Reflective writing

* Descriptions

When we went for rounds with doctor as per the order of staff nurse and teachers and as we approached the group of doctors one of the house surgeon's asked us to go away and not to follow them in a rough manner.

* Feelings :-

We felt extremely sad and ashamed in that situation as all the bystanders and patients were watching us.

* Evaluation :-

The staff nurses were busy so they asked us to assist doctor instead of them. During this situation we could have made the doctors understand that we were there as per the instruction by staff nurse.

* Analysis :-

In our point of view as we analysed this scenario we were capable to know that many of them are not giving the respect that we deserve and there is a great chance of misunderstanding among the health workers in ward.

* Conclusion :-

During the doctors rounds we were asked to assist them and they asked to go away and we understand that we have to ask their permission to follow them.
