of the course, the students will be able to:

1. Recognize the significance of research in nursing and its importance in evidence- based nursing practice.
2. Identify the steps of quantitative and qualitative research.
3. Discuss the ethical aspects of research.
4. Review literature utilizing various resources.
5. Identify researchable problems in nursing.
6. Demonstrate skill in planning and conducting research studies.
7. Communicate research findings.
8. Utilize research findings.
9. Critically evaluate research reports and articles.
10. Write scientific paper for publications.

COURSE CONTENT:

Unit	Theory hours	Content	Practical hours	Content
I	5	<p>Introduction Review:</p> <ul style="list-style-type: none"> • Problem solving and scientific method. <p>Research –definition, characteristics, purposes, types of research, Basic research terms, Scope of nursing research, Overview of Research process, Significance of research in nursing, Historical Evolution of nursing research.</p> <ul style="list-style-type: none"> <input type="checkbox"/> Future trends in nursing research. <input type="checkbox"/> Problems and challenges in nursing research, health and social research. <input type="checkbox"/> Priorities for nursing research. <input type="checkbox"/> Evidence based practice. <input type="checkbox"/> Ethics in research 		
II	5	<p>Review of Literature</p> <ul style="list-style-type: none"> • Review- <ul style="list-style-type: none"> • Importance, purposes, sources, criteria for selection of resources • Guidelines for writing literature review. 	5	Literature search-web search

III	10	Research problem: <ul style="list-style-type: none"> <input type="checkbox"/> Identification of research problem/ research question. <input type="checkbox"/> Formulation of problem statement and research objectives <input type="checkbox"/> Definition of terms <input type="checkbox"/> Assumption and delimitations <input type="checkbox"/> Identification of variables <input type="checkbox"/> Hypothesis –definition, formulation and types. 	5	1. Identification of research question. 2. Formulation of problem statement and research objectives
IV	5	Developing theoretical /conceptual framework. <ul style="list-style-type: none"> <input type="checkbox"/> Review Theories: Nature, characteristics, purpose and application in research <input type="checkbox"/> Using, testing and developing conceptual framework, models and theories. 	5	Developing theoretical /conceptual framework.
V	15	Research Approach and designs Qualitative and Quantitative, Mixed methods Qualitative research approaches: Grounded theory, phenomenology, ethnography, case study and historical research. Quantitative: Experimental and non experimental: types, characteristics, advantages and disadvantages. Randomised control design, cohort study, clinical trials		
VI	8	Sampling Population and sample. Factors influencing sampling Sampling techniques Sample size Probability and sampling error		

VII	20	<p>a) Data collection methods and Tools: Concepts of data collection, Data sources, methods/techniques quantitative and qualitative. Tools for data collection-types and characteristics</p> <p>b) Measurement and data quality Validity and reliability of tools, Characteristics of an instrument Steps in development of an instrument. Procedure for data collection</p>		
VIII	3	Critical analysis of research reports and articles	15	Critical analysis of research reports and Articles

Total	100%

Part –B: Statistics (External Faculty)

Hours of Instruction

Theory	50Hours
Practical	25 Hours
Total	75 Hours

Course Description:

At the end of the course, the students will be able to develop an understanding of the statistical methods and apply them in conducting research studies in nursing

General Objectives:

At the end of the course the students will be able to:

1. Explain the basic concepts related to statistics
2. Describe the scope of statistics in health and nursing
3. Organize, tabulate and present data meaningfully
4. Use descriptive and inferential statistics to predict results
5. Draw conclusions of the study and predict statistical significance of the results
6. Describe vital health statistics and their use in health related research
7. Use statistical packages for data analysis.
- 8.

Course content

Unit	Hours		Content
	Theory	Practical	
I	7	I	Introduction: <ul style="list-style-type: none"> □ Concepts, types, significance and scope of statistics, meaning of data □ Sample, parameter □ Type and levels of data and their Measurement <ul style="list-style-type: none"> □ Organization and presentation of data-Tabulation of data □ Frequency distribution □ Graphical and tabular presentations
II	4		Measures of central tendency: Mean, Median, Mode

III	4		Measures of variability: □ Range, Percentiles, Average deviation, Quartile deviation, Standard deviation
IV	3		Normal Distribution: □ Probability, Characteristics and application of normal probability curve, Sampling error
V	6		Measures of relationship: □ Correlation-need and meaning □ Rank order correlation □ Scatter diagram method, product moment correlation, Simple linear regression analysis and prediction,
VI	5		Designs and meaning: □ review -Experimental designs □ Comparison in pairs, randomized block design, Latin squares.

CLINICAL SPECIALTY - I

OBSTETRIC AND GYNAECOLOGICAL NURSING- 1

Course No. 29

Placement: 1st year

Hours of Instruction

Theory: 150 hours
Nursing Faculty– 120 hours
External Faculty-30 hours

Practical: 900 hours
Total: 1050 hours.

COURSE DESCRIPTION

This course is designed to assist students in developing expertise and in-depth understanding in the field of Obstetric and Gynaecological Nursing. It will help students to appreciate the client as a holistic individual and develop skill to function as an independent midwifery practitioner. It will further enable the student to function as educator, manager, and researcher in the field of Obstetric and Gynaecological nursing.

OBJECTIVES

At the end of the course the students will be able to:

1. Examine the trends in the field of midwifery, obstetrics and gynaecology as a specialty.
2. Describe the population dynamics and indicators of maternal and child health.
3. Describe current concepts in genetics and embryology.
4. Identify the role of women in the society
5. Describe the concepts of biophysical, psychological and spiritual aspects of normal pregnancy, labor and puerperium.
6. Provide comprehensive nursing care to women during reproductive period and newborns.
7. Integrate the concepts of family centered nursing care and nursing process approach in obstetric and gynaecological nursing.
8. Identify and analyze the deviations from normal birth process and refer appropriately.
9. Describe the pharmacological agents, their effects during pregnancy, child birth, puerperium, lactation and the role of nurse
10. Counsel adolescents, women and families on issues pertaining to pregnancy, child birth and lactation

11. Describe the role of various types of complementary and alternative therapies in obstetric and gynaecological nursing.
12. Incorporate evidence based nursing practice and identify the areas of research in the field of obstetric and gynaecological nursing.
13. Describe the recent advancement in contraceptive technology and birth control measures.
14. Explain the legal and ethical issues pertaining to obstetric and gynaecological nursing.
15. Function as independent midwifery nurse practitioner

Course Content

Units	Hours	Content
I	20	<p>Introduction</p> <ul style="list-style-type: none"> □ Historical and contemporary perspectives □ Issues of maternal and child health: Age, Gender, Sexuality, sexual health, Psycho- Socio cultural factors □ Status of women in Indian Society □ Role of the women in the family & society □ Women empowerment □ Preventive obstetrics □ National health and family welfare programmes related to maternal and child health: health Care delivery system. □ National Health Mission-Reproductive child health. □ Theories, models and approaches applied to midwifery practice. □ Role and scope of midwifery practice: Independent Nurse midwifery practitioner.. □ Legal and Ethical issues, code of ethics and standards of midwifery practice, standing orders □ Evidence based midwifery practice □ Research priorities in Obstetric and Gynaecological nursing. □ Complementary therapies in obstetric practice.

-------------------------	--

Practical Experience

Total = 900 Hours

1 week = 48 hours

Sl.No	Dept/ unit	Weeks
1	Antenatal wards, Infertility clinic	5
2	Labour Room	5
3	Postnatal Ward	4
4	Family welfare Clinics & OPDs	1
5	PHC/Rural Maternity settings	2
6	Maternity OT	2
	Total	19

Procedures to be Observed

- Diagnostic investigations: amniocentesis, cordocentesis, chorionic villus sampling, ultrasonogram.

- Infertility management: assisted reproductive techniques, artificial insemination, invitro fertilization and related procedures.

Procedures to be assisted

- Medical termination of pregnancy
- Male and female sterilization
- Major and minor operations.

Procedures to be performed

- Antenatal assessment : 20
- Postnatal assessment : 20
- Assessment during labour
 - Use of partograph : 20
- Per vaginal examination : 20
- Conduct of normal delivery : 20
- Episiotomy and suturing : 10
- Insertion of intra uterine devices (Copper-T)

Others

- Identification of high risk women and referral
- Health education to women and their families
- Motivation of couples for Planned Parenthood.

Observation visit

Infertility centre, 24/7 FRUs

Assignments

- Nursing care study –2 (Antenatal-1, postnatal-1)
Nursing care plan- Antenatal, Intranatal, postnatal and newborn
- Planned health education-2
- Clinical teaching-5-
- Case Presentation-2

Term paper -1

- Drug file
- Log book

Internal practical examination is to be conducted in antenatal and postnatal area.

University practical examination is to be conducted either in antenatal or post natal area.

Evaluation Methods

- Assignments
- Theory & Practical Exam
- Ongoing evaluation

SECOND YEAR M.Sc NURSING

NURSING MANAGEMENT

Placement: II Year

Hours of Instruction

Theory :150 Hours
Nurse Specialist :105 Hours
External :45 Hours
Practical :200 Hours
Total : 350 Hours

Course Description

This course is designed to assist students to develop a broad understanding of principles, concepts, trends and issues related to nursing management. Further, it would provide opportunity to students to understand, appreciate and acquire skills in planning, supervision and management of nursing services at different levels to provide quality nursing services.

Objectives

At the end of the course, students will be able to:

1. Formulate the philosophy and objectives of the health care institutions at various levels.
2. Identify trends and issues in nursing
3. Discuss the public administration, health care administration and nursing administration
4. Describe the principles of administration applied to nursing
5. Explain the organization of health and nursing services at the various levels/institutions.
6. Discuss the planning, supervision and management of nursing workforce for various health care settings.
7. Discuss various collaborative models between nursing education and nursing service to improve the quality of nursing care
8. Identify and analyze legal and ethical issues in nursing administration
9. Describe the process of quality assurance in nursing services.
10. Demonstrate leadership in nursing at various levels.
11. Organize staff development programme.

		Stress management Applications to nursing service and education
XII	10 EF5	Legal and ethical issues Laws and ethics Ethical committee Code of ethics and professional conduct Legal system: Types of law, tort law, and liabilities Legal issues in nursing: negligence, malpractice, invasion of privacy, defamation of character Patient care issues, management issues, employment issues Medico legal issues Nursing regulatory mechanisms: licensure, renewal, accreditation Patients rights, Consumer protection act(CPA) Rights of special groups: children, women, HIV, handicap, ageing Professional responsibility and accountability Infection control Standard safety measures

***EF- External Faculty**

PRACTICALS

1. Prepare prototype personal files for staff nurses, faculty and cumulative records
2. Preparation of budget estimate, revised estimate and performance budget
3. Plan and conduct staff development programme
4. Preparation of Organization Chart
5. Developing nursing standards/protocols for various units
6. Design a layout plan for specialty units /hospital, community and educational institutions
7. Preparation of job description of various categories of nursing personnel
8. Prepare a list of equipments and supplies for specialty units
9. Assess and prepare staffing requirement for hospitals, community and educational institutions
10. Plan of action for recruitment process
11. Prepare a vision and mission statement for hospital, community and educational institutions
12. Prepare a plan of action for performance appraisal

13. Identify the problems of the specialty units and develop plan of action by using problem solving approach
14. Plan a duty roster for specialty units/hospital, community and educational institutions
15. Prepare: anecdotes, incident reports, day and night reports, handing and taking over reports, enquiry reports, nurse's notes, official letters, curriculum vitae, presentations etc.
16. Prepare a plan for disaster management
17. Observation visit to a multispecialty teaching hospital and College and School of Nursing

Methods of Teaching

CLINICAL SPECIALTY

OBSTETRIC AND GYNAECOLOGICAL NURSING II

Course No. 30

Placement : II year

Hours of Instruction

Theory: 150 hours

Internal – 100

External - 50

Practical: 1450 hours

Total: 1600Hours.

COURSE DESCRIPTION

This course is designed to assist students in developing expertise and in-depth understanding in the field of Obstetric and Gynaecological Nursing. It will help the student to develop advanced nursing skills for nursing interventions in various obstetrical and gynaecological conditions. It will further enable the students to function as midwifery nurse practitioner/specialist, educator, manager and researcher in the field of obstetric and gynaecological nursing.

Objectives

At the end of the course the student will be able to:

1. Describe the epidemiology, aetiology, pathophysiology and diagnostic assessment of women with obstetric and gynaecological conditions.
2. Perform physical, psychosocial, cultural & spiritual assessment
3. Demonstrate competence in caring for women with obstetric and gynaecological conditions
4. Demonstrate competence in caring for high risk newborn.
5. Identify and Manage obstetrical and neonatal emergencies as per protocol
6. Practice infection control measures
7. Utilize recent technology and various diagnostic, therapeutic modalities in the management of obstetrical, gynaecological and neonatal care
8. Demonstrate skill in handling various equipments/gadgets used for obstetric, gynaecologic and neonatal care
9. Teach and supervise nursing students and allied health workers
10. Design a layout of specialty units of obstetrics and gynaecology
11. Develop standards for obstetrics and gynaecologic nursing practice.
12. Counsel women and families

13. Incorporate evidence based nursing practice and identify the areas of research in the field of obstetric and gynaecological nursing

14. Function as independent midwifery nurse practitioner

Unit	Hours	Content
I	25 (EF10)	<p>Management of problems of women during pregnancy</p> <ul style="list-style-type: none"> ➤ Risk approach in obstetrical nursing care concepts & goals ➤ Screening of high-risk pregnancy, newer modalities of diagnosis. ➤ Intrauterine foetal Therapies ➤ Nursing Management of pregnancies at risk-due to obstetrical complications <ul style="list-style-type: none"> • Pernicious Vomiting • Bleeding in early pregnancy, abortion, ectopic pregnancy, and gestational trophoblastic diseases. • Hemorrhage during late pregnancy, ante partum hemorrhage, placenta praevia, abruptio placenta • Hypertensive disorders in pregnancy, Gestational Hypertension, pre-eclampsia, eclampsia, Hemolysis , Elevated liver enzymes, low plateletcount (HELLP) • Gestational diabetes mellitus • Iso-immune disease, Rh & ABO incompatibility • Hematological problems in pregnancy • Hydramnios - oligohydramnios • Prolonged pregnancy-post term, post maturity • Multiple pregnancies. • Intrauterine infection & pain during pregnancy • Intra uterine growth restriction (IUGR), Premature Rupture of Membrane(PROM), intra uterine death. • Loss ,grief & bereavement.
II	15 (EF6)	<p>Pregnancies at risk-due to pre-existing health problems</p> <ul style="list-style-type: none"> ➤ Anemia and nutritional deficiencies ➤ Hepatitis

		<ul style="list-style-type: none"> ➤ Cardio-vascular disease ➤ Thyroid diseases ➤ Epilepsy ➤ Haematological disorders ➤ Essential hypertension ➤ Metabolic conditions ➤ Chronic renal failure ➤ Tropical diseases ➤ Psychiatric disorders ➤ Infections- Toxoplasmosis Rubella Cytomegalo virus Herpes (TORCH), Reproductive Tract Infection(RTI); STD;HIV/AIDS, vaginal infections; Leprosy, Tuberculosis ➤ Other risk factors: Age-Adolescents, elderly; unwed mothers, sexual abuse, substance use. ➤ Pregnancies complicating with tumors, uterine anomalies, prolapse, ovarian cyst.
III	25 (EF10)	<p>Abnormal labour, & obstetrical emergencies</p> <ul style="list-style-type: none"> ➤ Etiology, pathophysiology and nursing management of <ul style="list-style-type: none"> • Uncoordinated uterine actions, Atony of uterus,preterm labour, precipitate labour, prolonged labour • Abnormal lie, presentation, position. • Contracted pelvis-CPD; dystocia • Obstetrical emergencies- obstetric shock, vasa praevia, inversion of uterus, amniotic fluid embolism, rupture uterus, Cord presentation and prolapse of cord. • Medical and surgical induction • Version • Manual removal of placenta • Obstetrical operations: Forceps delivery, Ventouse, Caesarian section, Destructive operations • Genital tract injuries-Perineal tear, VVF, RVF <ul style="list-style-type: none"> ➤ Complications of third stage of labour: <ul style="list-style-type: none"> • Post partumHemorrhage • Retained placenta, adherent placenta <p>Critical care in obstetrics- role of the nurse</p>
IV	10 (EF4)	<p>High risk Puerperium</p> <ul style="list-style-type: none"> ➤ Nursing management of PPH <ul style="list-style-type: none"> • Puerperal infections, puerperal sepsis • Sub involution of uterus

		<ul style="list-style-type: none"> • Breast complications. • Urinary and bowel complications • Coagulation disorders • Sheehan's syndrome • Obstetric palsies • Psychological complications.
V	25 (EF8)	<p>High Risk Newborn</p> <p>- Concept, goals, assessment, principles.</p> <p>- Nursing management of</p> <ul style="list-style-type: none"> • Pre-term, small for gestational age, post-mature infant and baby of diabetic and substance use mothers. • Respiratory complications; Asphyxia neonatorum, neonatal apnoea, meconium aspiration syndrome, pneumothorax, pneumo mediastinum. • Icterus neonatorum. • Birth injuries. • Hypoxic ischaemic encephalopathy. • Congenital anomalies. • Neonatal seizures. • Neonatal hypocalcaemia, hypoglycemia, hypomagnesaemia. • Neonatal heart diseases. • Neonatal hemolytic diseases. • Neonatal infections, neonatal sepsis, ophthalmia neonatorum. Congenital syphilis, HIV/ AIDS • Advanced neonatal procedures. • Calculation of fluid requirements. • Hematological conditions – erythroblastosis fetalis, hemorrhagic disorders in newborn. • Organization of neonatal care, services (Levels), transport, neonatal intensive care unit, organization and management of nursing services in NICU
VI	10 (EF4)	<p>HIV / AIDS</p> <ul style="list-style-type: none"> • HIV positive mother and her baby • Epidemiology • Screening • Parent to child transmission (PTCT) • Prophylaxis for mother and baby • Standard safety measures • Counseling • Breast feeding issues • National policies and guidelines • Issues: Legal, ethical, psychological and rehabilitation • Role of nurse

VII	30 (EF8)	Gynaecological problems and nursing management <ul style="list-style-type: none"> • Gynaecological assessment-review • Gynaecological procedures. • Etiology, pathophysiology, diagnosis, and nursing management of <ul style="list-style-type: none"> - Menstrual irregularities, Menopause -DUB, PCOD, genital tract infections - Endometriosis, adenomyosis, pelvic inflammatory diseases - Diseases of genital tract -Uterine displacement -Genital prolapse -Uterine malformation- -Benign and Malignant tumors - Uterine fibroid, ovarian tumors, breast carcinoma, , reproductive tract malignancies, hysterectomy – vaginal and abdominal Laparoscopic surgery - Sexual abuse, rape, trauma, assault.
VIII	5	Administration and management of obstetrical and gynaecological unit <ul style="list-style-type: none"> • Design and layout • Staffing • Equipment , supplies, • Infection control; Standard safety measures • Quality Assurance: Obstetric auditing – records / reports, Norms, policies and protocols • Practice standards for obstetric and gynaecological unit.
IX	5	Education and training in obstetric and gynaecological care <ul style="list-style-type: none"> • Staff orientation, training, and development • In-service education programme • Clinical teaching programs

Practicals

Total =1450 Hours

1 week = 48 Hours

Sl.No	Deptt./Unit	No.of weeks
1	Antenatal OPD , ART Centre	4
2	Antenatal and postnatal ward	11(6+5)
3	Labour Room	4
4	Neonatal Intensive Care Unit	2
5	Obstetric / Gynae Operation Theatre	2
6	Gynaecology Ward	2
7	Post operative ward	3
8	CHC, PHC,SC	2
	Total	30

Essential Obstetric and gynaecological skills

Procedures to be observed

- Ultra sonography
- Specific laboratory tests.
- Amniocentesis.
- Cervical & vaginal cytology.
- Fetoscopy.
- Hysteroscopy
- MRI
- Surgical diathermy.
- Cryosurgery.

Procedures assisted

- Obstetric & Gynaecological operations
- Abnormal deliveries – Forceps application, Ventouse, Breech
- Exchange blood transfusion

- Culdocscopy
- Cystoscopy
- Laparoscopy
- Endometrial Biopsy
- Tubal patency test
- Chemotherapy
- Radiation therapy
- Medical termination of pregnancy
- Dilatation & Curettage
- Hysterectomy- Abdominal, Vaginal
- Caesarean Section

Procedures to be performed

- History taking
- Physical Examination – General
- Antenatal assessment - 20
- Pelvic examination
- Assessment of risk status.
- Assessment of intra uterine foetal well -being , kick chart and foetal movement chart, Doppler assessment, Non stress test, Contraction stress test (Oxytocin challenge test).
- Universal precautions – Disposal of biomedical waste.
- Per Vaginal examination and interpretation (early pregnancy, labour, post partum).
- Utilization of Partograph
- Medical & Surgical induction (Artificial rupture of membranes)
- Conduct of delivery - 20.
- Repair of tears and Episiotomy suturing.
- Controlled cord traction, Manual removal of placenta, placental examination.
- Postnatal assessment- 20
- Management of breast engorgement
- Thrombophlebitis (White leg)
- Post natal Counseling
- Laboratory tests: Blood – Hb, Sugar, Urine – albumin, sugar
- Breast examination and Breast care.

- Postnatal exercise.
- Assessment - New born assessment; physical and neurological, Apgar score, high- risk new born, Monitoring neonates; Clinically and with monitors, Capillary refill time, Assessment of jaundice, danger signs.
- Neonatal resuscitation
- Gastric Lavage of newborn
- Care of new born in ventilators, Radiant warmer and Incubator
- Kangaroo mother care.
- Assisting mother with exclusive Breast feeding
- Feeding technique: Katori, spoon, naso /orogastric, Total parenteral nutrition.
- Assessment, calculation and administration of fluids and medications:
 - Oral
 - I.D
 - I.M
 - I.V – Securing IV line, infusion pump

Administration of drug per rectum

- Capillary blood sample collection
- Oxygen therapy
- Phototherapy
- Chest physiotherapy
- Counseling – Parental, bereavement, family planning, infertility etc
- Setting of operation theatre.
- Pap smear
- Vaginal smear
- Insertion of pessaries
- Insertion of IUD and removal
- Teaching skills
- Communication skills
- Prepare referral slips
- Pre transport stabilization
- Networking with other stake holders

Assignments

Nursing care study-3 (antenatal, gynaec, postnatal)

- Clinical profile-1 (antenatal/gynaec)
- Nursing care analysis- 1 (antenatal-/gynaec)
- Nursing care plan based on theories
- Clinical teaching-3
- Case presentation -2
- Organize In-service education programme for nurses.
- Development of performance evaluation tool-1
- Critical analysis of research studies-1
- Design floor plan of obstetric unit-1
- Term paper
- Preparation of protocol (AN/IN/PN/Newborn)
- Logbook

Evaluation

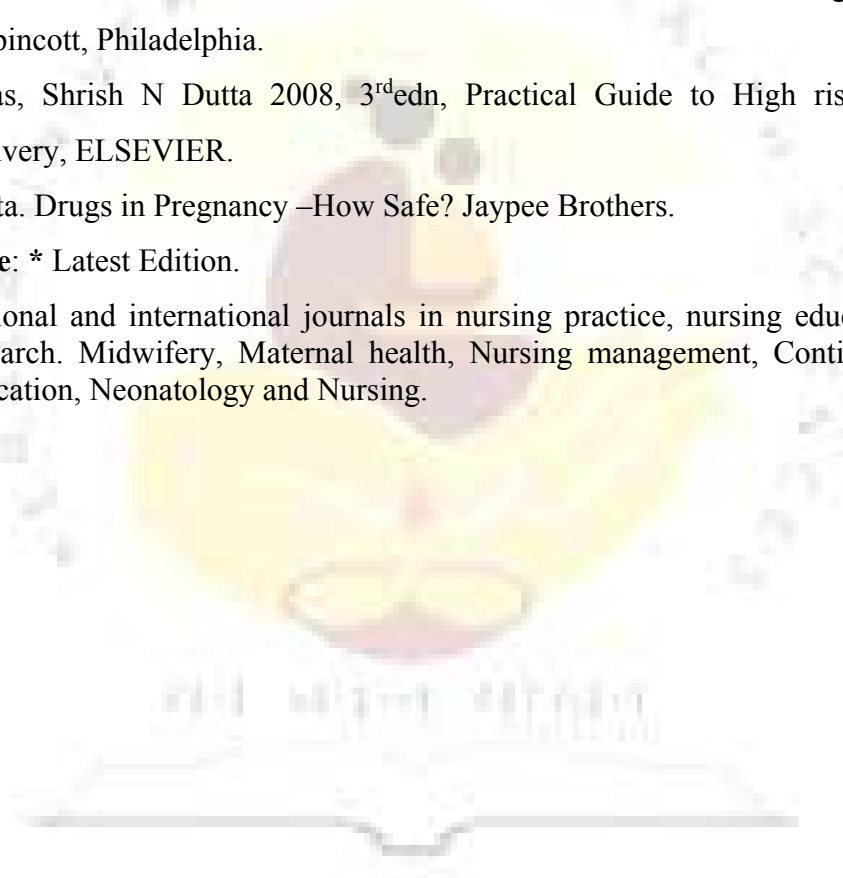

- Assignments
- Theory & Practical Exam
- Ongoing evaluation

Theory	Weightage	Practical	Weightage
Sessional exams (3)	50%	Ongoing evaluation	40%
Term paper -1	25%	Clinical assignment	40%
Seminars	25%	Int. Practical exam	20%
Total	100%	Total	100%

2.11 No: of hours per subject.

As given under “Content of each subject in each year “

2.12 Practical training.

As given under “Content of each subject in each year “

2.13 Records

Proper records of practical work should be meticulously maintained and duly signed by the supervising teacher should be submitted at the time of University practical examinations.

2.14 Dissertation: Guide/Co-Guide/ Change of Guide

Dissertation

Every candidate pursuing M .Sc Nursing course is required to carry out work on a selected research project under the guidance of a recognized postgraduate teacher. The results of such a work shall be submitted in the form of a dissertation.

The dissertation is aimed to train a postgraduate student in research methods and techniques. It includes identification of problem, formulation of hypothesis, review of literature, getting acquainted with recent advances, designing of a research study, collection of data, critical analysis, and comparison of results and drawing conclusions.

Every candidate shall submit to the University in the prescribed format a synopsis containing particulars of proposed dissertation work after obtaining ethical clearance from the Institutional Ethical Committee comprising principal/ Senior Professor of College of Nursing, **within ninemonths from the date of commencement of the course on or before the dates notified by the University.** The synopsis shall be sent through the proper channel.

Such proposal will be reviewed and the dissertation topic will be registered by the university. No change in the dissertation topic or Guide shall be made without prior approval of the University.

Tentative Schedule for dissertation

S. No.	Activities	Scheduled Time
1	Submission of the research proposal	End of 9th month of 1st year
2	Submission of dissertation Final	End of 9th month of IIInd Year

The dissertation should be written under the following headings:

1. INTRODUCTION
2. REVIEW OF LITERATURE
3. METHODOLOGY
4. ANALYSIS & INTERPRETATION
5. RESULTS
6. DISCUSSION, SUMMARY AND CONCLUSION

REFERENCES

APPENDICES

Dissertation style: Vancouver style format is used.

The written text of dissertation shall be not less than 75 pages and shall not exceed 100 pages excluding references, questionnaires, and other annexures. It should be neatly typed (font size 12-Times New Roman) in double line spacing on one side of the bond paper (A4 size, 8.27 x 11.69”) and bound properly. Spiral binding should be avoided. The Guide and the Head of the Institution shall certify the dissertation. Checking of Plagiarism may be done as per university norms.

The scientific committee of the college should scrutinize and evaluate the thesis and make required corrections if necessary and accept with modification before submitting to the University.

Four copies of the dissertation prepared shall be submitted to the Principal of the institution for onward transmission to University on the 21st month of commencement of the course.

Hall ticket for the second year examination should be issued to the candidate only after the dissertation has been submitted to the University.

Guidelines for submission of dissertation is given in Annexure

Research Guides

a) Qualification of Guide

Main guide: Nursing faculty / nursing expert in the field of study holding Ph.D. /M.Phil/M.Sc. Nursing with a minimum of 3 years experience in teaching in the Post Graduate Programme in Nursing.

Co-Guide: A Co-Guide is a nursing faculty/expert in the field of study (may be from outside the college but should be within the district)

b) Guide – Students Ratio

Maximum of 1:5 (including as co-guide)

Change of Guide –In the event of a registered guide leaving the college for any reason or in the event of death of Guide, Guide may be changed with prior permission from the University.

c) Research Committee

There should be a research committee/scientific review committee in each college comprising of minimum 5 Post Graduate Faculty representing all specialty chaired by the Principal, College of Nursing.

2.15 Specialty training if any

Nil

2.16 Project work to be done if any

Included in Clinical Assignments as given in “Content of each subject in each year “

2.17 Any other requirements [CNE, Paper Publishing etc.]

As given under “Content of each subject in each year “

2.18 Prescribed/recommended textbooks for each subject

As given under “Content of each subject in each year “

2.19 Reference books

As given under “Content of each subject in each year “

2.20 Journals

As given under “Content of each subject in each year “

2.21 Logbook

Every candidate shall maintain a log book for recording performance of activities/ procedures/ attending/ organizing workshop/ conferences. The logbook shall be verified

and certified by the Head of the Institution and presented in the University practical examination.

3 EXAMINATIONS

3.1 Eligibility to appear for exams

a) Attendance and Marks

Candidate should have 80% attendance for both theory and practical, with minimum 50% of internal marks in each subject both in theory & practical. However 100% of attendance should be completed for practical before the award of degree. There is no provision for condonation of attendance for the PG candidates.

b) Examination fee

The examination fee should be remitted for each examination appeared for. A fee as stipulated by the University should also be remitted for the evaluation of the dissertation.

c) Log Book

Every candidate shall maintain a log book for recording performance of activities/ procedures/ attending/ organizing workshop/ conferences. The logbook shall be verified and certified by the Head of the Institution and presented in the University practical examination.

3.2 Schedule of Regular/Supplementary exams

Regular University Examination will be conducted at the end of each academic year and Supplementary examinations will be conducted once in a year after regular examination.

3.3 Scheme of examination showing maximum marks and minimum marks

	Theory					Practical					Total
	Hours	Internal Marks		External Marks		Hours	Internal Marks		External Marks		
		Maximum	Minimum	Maximum	Minimum		Maximum	Minimum	Maximum	Minimum	
1st year											
Nursing Education	3	25	12.5	100	50		50	25	100	50	275

* Nursing Research (External) =75Marks and Statistics (External) =25 Marks

**Nursing Research (Internal) =15 and Statistics (Internal) =10

1. There shall be one regular & one supplementary examination every year.
2. Minimum pass marks shall be 50 % in each of the Theory and practical papers separately.
3. A candidate has to pass in theory and practical exam separately in each of the paper.
4. There is no provision for grace marks for pass in PG examination.
5. Maximum number of candidates for all practical examination should not exceed ten

per day.

6. One internal and one external examiner should evaluate dissertation and jointly conduct viva-voce for each student.
7. For Dissertation internal examiner and external examiner should be a Nursing faculty / Nursing expert in the same clinical specialty holding Ph.D./M.Phil/M.Sc. Nursing with a minimum of 3 years experience in guiding the research projects for Post Graduate students of Nursing.

3.4 Papers in each year

As given under “ Scheme of examination showing maximum and minimum mark “

3.5 Details of theory exams [include number of papers, Duration, Type of questions & number of questions and marks

As given under “Scheme of examination showing maximum and minimum mark “and 2.27

3.6 Model question paper for each subject with question paper pattern

Refer Annexure 1

Question Paper Pattern

I) All subjects with Maximum Marks:100		
Long Essay	1x20 marks 1x15 marks	35 marks
Short Essay	4x10 marks	40marks
Short Notes	5x5 marks	25 marks
Total Marks		100 marks
II) Nursing Research Max.marks:75		
Long Essay	2x15 marks	30 marks
Short Essay	3x10 marks	30 marks
Short notes	3x 5 marks	15 marks
Total Marks		75 marks
III) Statistics : 25 marks		
Statistical Calculations	1x10 marks	10 marks
Short notes	3x5 marks	15 marks
Total Marks		25 marks

I YEAR M.SC (NURSING) DEGREE EXAMINATION

ADVANCED NURSING PRACTICE

Model question paper

Time : Three hours Maximum marks : 100 marks

Answer all questions

I a. Define the concept of health promotion

b. Explain the major assumptions of Penders' Health promotion model.

c. Describe the application of Health Promotion Model in the management of obesity among women in the reproductive age group.

(2+8+10 = 20 marks)

2. Mr. M is admitted in the surgical ward with hemorrhagic shock after road traffic accident.

a. Explain the pathophysiology of haemorrhagic shock

b. List any 3 nursing diagnosis according to priority for this patient and prepare a care plan.

(5+10=15marks)

3. Describe the basic elements and explain the barriers of communication (10 marks)

4. Describe the challenges faced by the Health care delivery system in Kerala (10 marks)

5. Briefly explain the safe disposal of biomedical wastes (10 marks)

6. Explain the principles and techniques of counseling (10 marks)

Write short notes on (5x 5 = 25 marks)

7. Anti retroviral therapy

8. Use of computers in nursing practice

9. Haemodialysis

10. Metabolic acidosis

11. Genetic counseling

(10marks)

QP Code:

Reg. No.:.....

**FIRST YEAR M.Sc NURSING DEGREE EXAMINATION
NURSING RESEARCH & STATISTICS
MODEL QUESTION PAPER**

Time: Three Hours. Maximum: 100

Marks

Answer Section A and B in separate answer books

SECTION A : NURSING RESEARCH

Max. Marks : 75

1. Write a research proposal for a research problem 'quality of life of patients with AIDS'.
15
2. Describe observation as a method of data collection. 15
3. Explain the criteria for selection of a research problem. 10
4. Describe the methods of controlling extraneous variables. 10
5. Explain the different types of sampling. 10

Write Short notes on

6. Evidence based practice.
7. Grounded theory.
8. Purposes of literature review. (3x5=15)

Section B: statistics

9. Which is the appropriate statistical test to conclude the data given below; growth status and exposure to infection are associated. Conduct the statistical test and arrive your conclusion about data. P value at 5% level significance is 3.84

Growth status	infected	Non infected	Total
good	80	90	170
poor	240	110	350
total	320	300	620

10

SHORT NOTES

10. Properties of normal distribution.

11. Describe different methods of dispersion with merits and demerits

12. Reliability

3x 5 =15

QP Code:

Reg. No.:.....

First Year MSc Nursing Degree Examinations

NURSING EDUCATION

Model question paper

Time : 3 hrs

Max.marks:100

Answer All Questions

1. Explain the current trends in nursing education in India. (20)
2. Prepare the philosophy for a newly started college of nursing (15)
3. Plan a counselling session for nursing students. (10)
4. Describe the role of teachers in the development of pupil in nursing (10)
5. Describe the importance of non –projected aids in nursing education (10)
6. Describe the importance of questioning in education. (10)

WRITE SHORT NOTES

7. Aims of education.
8. Characteristics of an evaluation tool
9. Micro teaching
10. Objective structural practical examination
11. Formative and summative evaluation. (5x5=25)

QP Code:

Reg. No.:.....

First Year MSc Nursing Degree Examinations

Obstetric and Gynecological Nursing I

Clinical Specialty - 1

Model Question paper

Time : 3 hrs

Max marks:100

Answer all questions

Long essays

1. Define antenatal care. What are the objectives and components of antenatal care. Explain the care of a pregnant mother in the third trimester. (2+8+10=20)

 2. Describe the physiology of first stage of labour. Explain the nursing management of a woman in the first stage of labour. (6+9=15)

 3. Discuss the biochemical assessment of foetal wellbeing in early pregnancy. (10)

 4. Explain the ethical and legal aspects of Assisted Reproductive Technologies(10)

 5. Discuss development of fertilized ovum till eight weeks (10)

 6. Importance of preventive Obstetrics (10)
- Write short notes on
7. Causes of female infertility.
 8. Assessment of postnatal women.
 9. Nursing care in threatened abortion.
 10. Oxytocin
 11. Population dynamics (5x5=25)

QP Code:

Reg. No.:.....

Second Year M.Sc Nursing Degree Examinations

(Model Question Paper)

NURSING MANAGEMENT

Time: 3 hrs Max. Marks: 100

Answer all questions

Time: 3 hrs

Max. marks: 100

Answer all questions.

1. Explain the principles of management with suitable examples. (20)
 2. Prepare an evaluation tool for performance appraisal of staff nurses. (15)
 3. Explain the utilization of theories of management in nursing service with suitable examples. (10)
 4. Explain the role of nurse administrator in supervision. (10)
 5. Explain the challenges and current trends in nursing administration. (10)
 6. Describe the steps of material management. (10)
- Write short notes (5x5=25)
7. Collective bargaining
 8. Nurses role in occupational health and safety.
 9. Legal issues in nursing
 10. Quality circle
 11. Conflict management

QP Code:

Reg. No.:.....

Second Year M.Sc Nursing Degree Examinations

Obstetric and Gynecological Nursing

Clinical Specialty - 11

Model Question paper

Time : 3 hrs

Max marks:100

Answer all questions

1. Briefly explain causes and manifestations of antepartum haemorrhage. Explain the management of abruption placenta. (8+12=20)
2. Outline the design, layout, staffing, supplies and equipment in labour room with 10 beds. Discuss infection control measures in neonatal intensive care unit. (9+6=15)
3. Discuss the outcome and management of breech presentation in labour. (10)
4. Explain the characteristics and assessment of preterm newborn. (10)
5. Explain nurses role in prevention and management of atonic haemorrhage. (10)
6. Explain the effects of pregnancy on diabetes and diabetes on pregnancy. (10)

Write Short notes:

7. Post partum psychosis.
8. Prevention of parent to child transmission of HIV.
9. Plan an in service education programme in obstetric unit for the head nurses
10. Management of neonatal hypoglycaemia
11. Prevention of genital prolapse. (5x5=30)

3.7 Internal assessment component

- a) There shall be a minimum of 3 periodic assessments, for theory and practical including viva separately, of which the final one will be University model examination and is mandatory.
- b) Average of the marks of the best two periodic assessments shall be taken as internal assessment mark of the candidate. Marks of evaluation by other methods like assignments, seminars, projects etc. can be added to the internal marks.
- c) The class average of internal assessments mark of theory and practical should not exceed 75% of Maximum marks.
- d) The class average of internal assessment for an examination shall be calculated based on the total number of candidates in a particular batch appearing for that internal assessment examination.
- e) The candidate must secure 50% marks for internal assessment in theory and practical including viva separately in a particular subject in order to be eligible to appear in the university examination of the subject.
- f) In cases where the candidate is permitted to improve the internal assessment marks, the new marks will be taken as final.
- g) The internal marks shall be signed by the candidate before transmission to the University

3.8 Details of practical/clinical practicum exams

Practicals

- 4 hours of practical examination per student.
- Maximum number of 10 students per day per specialty.
- The examination should be held in concerned clinical area for clinical specialties. Facility for observation of all candidates at a time in the same ward / clinical area by the examiners during practical examinations is mandatory.
- One internal and external examiner should jointly conduct practical examination and viva voce separately for each student.
- Follow the evaluation guidelines for the conduct of practical examinations, Refer 2.10.

3.9 Number of examiners needed (Internal & External) and their qualifications

- One internal and external examiner should jointly conduct practical examination and viva voce separately for each student.

Examiner – Nursing faculty teaching respective specialty area/subjects in M.Sc nursing programme with minimum 3 years post graduate teaching experience.

The examiners should do evaluation of dissertation prior to viva.

3.10 Details of viva:

Duration: Viva-Voce -minimum 30 minutes per student.

4 INTERNSHIP

4.1 Eligibility for internship

Not applicable.

4.2 Details of internship

Not applicable.

4.3 Model of Internship Mark lists

Recommendations

Abstract

Abstract provides a brief summary of the dissertation/thesis, summing up clearly the problem examined, the methods used and the main findings. The abstract is a one-paragraph, self-contained summary of the most important elements of the paper. The abstract word limit is between 250 and 300 words. All numbers in the abstract (except those beginning a sentence) should be typed as digits rather than words. Keywords (max. 10) should be given, chosen from nursing subject headings. Each word should be separated by semicolon.

Proforma for Submission of M. Sc Nursing Dissertation Proposal

1. Name & Address of Student:
2. Email ID of the Student:
3. Registration Number:
4. Name & Address of Institution:
5. Title of the Dissertation:
6. Name of the Guide:
7. Address, phone number and E-mail ID of the Guide:
8. Educational Qualification of the Guide:
9. Experience of teacher in guiding postgraduate students. (in years):
10. Experience of teacher in guiding M.Phil/Ph.D students if any. (in years):
11. Synopsis of the study: Attached – Yes/No

Date:

Signature of the Guide

Enclosures:

I.) Bio- Data of the Guide

II.) proposal of the study (maximum 4-6 pages)

Signature of the Co-Guide:

C: Endorsement for change of guide

1. Remarks and Signature of the HOD :

2. Reason for change of guide:

Resigned / Retired/ any other

3. Remarks and Signature of the Principal:

Format for the submission of Dissertation Hard & Soft copy

Instructions to candidates

Although your dissertation may be prepared on a computer, consider the following requirements for meeting the standards.

Paper

Use only one side of high-quality, plain white (unlined in any way) bond paper, minimum 20-lb weight, and 8 ½ x 11 inches in size. Erasable paper should not be used.

Type Size and Print

Select fonts type Times New Roman and a size of 12 characters. The size of the titles should be 14 and Bold, the size of subtitles should be 12 and bold. Print should be letter quality or laser (not dot matrix) printing with dark black characters that are consistently clear and dense. Use the same type of print and print size throughout the document.

Pagination

Number all of the pages of your document, including not only the principal text, but also all plates, tables, diagrams, maps, and so on. Roman numerals are used on the preliminary pages (pages up to the first page of text) and Arabic numerals are used on the text pages. The numbers themselves can be placed anywhere on the page, however they should be consistent.

Spacing

Use double spacing except for long quotations and footnotes which are single-spaced.

Margins

To allow for binding, the left-hand margin must be 1.5 inches. Other margins should be 1.0". Diagrams, or photographs in any form should be a standard page size, or if larger, folded so that a free left-hand margin of 1.5 inch remains and the folded sheet is not larger than the standard page.

Photographs

Professional quality black-and-white photographs are necessary for clear reproduction.

Colors are allowed, but you should be certain the colored figure will copy clearly and will not be confusing when printed in black and white.

File Fomat

Dissertation format should be in .Doc (Ms Word Document) or PDF (Portable Document Format), Image files in JPG or TIFF format and Audio Visual in AVI (Audio Video Interleave), GIF, MPEG (moving picture expert) files format.

Labeling on CD

CD-ROM Labeling should be standard and should contain title, name of the candidate, degree name, subject name, and guide name, name of the department, college, place and year.

References

Vancouver style format.
