WORKSHOP - 1

REPORT OF WORKSHOP ON SAMPLING PROCEDURES

We are extremely delighted that we could able to conduct a workshop on Research Methodology- Sampling techniques, sample size calculation. It was really informative and an enriching learning experience for all. Beneficiaries: Faculty and MSc Nursing students of Amala College of Nursing

Objectives:

- Explain the classification of sampling
- Describe sampling procedures
- Discuss the sample size calculation

The program was conducted on 10/8/2018 at lecture hall III. The session started at 10 am with a silent prayer. The program commenced with a welcome address by Principal Dr Rajee Reghunath. The program inaugurated by our beloved directed Rev Fr Francis Kurissery CMI. The session was taken by an expert speaker Dr Riyaz Marakkar, Assistant Professor, Department of Mental Health Nursing, College of Nursing Thrissur.

Dr Riyaz Marakkar discussed that sampling is a part of the total population. It can be an individual element or a group of elements selected from the population. Although it is a subset, it is representative of the population and suitable for research in terms of cost, convenience, and time. Resource mentioned about the sampling techniques which are grouped into two categories as Probability Sampling and Non- Probability Sampling. Also stressed that the sample group can be selected based on a probability or a non probability approach. A sample usually consists of various units of the population

AMALA COLLEGE OF NURSING

(An undertaking of Amala Cancer Hospital Society)

Amala Nagar P.O., Thrissur-680 555, Kerala, India.

Resource person discussed that sampling procedure is choosing part of a population to use to test hypotheses about the entire population and is used to choose the number of participants, interviews, or work samples to use in the assessment process. Dr Riyaz discussed the steps in sampling procedures which comprises of defining the target population, specifying the sampling frame, specifying the sampling unit, selection of the sampling method, determination of sample size, specifying the sampling plan and selecting the sample. The resource person concluded that sampling is the set of techniques and steps to be taken to carry out the process of selecting the sample in an investigation. The basic function of sampling is to determine which part of a population should be examined to make inferences about that population

The participants were really benefitted out of this workshop. The session ended with a word of gratitude delivered by Sr Litha Lizbeth, Vice Principal, Amala college of Nursing. Fifty participants benefitted out of this workshop.

RESOURCE PERSON DETAILS

Workshop on Research Sampling Procedures

Dr. RIAZ MARAKKAR

Name : Dr. Riyaaaz Marakkar

Age : 48 yrs

Designation : **Assistant Professor**

Mental Health Nursing department

Government College of Nursing, Ernakulum

Research Guidance : PG and PhD scholars from Kerala University of Health Sciences

Undertaken several Research Projects

Additional qualifications

- Dr. Riyaaaz awarded PhD in 2015 march 25 by Rajiv Gandhi University Of Health Sciences
- He is part of Global Research, Nurses, Global Health Network
- Have various peer reviewed national and international publication

WORKSHOP - 2

REPORT OF WORKSHOP ON ETHICS IN NURSING RESEARCH

We are extremely delighted that we could able to conduct a workshop on Ethics in Nursing Research- ethical principles, ethical guidelines and informed consent. It was really informative and an enriching learning experience for all. Beneficiaries: Faculty and MSc Nursing students of Amala College of Nursing

Objectives:

- Explain the ethical principles
- Describe ethical guidelines to be followed before conducting study
- Discuss the informed consent process

The program was conducted on 15/10/2018 at lecture hall III. The session started at 10 am with a silent prayer. The program commenced with a welcome address by Principal Dr Rajee Reghunath. The program inaugurated by our beloved directed Rev Fr Francis Kurissery CMI. The session was taken by an expert speaker Dr Seena S, Professor & Vice Principal, Department of Obstetrics & Gynecological Nursing, Elite hospital Thrissur.

Dr Seena discussed that ethics provide the avenue for decision making and are guided by the researcher's integrity. Resource person mentioned that as a nurse researcher, it is an ethical duty to advocate for patients when incompetent, unethical or illegal practices are observed. Also stressed regarding three basic principles to consider when evaluating the ethics of a study which included respect for persons, beneficence and justice and apply these principles in research is detrimental to the quality and validity of the study. Respect for person involves allowing the patient to make his/her own decisions. In order to accomplish this, the researcher must be certain that the participant is capable of making a cognitive decision. Beneficence is accomplished through assurance that no harm will come to the participant for voluntary participation in the study. Beneficence is determined through assessment

AMALA COLLEGE OF NURSING

Amala Nagar P.O., Thrissur-680 555, Kerala, India.

of the risks and benefits of the study design. Justice is accomplished when participant rights to fair treatment are honored. Justice includes subject selection.

Dr Seena discussed that Informed consent is a process of information exchange in which participants are provided understandable information needed to make a participation decision, full disclosure of the risk during data collection, subject selection process and competency issues are resolved. Resource person also mentioned to report all concerns to the Institutional Review Board (IRB) to assure that the patients are protected and that breaches of ethical or legal nature are resolved and further research would be discontinued until all concerns are appropriately managed. Once concerns are resolved, research design would be modified, informed consents would be re-obtained and study would continue as planned.

The participants were really benefitted out of this workshop. The session ended with a word of gratitude delivered by Lakshmi G. Fifty participants benefitted out of this workshop.
