Question :-

Mr Kapoor is a 78 year old patient whose wife died last year. He has been living alone. He has limited cooking skills; thus he eats out a lot. Since his wife died, his blood sugar has been poorly controlled. To help Mr. Kapoor gain better blood sugar control, the dietician came to see him. After she left, Mr Kapoor was angry and stated his desire to leave the hospital at the moment. He stated, 'that diet person came to see me, and she doesn't know anything'

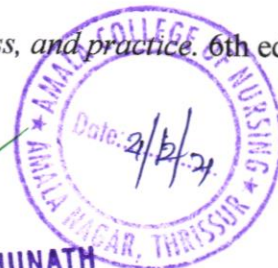

1. How would you approach Mr Kapoor
2. What communication techniques would you use and what would you avoid.

This teaching method was provided through online platform. Classes on communication has been given. The question was send in the watsapp group and students were asked to write and send their opinion.
