Rinu David Rina

11/6/21

Mentoring programme was conducted for my students through telephonic communication due to covid pandemic. I contacted each student and discussed regarding personal and academic areas. They don't have any problem regarding their academics. 2 students are in quarantine, their family members are suffering from covid-19. One student's brother had covid-19 but now his health condition is better. Another student's all family members including father, mother and brother having covid, now their health is better but student having lot of suffering regarding home management, stress regarding illness and academics. She informed to her class teacher and she helped and supported her, through calling I also provided psychological support to her. Now she is comfortable. All other students and their families are safe. There is no health issue and other issues reported. Binay A. P. S.

Mentoring was conducted on 11/6/21 at 12 PM through telephonic communication due to covid 19. I contacted all the students assigned to me and discussed regarding their health, academic, psychological, financial and social problems. They have no problems regarding their academic and health and psychological. Students are little fear about covid 19 because in their family some members were affected covid. Through telephoning I gave psychological support and all the supportive measures to prevent covid pandemic.

Shuleen
